

Emergency appeal operation update

Philippines: Typhoon Haiyan

Emergency appeal n° MDRPH014

GLIDE n° [TC-2013-000139-PHL](#)

Operation update n° 17 (3-year consolidated report and extension of timeframe)

29 December 2016

Period covered by this operation update: 8 November 2013 to 30 November 2016

Appeal target (current): CHF 94.53 million

Appeal coverage: 96 per cent

Appeal history:

-  **18 August 2015:** The budget was adjusted downwards by 5 per cent, from CHF 99.88 million to CHF 94.53 million via [Operations Update 13](#).
-  **30 July 2014:** A further [revision](#) of the emergency appeal was launched, seeking CHF 99.88 million to support 100,000 households (500,000 people) through December 2016.
-  **16 January 2014:** A [revision](#) of this emergency appeal was launched for CHF 126.2 million to support 100,000 families (500,000 people) over 24 months.
-  **12 November 2013:** An [emergency appeal](#) was launched on a preliminary basis for CHF 72.3 million to support 100,000 families (500,000 people) over 18 months.
-  **8 November 2013:** CHF 475,495 was allocated from the International Federation of Red Cross and Red Crescent Societies' (IFRC) Disaster Relief Emergency Fund ([DREF](#)) to support the Philippine Red Cross (PRC) in delivering immediate assistance and undertaking initial needs.

Photo: Maryjane Flor Patulilic

This Operation Update extends the operation's timeframe by three months – until 31 March 2017. The extension is to allow settlement of pending bills and outstanding National Society working advance as well as undertaking of the final external evaluation. While programmatic implementation has by large being completed, the extension will allow for accurate matching of narrative and financial reporting.

In addition to extending the operation's timeframe, this update also provides a projection of activities initiated under this Emergency Appeal but will be finalized under the Operational Plan 2017 for Philippines in the context of linking relief, recovery and development.

The situation

Identified as one of the most powerful typhoons ever to make landfall, Typhoon Haiyan struck Central Philippines on 8 November 2013. It killed at least 6,300 people and caused massive damage to more than 1.14 million houses, displacing an estimated 4.1 million people and affecting more than 16 million individuals.

The emergency relief operation was launched immediately to provide assistance to the people affected across the Central Visayas region. Food, water, and emergency shelter materials were dispatched and more than 8,000 volunteers were mobilized. The recovery of households entailed support for shelter repair and reconstruction, recovery of livelihoods and income generation activities, construction of water and sanitation facilities, rehabilitation of health infrastructure and health promotion initiatives, and improved educational facilities. Awareness raising sessions were also carried out with the communities to improve their knowledge of disaster preparedness.

Three years on, the Philippine Red Cross (PRC), together with its Red Cross and Red Crescent Movement (Movement) partners, are close to completing their support to longer-term recovery of communities. PRC and most of its Movement partners – including IFRC, with an Emergency Appeal operation of CHF 94.53 million in budget – are now working on their exit strategies and transitioning from recovery to development.

Meantime, as the Typhoon Haiyan operation winds up, IFRC continues to support PRC in responding to Typhoon Sarika (DREF operation [MDRPH021](#)) and Typhoon Haima (Emergency Appeal operation [MDRPH022](#)).

Financial situation

The appeal budget, excluding bilateral contributions, amounts to CHF 86.33 million. The income recorded to date is CHF 83.14 million (96 percent coverage). **On behalf of the PRC, IFRC would like to thank all partners and donors for their invaluable support towards this operation.**

Of the total amount received, expenditure as of 30 November 2016 was CHF 75.7 million (91 percent of income): [<Click here to go to interim financial report>](#)

While programmatic implementation has, by large, been completed, there are some pending bills and outstanding National Society working advance that still need to be liquidated. As such, the expenditure rate will increase during the remaining period of the operation, with an accurate figure to be provided in the final report.

Meantime, it is projected that when the Emergency Appeal closes on 31 March 2017, a small balance will be transferred to the Country Operational Plan for 2017. The balance will support the linkage of relief, recovery and development through taking forward programmes aimed at enhancing community resilience as well as supporting the enhancement of PRC's organizational and response capacity.

The approach adopted in moving ahead the exit strategy is in line with PRC Strategy 2017-2021 as well as in conformity with the IFRC Governing Board recommendation that at least 10 percent of funds mobilized through an Emergency Appeal be dedicated for disaster risk reduction and preparedness measures.

