Emergency appeal Syria Crisis

 International Federation
of Red Cross and Red Crescent Societies

Emergency appeal n° MDRSY003 06 July 2012

This Emergency Appeal seeks CHF 27.2 million in cash, kind, or services to support the Syrian Arab Red Crescent National Society (SARC) to directly assist over 200,000 beneficiaries for 12 months and to strengthen its capacity to respond to the needs of more than 1.5 million people. It will be completed by the end of June, 2013. A Final Report will be made available by end of September 2013.

This emergency appeal reflects the huge increase in needs in Syria, based on the developing and unpredictable situation and is seeking CHF 27.2 million to support SARC in directly assisting 200,000 beneficiaries over a period of 12 months, primarily in the areas of health, relief and livelihoods. The Appeal also focuses on organisational development and capacity-building, to reinforce the National Society's ability to pursue its humanitarian assistance to the 1.5 million affected people.

The distribution of relief items in Idlib Governorate.
Photo: SARC/Idlib

Sixteen months on, the unrest in Syria continues. According to information gathered by SARC branches, 1.5 million people are now affected, with thousands wounded or having lost their lives. Violence has spread across the country, reaching previously unaffected areas. An increasing number of people have been displaced, often towards rural areas where access to social support is difficult, and it is a challenge to meet even basic needs. Household resources are running low, and communications in many places are limited or not functioning.

Since the beginning of the unrest, SARC has been working around the clock, having trained some 10,000 volunteers to date, to reach the most difficult to access communities amidst the fighting. Volunteers have lost their lives and many risk their personal safety on a daily basis, providing urgent assistance to people in need. Under the MENA Civil Unrest appeal (appeal number: MDR82001), IFRC supported the National Society in providing emergency health care and relief to thousands of people across the country (including supporting emergency and primary health care, providing ambulances, and distributing food and non-food items), as well as in helping to build the capacity of an organisation which is now implementing what has become a significant operation.

With mounting pressure on SARC to continue and scale-up its response to displaced Syrians and other affected people in the country, this appeal reflects the urgent needs and the scale of the response. Needs are high, and people in Syria require food and non-food items, emergency and basic health care, as well as livelihoods support when the situation allows, to enable them to become self-sustainable again. Therefore, this appeal seeks funding to assist SARC in the sectors of health, relief and livelihoods, with a large capacity-building and organisational development component, to ensure that volunteers and staff alike are adequately equipped to provide the most efficient and timely response possible.

The situation

Over one year into the unrest, the situation continues to provoke serious concerns relating to safety and protection, with thousands of people reported dead or injured. The humanitarian situation is becoming increasingly difficult, as the overall situation continues to deteriorate. Violence has spread across the country and there is increasing concern for the safety and well-being of people remaining in affected areas, as well as for vulnerable populations displaced into rural communities. Local resources are stretched to capacity, and the vulnerabilities of communities are growing, due to limited social infrastructure and with many people distanced from family-support mechanisms. People caught up in neighbourhoods affected by violence often have only limited access to food, water and other basic needs, and because the situation prevents easy movement, shops are closing down and supply chains are ceasing to function. Means of communication are not accessible in many places. According to information collected by SARC branches, some 1.5 million people are in need of basic relief items. Furthermore, limited access to health care in many places is of major concern.

In this challenging and evolving situation, the Syrian Arab Red Crescent (SARC) is working to support the affected population throughout the country. With relief and medical needs so high, and with growing pressure on SARC to respond to these needs and implement related activities, it is also essential to focus on capacity-building and organisational development in order to ensure that the necessary services are delivered as efficiently and effectively as the situation allows. SARC continues to work in line with the principles of the Red Cross and Red Crescent Movement, including neutrality, independence and impartiality, which are fundamental to the continuation of its work.

Coordination and partnerships

In the current situation of conflict in Syria, both SARC and ICRC have an explicit mandate to meet the needs of the affected people. The International Federation of Red Cross and Red Crescent Societies (IFRC) and other Movement partners support and reinforce the national or multi-lateral response capacities. A Letter of Understanding was agreed between SARC, ICRC and IFRC in order to strengthen the existing Movement coordination mechanism, by clarifying respective roles and responsibilities, and ensuring that the complementary capacities of each are deployed to best effect.

Support to SARC's positioning, access and coordinating role will be a crucial factor. There is already good coordination and rapport between SARC, ICRC, IFRC and other Movement partners in Syria. The neutrality and independence of SARC, and the access which SARC volunteers have in their communities, are essential for the continued provision of humanitarian assistance. Given SARC's unique role as national coordinator of humanitarian aid in Syria, most of the assistance being provided by the Movement, UN agencies, and other partners is and will continue to be channeled through SARC. A Movement Coordination Mechanism consisting of SARC, ICRC and IFRC senior management, coordinated and chaired by SARC, has been established to agree overall direction and approach; and to pursue a coordinated Movement approach towards UN and other non-Movement partners who are undertaking, for example, distributions of humanitarian assistance. Regular meetings will be proposed between the Movement Coordination Mechanism and the UN Humanitarian Coordinator. The Movement Coordination Mechanism will offer support to SARC in developing its agreements with UN and other non-Movement partners to ensure that SARC's interests and position are protected and respected. The Movement Coordination Mechanism will also support SARC where appropriate and when requested to do so in its relations with Government, through advocacy and advice.

Operational coordination on the ground between Movement partners is close. There is a clear division of roles between what is supported by ICRC and IFRC. ICRC has made a substantial budget extension to the organisation's appeal in May. This IFRC appeal seeks to complement what ICRC is doing in the areas most directly affected by conflict. In turn, IFRC is primarily covering those areas with large numbers of displaced families, who have left their homes to seek refuge outside of the most active conflict areas.

Red Cross and Red Crescent action

SARC continues, in risky and often life-threatening conditions, to provide urgent assistance to those affected by the unrest and in need of assistance. The only organisation with an outreach extending across the country, SARC is providing emergency health care, and food and non-food items to people - even in hard-to-reach and unstable areas. IFRC supports SARC in performing its lead role in the provision of humanitarian assistance to the affected population.

As the main ambulance provider in many parts of Syria, SARC continues to carry out first aid, emergency health, and the provision of ambulance services to wounded and sick across the country. In addition, with the support of partners including ICRC, IFRC and UN agencies (primarily WFP), as from July, SARC will reach more than 1 million people with relief and food assistance every month. This is now being scaled-up to 1.5 million people in August.

The IFRC Country Representative was joined in April by an Operations Coordinator on a short-term basis, who worked for four weeks in-country, liaising with key informants, including Movement and UN partners, to establish a strategy for Syria for the coming months. This strategy is currently under discussion in the MENA Zone and will be shared with partners once confirmed. In May, a longer-term Relief Operations Coordinator joined this mission, working with the IFRC Country Representative to support SARC relief distributions in areas of greatest need. Together, IFRC and SARC visit branches and affected areas to identify needs and existing capacity, so as to best inform SARC/IFRC response in-country. A recent assessment mission to Homs Governorate, where IFRC is supporting SARC health and relief activities, served to identify further needs, which IFRC plans to assist SARC in targeting.

To date, IFRC under the previous regional appeal, and with support from National Societies and ECHO, has contributed the following: 22 ambulances, 18,800 food parcels, 12,600 mattresses, 32,640 blankets, 11,388 kitchen sets and 22,403 hygiene kits. Eleven SARC clinics and MHUs are supported to provide basic health care to vulnerable populations, and 20 emergency health kits and 20 surgical kits were donated to SARC - enough to support 200,000 persons with emergency health interventions.

ICRC is assisting SARC in the coordination of the Movement's operational field response in the areas of relief distribution, First Aid dissemination, restoring family links, security management, and training, including Safer Access framework.

Since March 2011, despite restrictions and security conditions often limiting humanitarian action, SARC, ICRC and the Federation have steadily worked in partnership to address the humanitarian needs resulting from the unrest and fighting.

The needs

The needs in Syria are vast and growing. Reports from SARC branches indicate that some 1.5 million people are currently in need of assistance across the country. Needs are across sectors and span geographical areas. Additionally, the needs in Syria are not only immediate and urgent, but also mid- and long-term.

Immediate needs: With many people having been displaced, and others trapped in cities surrounded by fighting, there is an urgent need for food and non-food items to reach these communities. In rural areas where people have fled and where family resources are stretched, vulnerabilities are particularly high and are growing. Limited social support mechanisms and difficult access to markets mean that it is essential to provide these people with basic items and food rations. Those trapped in areas of violence also have limited access to food, water and basic services. Moreover, with shops closing and supply chains ceasing to function, purchasing food is becoming more and more of a challenge. In addition, with many out of work, household income does not, in many cases, allow for families to access even those market goods which are available.

Due to the widespread violence, the provision of emergency health care and first aid is a priority. Basic health services are inaccessible to a large segment of the population, and those still functioning lack adequate supplies and staff to provide the urgent treatment required. SARC is currently the main provider of ambulances in many areas in Syria, and it is therefore of paramount importance to ensure that teams are properly equipped. Rural areas are particularly vulnerable due to the increased challenges involved with lack of communication and ease of movement. Having lived in the conflict for an extended period, many people, especially families with children, are in need of psychosocial support.