Coordination and partnerships

Overview of Host National Society

PRC is the nation's largest humanitarian organization and works through 102 chapters covering all administrative districts and major cities in the country. It has at least 1,000 staff at national headquarters and chapters levels, and approximately 1 million volunteers and supporters, of whom some 500,000 are active volunteers. At the chapter level, a programme called Red Cross Action Team (RCAT) 143 is in place to enhance the overall capacity of the National Society to prepare for and respond in disaster situations.

Overview of Red Cross Red Crescent Movement in-country

The National Society has worked with the IFRC, ICRC and 13 Partner National Societies in-country in the Typhoon Haiyan operation. The operation has covered nine provinces: Aklan, Antique, Capiz, Cebu, Eastern Samar, Iloilo, Leyte, Palawan and Western Samar. PRC continues to take the lead in Movement coordination, supported by IFRC in accordance with the Movement-wide operational framework. Movement partner meetings have been held regularly at the national headquarter and field levels.

Overview of non-Red Cross Red Crescent actors in country

As an auxiliary to the public authorities, PRC maintains a strong relationship with government bodies through participation or collaboration with the National Disaster Risk Reduction and Management Council (NDRRMC); the provincial, municipal and barangay (village) disaster risk reduction and management councils; and the local government units, defined in the Disaster Risk Reduction and Management Act from 2010.

Red Cross and Red Crescent Action

Here is a snapshot of assistance provided under the IFRC Emergency Appeal operation in the recovery phase.

	<ul style="list-style-type: none"> 5 Chapters supported with recovery operations in the five provinces of Leyte, Cebu, Capiz, Aklan and Antique
	<ul style="list-style-type: none"> 18,738 households have received shelter repair assistance 7,852 households have been supported to build core shelters 26,590 households have received awareness raising on safer shelter
	<ul style="list-style-type: none"> 24,877 households have received household livelihood assistance 575 youth have graduated after receiving support to pursue vocational training, with most securing jobs 56 communities have been supported to establish community-managed livelihood projects
	<ul style="list-style-type: none"> 20 health facilities have been reconstructed and provided with medical equipment 67 communities have been reached with community-based health and first aid (CBHFA) activities 104,076 individuals have been reached with community-based disease prevention (CBDP) measures
	<ul style="list-style-type: none"> 4,322 households have been reached with participatory hygiene and sanitation transformation (PHAST) activities 8,411 students with children hygiene and sanitation training (CHAST) activities 31 water and sanitation facilities completed in schools 1,577 households received water sources 9,148 households received latrines and hygiene promotion
	<ul style="list-style-type: none"> Supported PRC capacity development initiatives Supported disaster preparedness stock Planned rehabilitation of targeted chapters, blood banks and warehouses 12 chapters supported with RCAT Supported RC143 in Haiyan operational chapters
	<ul style="list-style-type: none"> Incorporated risk reduction across all sectors Implemented the community-based disaster risk management projects in targeted communities Launched Disaster Law project

For details on interventions carried out collectively by Movement partners in support of the overall PRC operational framework, please refer to the [Typhoon Haiyan Three-Year Movement-wide Report](#).

Progress towards outcomes

Relief phase

The details of the relief phase activities were reported in the [one-year consolidated report](#).

 Relief	
Outcome	Output
Outcome 1: Essential household needs of typhoon-affected households are met	Output 1.1: 100,000 affected households have access to appropriate food rations and essential non-food items to meet immediate needs
	Output 1.2: 45,000 affected households provided with unconditional cash grants to meet immediate needs

Output 1.1:

By April 2014, the distributions of food rations, non-food items and unconditional cash grants were completed. Through the support provided by the IFRC, PRC provided 158,727 households with relief items (sleeping kits, jerry cans, kitchen sets and hygiene kits).

Output 1.2:

A total of 49,844 households were reached with unconditional cash grants under this IFRC-supported operation.

Initial targets for both outputs were exceeded. Details are available in [Operations Update 10](#).

 Emergency shelter	
Outcome	Output
Outcome 2: The immediate shelter needs of the target population are met	Output 2.1: Emergency shelter assistance is provided to 100,000 households affected by the typhoon

Output 2.1:

A total of 109,587 households received emergency shelter materials such as tents, tarpaulins and shelter tool kits. The provision of emergency shelter was concluded by April 2014 and reported in [Operations Update No. 10](#).

Recovery phase

 Shelter	
Outcome	Output
Outcome 3: Affected households have recovered safer shelter and gained awareness, knowledge and skills to improve resilience to future shocks	Output 3.1: 15,000 affected households whose houses were damaged have repaired or retrofitted back better
	Output 3.2: 8,000 ¹ affected households whose houses were destroyed have built core shelters that have improved physical durability to hazards
	Output 3.3: Orientation/awareness raising sessions on safer shelter provided to at least 24,000 households in target communities

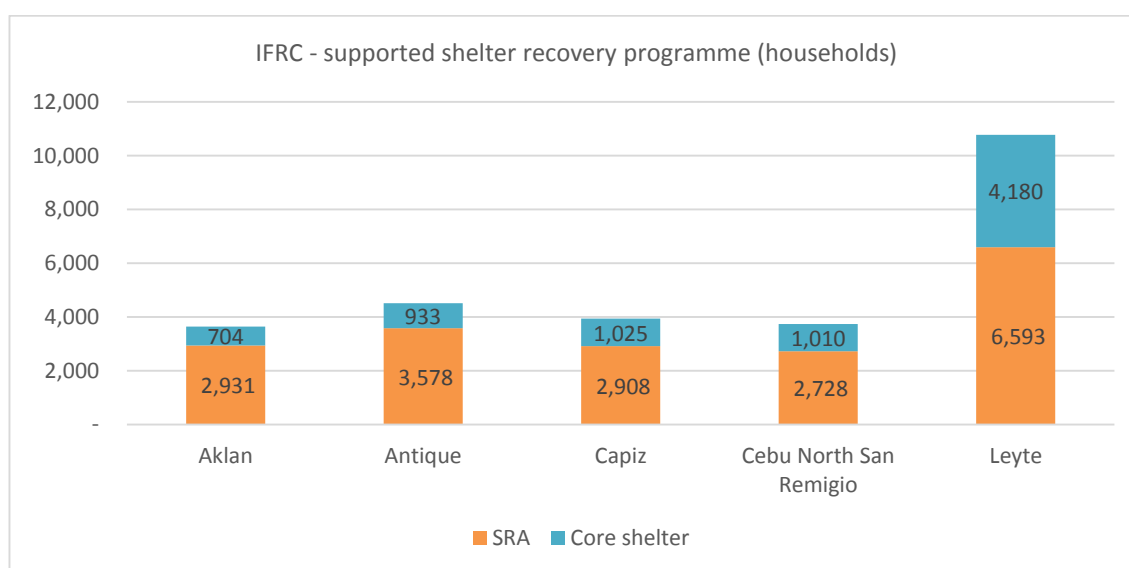

Output 3.1:

Provision of shelter repair assistance was completed by December 2014, reaching 18,344 households. The assistance comprised provision of 10 pieces CGI sheets, conditional cash of PHP 10,000 (CHF 206) and safe shelter awareness orientation.

A beneficiary satisfaction and impact survey was carried out in February 2016, covering 1,929 respondents or around 10 per cent of total households assisted. At least 99 percent of households indicated that the assistance helped in their recovery, with 98 percent indicating that they were satisfied with level of assistance provided. 75 per cent felt that their new houses were sturdier than their old houses, with 73 per cent indicating that they felt safer in their new homes. Of the total, 88 per cent felt that the beneficiary selection criteria and process were fair. Finally, 97 per cent of households utilized the conditional cash grants for building or repairs, with the rest utilizing the same for other pressing needs including food and medicines. Further analysis will be provided in the final report.

Output 3.2:

A total of 7,852 households had been supported to build core shelters as of mid-June 2016. The core shelter provided is a half-concrete, half-wooden structure, with an attached latrine and septic tank. The support provided under this IFRC Emergency Appeal operation covered five provinces: Aklan, Antique, Capiz, Cebu and Leyte.

A beneficiary satisfaction and impact survey was conducted in July 2016. All respondents (100 per cent) indicated that the core shelter programme helped in their recovery and were satisfied with the assistance provided. Just over 70 per cent of respondents said that they received or were able to read information materials from PRC regarding safe shelter construction, with 99 per cent indicating that the information materials were helpful. At least 90 per cent said they actively participated in rebuilding their homes. More analysis will be provided in the final report.

Meantime, a commitment remains to provide core shelter for 100 families in North Cebu who lived in no-build zones and remain displaced. An appropriate relocation site has been identified but due to delays in completing the necessary site preparation process, the assistance will be provided under Operational Plan 2017 for Philippines.