Most of the people fleeing the areas of fighting are accommodated with host families, or renting rooms and private accommodation. However, a growing number are living in temporary shelters or pre-existing structures such as public buildings. Crowding in ill-equipped structures, which lack proper toilets and sanitation facilities, means that the potential for outbreaks of communicable diseases is of real and grave concern. There are therefore increasing needs in the sectors of shelter, water and sanitation which will need to be met.

Mid-term needs: It is not expected that the immediate needs will be fully covered any time soon. As the crisis continues, it is essential for emergency teams to continue providing communities with basic, life-saving items and services, as well as supporting people's own recovery.

As families' essential needs are met, focus will need to shift to providing people with livelihoods support, to enable them to re-establish themselves. Many have lost their jobs, job opportunities are scarce and income possibilities and purchasing power therefore also on the decline. In addition, many have lost their houses and left their belongings behind, some of them irretrievably. Supporting communities in their own recovery will involve assisting in the re-establishment of their shelter and basic productive and domestic assets, restoring their livelihoods, as well as improving their purchasing power to be able to purchase goods in the markets, and cover the essential and basic needs of all family members.

The proposed operation

The activities described below are planned with the assumption that field presence continues to be possible, that IFRC has an enhanced team present in the country, and that SARC capacities are reinforced.

Relief distribution (food and basic non-food items)

Outcome: Food and basic non-food items are distributed to up to 30,000 families (150,000 beneficiaries).	
Outputs (expected results)	Activities planned
The immediate needs of up to 30,000 families are met through relief distributions.	<ul style="list-style-type: none"> • Develop beneficiary targeting strategy and support SARC registration system to deliver intended assistance. • Support SARC relief distributions and supply movements from point of dispatch to end user. • Monitor and evaluate the relief activities and provide reporting on relief distributions. • Enhance SARC preparedness through pre-positioning of contingency relief items for an additional 5,000 families. • Develop an exit strategy.

Emergency health and care

Outcome: The immediate risks to the health of the affected population are reduced through the provision of emergency and basic medical services.	
Outputs (expected results)	Activities planned
At least 45,000 persons benefit from SARC support to emergency and basic health care.	<ul style="list-style-type: none"> • Identify the need for emergency and basic health services to fill the constantly shifting gaps, including risk of communicable diseases. • Support SARC in recruiting and training specialised health volunteers and staff. • Work with SARC to develop a plan for sustaining the ambulance services. • Procure health-related items and equipment in coordination with the logistics team (i.e. medical consumables and medicines¹). • Continue supporting 4 existing SARC mobile health units (MHU) already operating. Establish an additional 6 mobile health units.

¹ As per the standard IFRC medication list, and that produced by UNHCR in-country.

	<ul style="list-style-type: none"> • Enhance SARC fleet with an additional 12 ambulances. • Support SARC health department to develop an additional 5 health points at community level, to complement the 10 health points (existing and planned) supported bi-laterally by Danish RC. • Support the existing primary health care clinics, providing access to basic health care for displaced people.
Psycho-social support is provided to population and staff/volunteers of the operational local branches engaged in emergency response.	<ul style="list-style-type: none"> • Advise and coordinate with existing SARC Psycho-Social Support Programme² on basic psycho-social support projects for people affected by the crisis, with particular focus on children. • Support SARC in addressing any gaps due to growing PSP needs, through coordination and advocacy for further bi-lateral or multilateral support, as needed - and including Psychological Support to staff and volunteers of branches engaged in emergency response (with focus on “Help the Helpers” approach), and training of staff and volunteers engaged in emergency response on PSP programmes³.

Livelihoods and food security

Outcome1: Livelihoods of the people affected by the crisis are restored to enhance their self-sufficiency and recovery ability	
Outputs (expected results)	Activities planned
Targeted households are supported with livelihood projects, including asset replacement and income generation activities.	<ul style="list-style-type: none"> • Support SARC in assessing feasible livelihood interventions, beneficiary targeting, and promote the inclusion of DRR in planning and implementation. • Train volunteers and staff in income generation programming and asset replacement interventions. • Provide technical support to the planning and management of the livelihoods intervention, according to the agreed strategy (income generation activities, asset replacement programmes).
Outcome2: Families who have left their homes are supported with adequate shelter solutions	
Outputs (expected results)	Activities planned
Basic shelter support provided for both host and displaced families.	<ul style="list-style-type: none"> • Promote appropriate support for displaced persons living with host families. • Enable the provision of safe and adequate locally-appropriate shelter solutions, through relevant programming methodologies (e.g. distribution of materials and tools, training, etc). • Ensure shelter programming includes access to required water and sanitation services and communal facilities, in coordination with ICRC and other operational partners. • Develop contingency plans and support for emergency water and sanitation services (including hygiene promotion), in line with changing needs.