¹ Reduced from 9,000 – see [Operations Update No. 15](#)

Avengie Bulambao shows her old house, in a coastal area, after it was damaged by Haiyan (left photo) in Lambusan Barangay, Municipality of San Remigio, Cebu Province. After being identified as core shelter beneficiary, the family chose to build their new shelter (right photo) away from the coastal area. **Photo: Cheryl Gaglac/IFRC**

Output 3.3:

In all, 26,590 households have been reached with safer shelter awareness activities, namely households that benefitted from both SRA and core shelter assistance – exceeding the original target of 24,000.

Aside from the carpenters and masons being reached during orientation, members of communities have also been provided with orientation on safer shelter construction information through the distribution or display of information, education and communications materials such as leaflets and banners.

Furthermore, in Cebu, 300 individuals participated in a 3-day workshop covering more detailed safe shelter awareness. The objective was to help participants understand and implement the eight *build back safer* key messages from the Shelter Cluster. This was also used as a pilot for developing safer shelter awareness for longer term programmes.

The 3-day safer shelter awareness seminar was attended by 300 individuals. These trained individuals will contribute towards reducing shelter-related risk in their own communities. **Photo: IFRC**

 Livelihoods restoration and strengthening	
Outcome	Output
Outcome 4: Livelihoods are restored among affected populations	Output 4.1: 24,000 affected households have restored livelihoods after receiving working capital and inputs sufficient to resume activities
	Output 4.2: Community groups in 100 barangays have restored or diversified livelihoods after receiving working capital and inputs sufficient to resume activities
	Output 4.3: 200 youth are awarded scholarships, pursue vocational training and equipped with market-demand skills

Output 4.1

A total of 24,877 households were reached with household livelihoods assistance in the form of conditional cash grants worth between PHP 8,000 to PHP 10,000.

Households that benefitted from this project were required to submit a proposal to PRC, whose personnel then checked and validated the feasibility prior to distribution of the grants. PRC also provided technical assistance during the proposal writing, and monitored the development of the households' livelihood activities. The target was exceeded as assessments on the ground indicated more needs than was expected. Detail activities are reported in the [previous reports](#).

A beneficiary satisfaction and impact survey targeting those covered by the household livelihoods assistance (HLA) was carried out in March 2015. Around 74 percent of respondents indicated that the assistance they received under this operation was adequate, with close to 65 per cent saying they felt that their households had recovered from the effects of Typhoon Haiyan in part due the HLA they received. Almost all the respondents (98 per cent) indicated that the Red Cross listened to community needs. More details will be provided in the final report.

Output 4.2

Under this operation, 56 communities – nine in Antique, nine in Aklan, 10 in Capiz, four in Cebu and 24 in Leyte – were supported to establish community-managed livelihood projects (CMLP) as of August 2016. The CMLP were implemented by community-based organizations or associations to benefit the most vulnerable members of the community by providing a sustainable supplementary income for the participating community members. The community groups were involved in project planning, resource mobilization, implementation and monitoring and assume the responsibility of managing the livelihood ventures. The target of 100 communities was not reached partly due to funding constraints but also because PRC prioritized support to youth (see Output 4.3).

Each community group received approximately CHF 6,000 in working capital and inputs for establishing and running the livelihood ventures. Of the 56 CMLP established, 41 per cent relate to agriculture, 25 per cent focus on food processing or production, 18 per cent on retail/wholesale, and 16 per cent on aquaculture or fishing.

Output 4.3

Another component of the livelihoods programme is the skills training and enterprise development (STED) under which target youth have been awarded scholarships to pursue vocational training aimed at equipping them with market-demand skills. Upon graduation, some of the youth have been provided with inputs – such as sewing machines and air conditioner/refrigerator repair tools – which they have used to start income earning ventures. In all, 575 youth completed vocational training, with 303 (53 per cent) having secured employment as of June 2016. The target was exceeded due to the extent of needs on the ground.

Table 1. No. of youth who graduated and obtained employment

Province	Graduated	Employed
Antique	105	61
Aklan	85	69
Capiz	99	44
Cebu	84	39
Leyte	202	90
Total	575	303

Most of the jobs have been obtained in the hospitality and automotive industries.

PRC continue to monitor the progress of all graduates and is keeping tracking of their employment status including via short messaging service (SMS) text blasts and phone calls. In addition, social media platforms have been set up to support monitoring, to provide career advice and to obtain feedback. PRC is coordinating with the Department of Labour and Employment (DOLE) in seeking opportunities for those still searching for jobs.

Water, sanitation and hygiene promotion

Outcome	Output
Outcome 5: Risk of waterborne, water-related and vector-borne diseases in targeted communities is reduced	Output 5.1: Access to safe water by target population in 20 schools and 20 barangays increased
	Output 5.2: Access to adequate sanitation facilities by target population in 20 schools and 20 barangays increased
	Output 5.3: Knowledge, attitude and practice on safe water, sanitation and hygiene by target population in 20 schools and 20 barangays increased

Output 5.1

Access to safe water in communities and schools

Following PHAST sessions, a number of communities identified the need for interventions aimed at increasing access to safe water. Subsequently, this operation supported the rehabilitation or some 63 installation of water points/systems (which were complete and operational as of August 2016), including connection of households to main water pipes and repair of motor or hand pumps, to the benefit of 1,577 households.

Table 2. Water-related projects supported in target communities

Province	Water tower and piped connections	Household water connections	Deep well with motor pump	Hand pumps	Spring box	Households supported
Leyte	1	-	1	6	-	547
Aklan	-	-	-	14	1	84
Antique	1	1	-	-	-	265
Cebu	-	1	2	1	-	241
Capiz	-	-	-	34	-	440
Total	2	2	3	55	1	1,577

Support for water facilities in schools has been provided in an integrated manner with that of sanitation facilities. Consequently, details are included under Output 5.2 below.

Output 5.2:

Access to improved sanitation in schools and communities

Following CHAST sessions in schools, a need was identified by various target schools for the rehabilitation or construction of water and sanitation facilities. Thus far, a total of 31 schools have been supported with new or refurbished facilities including sanitation blocks (latrines) with hand washing facilities, elevated water tanks, and water networks. Also, the facilities separate units for males and females and have been equipped with ramps and pathways to ensure access by people with a disability and senior citizens.

Table 3. Water and sanitation facilities in schools

Province	No. of schools	Hardware interventions
Aklan	5	<ul style="list-style-type: none"> Rehabilitation/construction of sanitation facility Construction of hand washing facility
Antique	6	<ul style="list-style-type: none"> Construction of sanitation facility
Capiz	5	<ul style="list-style-type: none"> Construction of sanitary block (sanitation facility) Construction of elevated water tank Installation of electric pump with pump house Construction of hand washing facility
Cebu	6	<ul style="list-style-type: none"> Construction of sanitation and hand washing facilities Installation of elevated water tank Rehabilitation of dug well & installation of hand pump
Leyte	9	<ul style="list-style-type: none"> Construction of sanitation and hand washing facilities Installation of elevated water tank (only in five schools)
Total	31	

In some communities, households raised concerns regarding the access to sanitation during the PHAST sessions. Based on the needs identified by community members, a total of 1,296 households have been supported to construct latrines through the owner-driven approach using cash transfers. The conditional cash grants were released to the households in two tranches – one for the septic tank and one for the superstructure. The households were given a checklist/set of tasks to complete to be eligible for the release of the cash grants.

Table 4. No. of households supported to construct latrines

Type of support	Province	Communities		Households assisted
		No. of municipalities	No. of barangays	
Household latrines (with superstructure and septic tank)	Aklan	2	1	95
	Antique	5	5	289
	Capiz	2	5	93
	Cebu	2	6	324
	Leyte	2	7	396
	Total	13	24	1,197
Septic tank only	Antique	5	5	57
	Total	5	5	57
Superstructure only	Antique	5	5	42
	Total	5	5	42

In addition to the above – and as mentioned in the shelter section – each of the 7,852 core shelters completed as of mid-June 2016 has an attached latrine, a septic tank and soak pit. The programme ensured that each household supported to build core shelter core was reached awareness on proper maintenance and usage of the sanitation facilities provided.

The hygiene promotion sessions organized in this regard included key messages on:

- (i) Hand-washing
- (ii) Environmental sanitation
- (iii) Prevention and management of diarrheal and vector-borne diseases
- (iv) Proper use and maintenance of latrines.

Output 5.3:

This operation has two components aimed at enhancing knowledge, attitude and practice on safe water, sanitation and hygiene; in schools and communities. Thus far, a total of 8,411 students in 31 schools – which have also been supported with new or refurbished facilities – have been reached with CHAST activities while 5,800 households in 20 communities have been reached with PHAST activities in the provinces of Aklan, Antique, Capiz, Cebu and Leyte. Through these activities, students and community members identified water and sanitation issues which were then addressed using both hardware (facilities) and software (hygiene promotion).