National society capacity building

Outcome: National Society HQ and branches have received support for their infrastructure and well-functioning.	
Outputs (expected results)	Activities planned
Volunteers involved in the	<ul style="list-style-type: none"> • Enhance SARC volunteer and branch leadership capacity in key

² Supported by Danish RC on bi-lateral basis

³ Specific activities currently supported by Danish Red Cross, as above.

operation are well supported and promoted.	<p>operational areas through training in the areas of: needs assessment in emergencies, relief (registration, distribution, reporting and monitoring), shelter management, watsan, and disaster management, and further enhance knowledge and practice of RC/RC principles and values (around 350 volunteers).</p> <ul style="list-style-type: none"> • Provision of Volunteering in Emergencies training package (a critical element in the current situation). • Provide modern communication tools and capacities to enhance connectivity and networking among the volunteers (i.e.VHF). • Provide minimum protection arrangements and equipment (e.g. insurance, survival kits, uniforms, etc.) for volunteers, especially for volunteers serving in high-risk areas. • Analyse and promote the contribution of volunteers through the different means of knowledge-sharing locally, regionally and internationally, especially within the RC/RC global network, if the situation allows. • Maximize opportunities to enable SARC to attract and retain volunteers representing the diversity of the communities.
Safety Support is delivered to all field workers in SARC	<ul style="list-style-type: none"> • Assist SARC with development of safety management plans for staff and volunteers in a way which complements support being provided by ICRC. • Safety support will revolve around the capacity to provide on-going assessments and advice, both prior to implementation of operating plans and throughout the operation.
HQ and overall SARC operational capacity is enhanced to meet the increased needs of the on-going crisis.	<ul style="list-style-type: none"> • Provide national and international staff to support overall operational capacity in the following priority areas: <ul style="list-style-type: none"> ○ Reporting and Information Management ○ Relief ○ Disaster Management ○ Resource Mobilization ○ Livelihoods ○ Finance ○ Logistics (warehousing / fleet) • Enhance operational capacity in branches with support for 12 branch Operational Support Coordinators, and 14 Information and Reporting Coordinators.
A contingency SARC / IFRC HQ is established to ensure continuity of operations.	<ul style="list-style-type: none"> • Provide financial support to SARC for alternative HQ, and relocation of staff and premises, as needed.

Logistics

The Zone Logistics Unit in Beirut, in close coordination with SARC and Dubai GLS, will set up a solid supply chain using GLS existing structures, in order to ensure best sourcing strategy in the provision of supplies required for beneficiaries (such as food, non-food relief, medicines, equipment and vehicles). So far, more than 20 vehicles and 200 tonnes of goods have been supplied from the Dubai GLS office, with additional multilateral and bilateral support of in-kind donations from partner national societies.

SARC Logistics Team will receive, custom clear, store and distribute the goods with the technical support of IFRC and other partners.

The current mobilization table for this appeal can be found in DMIS in the following link: https://www-secure.ifrc.org/DMISII/Pages/03_response/0307_logistics.aspx. The International Federation is mobilizing specific relief items to respond to needs in the field, and donors must coordinate with the Dubai GLS office regarding outstanding needs

Outcome1: Logistics support provided following IFRC procedures to ensure the efficient and timely delivery of goods and services for the success of the operation.	
Outputs (expected results)	Activities planned
Coordinated mobilization of international relief goods; Coordinated reception of all incoming goods; warehousing and further dispatch to branches and distribution points. Report on supply chain status and needs.	<ul style="list-style-type: none"> • Coordinate the mobilization of international supply chain. • Procure goods according to IFRC standards and procedures of procurement, and ensure that goods specifications follow international standards. • Support SARC in monitoring the reception, warehousing and dispatch of goods from the main warehouse to branches, and in producing relevant and accurate reports. • Manage the supply chain according to international standards.
Outcome2: SARC overall logistics capacity is developed and strengthened to provide effective and efficient logistics services, and the institutional capacity is enhanced to meet RC Movement standards in addressing SARC and Movement partners' logistics requirements in the future.	
Outputs (expected results)	Activities planned
SARC logistics capacity is strengthened through training, workshops, and technical support (including tools, equipment and human resources).	<ul style="list-style-type: none"> • Support SARC to enhance the logistics/relief interface coordination, in close cooperation with partners. • Support SARC on the management of logistical technical information, to ensure quality of information on fleet, supply chain, and warehousing, at HQ and branch levels. • Support SARC to enhance its stock management system at HQ and branch levels. • Improve warehousing operations and conditions, by providing human resources, vehicles, and equipment (furniture, forklifts, computers, generators, software, and tools, including implementation of the Federation Warehouse Information System). • Support the recruitment of logistics staff by SARC and provide training according to recognized standards, at HQ and branch levels. • Encourage SARC to enhance its fleet management system at HQ and branch levels, and look into fleet expansion and vehicle replacement policy as per needs. • Start the project to establish a new SARC HQ warehouse in Damascus (in space already owned by SARC), plus two additional regional warehouses. • Equip all warehouses with fire and alarm systems.

Communications – Advocacy and Public information

Support SARC communications and IFRC in preparing public communications material for Federation-wide use, such as news stories for the web, video footage and interviews, photos and media materials, where and as appropriate.

Develop information-sharing channels and tools together with SARC to ensure the provision of necessary information to donors and stakeholders on regular basis in a transparent and accountable manner.

Capacity of the National Society

The Syrian Arab Red Crescent Society (SARC) is playing a key role as the largest national humanitarian organisation in Syria, and the sole organisation with access to many parts of the country through its 14 branches and extensive number of sub-branches. Approximately 10,000 volunteers have been trained to provide support in disaster response, first aid, restoring family links, relief distribution and other priority activities, with many active during the current crisis. The National Society has also been tasked by the government to co-ordinate all international non-governmental assistance for the hundreds of thousands of displaced Iraqis in Syria. In this capacity, SARC works with almost all UN agencies present in Syria, primarily UNHCR, UNICEF, WFP, WHO, United Nations Population Fund (UNFPA), United Nations Relief and Works Agency (UNRWA); United Nations Development Programme (UNDP), and the International Organisation for Migration (IOM); and with seven international NGOs primarily providing support to health care, vocational training and education to displaced Iraqis in Syria. Even though SARC is considered one of the National Societies of excellence in disaster management in the MENA Zone, its capacity is, for obvious reasons,

stretched. Therefore, this appeal has as its main focus support for SARC to build its capacity to deliver on these massive expectations. SARC is planning to adapt its structure and staffing levels to meet these expectations, both at Headquarters and at branch levels, where coordinators for the disaster response will be appointed and trained.

Capacity of the IFRC

IFRC currently has a Country Representative, a Relief Operations Coordinator and a Reporting Delegate in Syria, working closely with SARC to respond to and scale up its response to the crisis. Plans are in place for the capacity of IFRC in Syria to be further enhanced to ensure that a comprehensive and skilled technical team is dedicating 100% of its time to work alongside SARC, providing training and support to enhance SARC capacity to manage operations. A programme support coordinator, resource mobilisation delegate, finance development delegate and livelihood delegate are planned to be recruited. Additional needs for technical assistance to SARC will be analysed and discussed as the operation and situation evolve. Support for capacity building in other areas such as health, logistics, IT/telecommunications, and other sectors will be provided as per needs, mainly through short-term visits and trainings.

The Zone office, which recently moved to Beirut from Amman, is coordinating the response activities at Zone level to ensure timely and effective delivery of humanitarian response. The acting head of programmes services / operation is working closely with the Disaster Management Unit which is headed by the DM Coordinator. The DMU has recently expanded to a team of five, consisting of a Disaster Management Officer, Disaster Preparedness Officer (since May, staff-on-loan from SARC), a Disaster Response Delegate (funded by the British Red Cross through the MENA emergency appeal) and a Disaster Management Assistant. In line with the scale-up plans for the response in Syria, IFRC Zone Office capacity will be boosted further to ensure adequate support is provided to SARC and the IFRC Syria Country Team, including capacity in Syria and at Zone level to monitor and report on the emergency response programme.

How we work

All IFRC assistance seeks to adhere to the Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGO's) in Disaster Relief and the Humanitarian Charter and Minimum Standards in Disaster Response (Sphere) in delivering assistance to the most vulnerable.

The IFRC's vision is to inspire, encourage, facilitate and promote at all times all forms of humanitarian activities by National Societies, with a view to preventing and alleviating human suffering, and thereby contributing to the maintenance and promotion of human dignity and peace in the world.

www.ifrc.org
Saving lives, changing minds.

The IFRC's work is guided by Strategy 2020 which puts forward three strategic aims:

1. Save lives, protect livelihoods, and strengthen recovery from disaster and crises.
2. Enable healthy and safe living.
3. Promote social inclusion and a culture of non-violence and peace.