In implementing PHAST interventions, integration was maintained with health, especially in areas where water and sanitation health risks had been identified under the community-based health and first aid (CBHFA) approach. In the integrated approach, key messages on personal and general hygiene (with emphasis on proper latrine maintenance and environmental cleanliness) were included.

Table 5. households reached with PHAST and children reached with CHAST

Province	No. of communities covered by PHAST	No. of households reached with PHAST	No. of schools covered by CHAST	No. of students reached with CHAST
Aklan	3	1,711	5	1,744
Antique	4	702	6	2,252
Capiz	5	1,624	5	686
Cebu	3	987	6	1,452
Leyte	5	776	9	2,277
Total	20	5,800	31	8,411

 Health and care	
Outcome	Output
Outcome 6: The immediate and medium-term risks to the health of affected populations are reduced	Output 6.1: Target population is provided with rapid medical management of injuries and diseases
	Output 6.2: Gaps in medical infrastructure of the affected population in 60 barangays filled
	Output 6.3: Community-based disease prevention, epidemic preparedness, and health promotion measures provided in 60 barangays
	Output 6.4: Mainstream and crosscutting psychosocial support provided in 60 barangays and five chapters

Output 6.1:

The emergency health activities were reported in [Operations Update No.7](#).

Output 6.2:

This operation aimed to fill gaps in medical infrastructure through rehabilitation and upgrading of damaged health facilities. In close coordination with the Department of Health (DOH), PRC and IFRC undertook assessments to identify the 20 damaged health facilities to be supported under this operation. Rehabilitation and upgrading works have been completed and all the 20 facilities, with birthing sections, equipped with essential equipment and medical supplies. Guidelines and technical specification for purchase and inspection of medical equipment were developed in consultation with DOH. A total of 522 units of medical and non-medical equipment were delivered. All rehabilitated and equipped health facilities are now fully operational delivering health services, including maternal and child care, to a caseload of up to 116,001 individuals in 94 catchment communities.

(Left photo: old health centre, right photo: reconstructed health centre)

Cantuhaon is one of the remote places in Palompon. Many individuals or patients have to travel at least 10 kilometres to go to the nearest health facility with birthing clinic. The rehabilitation and upgrade of birthing facility in Cantuhaon will give direct access for mothers to maternal health care. Collectively, five barangays will benefit the facility with a catchment population of over 5,000. **Photo: IFRC**

Table 6. No. of health facilities rehabilitated/upgraded and equipped

Province	Completed
Aklan	2
Antique	1
Capiz	5
Cebu	6
Leyte	6
Total	20

Output 6.3:

Rehabilitation and upgrading of health facilities served as the entry point of the health and care programme, with community-based disease prevention (CBDP) at the core. The 20 health facilities serve as an entry point for the programme, with people in 67 barangays targeted through the CBHFA approach.

The CBDP activities implemented include community sessions for health education; ii) household and school visits; monthly meetings with communities; coastal and upland clean-up drives; blood pressure monitoring and referral; exercise activity through Zumba, and; a feeding programme. A total of 102,930 individuals have been reached in this regard. Some 557 community health volunteers (CHVs) were mobilized to conduct house and school visits and activities, as well as facilitate community health education sessions.

A community health volunteer conducts a community session in barangay Tibiao, Altavas Municipality, Aklan Province, on health education, specifically about hypertension disease. **Photo: PRC**

Epidemic preparedness has also been emphasized as a part of CBDP programme. A pool of master facilitators on epidemic control for volunteers (ECV) was developed to support the roll out of epidemic preparedness at the community level. A total of 448 CHVs were trained across the five target provinces and were mobilized during dengue and Zika awareness campaigns to contain increasing cases of dengue. The awareness Dengue and Zika, which were organized between February to October 2016, reached more than 20,000 households the provinces of Aklan, Antique, Capiz, Cebu and Leyte through community sessions, school visits and community mobilization of destruction of mosquito breeding sites. IEC materials with key messages on dengue and Zika prevention were distributed to complement the awareness sessions in communities. These interventions, together with those by local health authorities and other actors, contributed to preventing a dengue outbreak.

With view of the disease risk profile of the country, preparedness for epidemics comprises an important part of the CBDP programme. To this end, assessments were undertaken to inform the development of epidemic preparedness response plan (EPRP) in 67 communities. This was done in close coordination with the local PRC chapters and city or municipal health offices, with the PRC chapter administrators as well as city and municipal health officers playing a key role in approving the plans. All duly completed EPRPs will be tested through simulation exercises during the first half of 2017. The simulation exercises will be supported by respective PRC chapters and results will be shared with the national headquarters to inform updating of the plans depending on needs.

Meantime, a midline assessment of the programme was undertaken, covering a total of 3,535 respondents. Results of the midline, together with testing of EPRPs, will inform updating of the community action plans. Since the Typhoon Haiyan Emergency Appeal operation is coming to an end, continuation of community-based health activities – using the CBHFA approach and including testing of EPRPs through simulation exercises – will continue under the IFRC Operational Plan for 2017.

Output 6.4:

Provision of psychosocial support has been done as an integral part of the health and care programme. In this regard, community-based psychosocial support (CBPSS) was provided in 25 communities; five communities in each in Aklan, Antique, Capiz, Cebu and Leyte. A total of 187 CHVs have been trained for CBPSS: 27 in Aklan, 38 in Antique, 40 in Capiz, 43 in Cebu, and 39 in Leyte.

The target was reduced from 60 communities to 25 communities as the result of a detailed assessments and discussions with municipal health offices. However, as part of staff health peer support sessions, team building activities for staff and volunteers were organized for all CHVs and PRC staff in all the 60 communities.

Utilizing the trained CHVs, PRC conducted a total of 189 psychoeducation sessions for 8,331 people. CBPSS

A community health volunteer visits Bulabud National High School in the municipality of Malinao, Aklan Province, to conduct psychoeducation sessions on child stress. **Photo: PRC**

focuses mainly on capacity building, awareness raising and preparedness for future disasters. PSS is imperative in helping to build the resilience and strengthening coping mechanisms among affected people in the event of disaster. Implementation of CBPSS activities is done in closely with municipal health offices.

For more details on health and care interventions, please refer to the [health and care programme highlight](#).

 National Society institutional preparedness and capacity development	
Outcome	Output
Outcome 7: The Philippine Red Cross level of preparedness for future disasters and its capacity to deliver sustainable programming and services are strengthened	Output 7.1: Increased skillsets available for the Philippine Red Cross to respond to future disasters and deliver programmes and services
	Output 7.2: Increased material capacity is available for the Philippine Red Cross to respond to future disasters, deliver programmes and services
	Output 7.3: Improved systems and processes in place for the Philippine Red Cross to respond to future disasters and deliver programmes and services
	Output 7.4: The capacity of target chapters of the Philippine Red Cross strengthened for them to respond to future disasters, deliver programmes and services

Output 7.1:

Through this appeal, IFRC has supported – and continues to support – the enhancement of skillsets among PRC personnel through on the job coaching, mentoring and targeted training. Within the sectoral programmes of the operation, various training or workshops (related to shelter, health and care, livelihoods, WASH and logistics) have been organized for PRC staff members and volunteers. This institutional learning will be transferred from the Haiyan operation to future operations as well as regular programming of PRC.

In relation to health services, IFRC supported ECV training in Tagaytay in early April 2016, in which 15 chapters of PRC – Agusan del Sur, Bohol, Bulacan, Cavite, Cotabato, Davao Oriental, Ilocos Sur, Ilocos Norte, Iloilo, Laguna, Palawan, Pangasinan, Pasay, and Quezon City – participated. The aim of the training was to enhance emergency health preparedness and response capacity of PRC by creating a pool of trainers on ECV. Those trained are now able to carry forward CBDP work into long-term programming.

As part of PRC’s preparedness for response, IFRC is supporting the RCAT 143 programme, in partnership with ICRC. The programme seeks to create specialized teams that focus on building volunteer capacity in both pre-disaster and post disaster activities. The pool of active and trained volunteers are specialized in disaster management, safety, International Humanitarian Law (IHL), social, health and blood services. IFRC has so far supported RCAT 143 in terms of organization, orientation, training and equipping of teams. The support has covered 12 chapters in Visayas (Aklan, Antique and Capiz) and Luzon (Aurora, Nueva Ecija, Bulacan, Cagayan, Isabela, Bataan, Nueva Vizcaya, La Union and Ilocos Norte). Linked to the RCAT 143 programme, training of trainers in disaster management, IHL, social and safety services was carried out between March and August 2016 for a total of 96 PRC staff and volunteers (24 for each area of specialization) across the 12 chapters.

Other support provided for PRC’s participation in various training since mid-2015 is as follows:

- IFRC supported PRC in the development of curriculum and roll-out of a management training for chapter administrators and deputy chapter administrators. Following adoption of the curriculum, the first training was held at PRC’s Subic Bay training centre in July 2015.
- In September 2016, the IFRC Country Office, together with the IFRC Bangkok Country Cluster Support Team and the Canadian Red Cross – under the Regional Resilience Initiative (RRI) – supported an integrated communication workshop for PRC departments involved in DRR and resilience programming.
- In late January 2016, IFRC supported and facilitated training on introduction to livelihoods in collaboration with the Livelihoods Reference Centre of IFRC. Some 25 PRC staff and volunteers from chapters in areas that were affected by Typhoon Haiyan participated. The training was linked to a training of trainers in livelihoods in which five staff of PRC had participated.
- In February 2016, IFRC and Australian Red Cross supported PRC to organize an urban disaster risk reduction lessons learned workshop. Participants included PRC staff and volunteers, Partner National Societies with in-country presence, government agencies (PAGASA, OCD, NDRRMC and Climate Change

Commission), the private sector – under umbrella of the Philippine Disaster Recovery Framework ([PDRF](#)) – and NGOs such as Oxfam.

- In early September 2016, IFRC facilitated an emergency response and livelihoods assessment (ERLA) training, which was co-funded by the Livelihoods Reference Centre and Spanish Red Cross. Staff and volunteers of PRC participated.
- In mid-September 2016, IFRC supported CaLP-II training for the Philippines National Cash Transfer Working Group. The training was co-funded by PRC, IFRC, ACF, OCHA and Oxfam. In addition to staff and volunteers of PRC and IFRC staff, other participants were from ACF, CONCERN, Coalition of Services of the Elderly ([COSE](#)), OCHA, OXFAM, PDRN, Save the Children, Centre for the Development of Indigenous Science and Technology ([SIKAT](#)), WFP, World Vision International, WFP and government departments (Department of Social Welfare and Development, and the Department of Trade and Industry).
- In October and November 2016, IFRC and PRC worked closely in the field testing of PASSA Youth training in Valenzuela City, Metro Manila. The training was conducted with support of PRC community based disaster risk reduction (CBDRR) project staff and Red Cross 143 volunteers. PRC and the IFRC Country Office coordinated the training with the IFRC Shelter and Settlements Coordinator for Asia Pacific and Geneva Shelter Unit.
- IFRC is supporting PRC in the roll out of a gender and diversity training of trainers. As well as ensuring linkage with PNS with experience in gender and diversity matters, the IFRC Country Office supported PRC in engaging with the Gender Cluster as well as participating in a gender-based violence training organized by IOM in September 2016 for the Camp Management and Emergency Shelter Cluster members.
- In late November 2016, PRC – with support of the IFRC County Office – hosted the regional mobile data collection (MDC) for Asia Pacific. In addition to having its personnel as participants in the training, PRC supported a practical field exercise on MDC.

Output 7.2

This Emergency Appeal is also supporting provision of equipment, vehicles and improved facilities for PRC. To this end, PRC has been provided with 20 vehicles – which have already been distributed to different chapters in disaster prone provinces – to facilitate mobility which is crucial in service delivery and monitoring. Furthermore, various emergency response units (ERUs) handed over their equipment to PRC at conclusion of deployments.

With regards to logistics, PRC has been provided with seven Rubb halls under this operation while its warehouse in Subic Bay, which is strategically positioned as a key hub for dispatch of relief items in event of disaster, has been refurbished. The rehabilitation of PRC's warehouse in Cebu will also be undertaken through the joint support of IFRC, German Red Cross and Japanese Red Cross.

PRC has also been supported to upgrade and equip other facilities including the training centre and warehouse in Subic Bay and blood centres in Ormoc and Tacloban. The equipment provided for the blood centres includes refrigerated centrifuges, serological centrifuges, autoclaves, tube sealers and strippers, blood mixers, reagent refrigerators, blood bank refrigerators and platelet incubators. The support has positioned the PRC chapters in Ormoc and Tacloban to improve their capacity for collecting blood – from donors – and providing the same to people in need.

Output 7.3:

Further to providing technical support and guidance to PRC in the implementation of relief and recovery interventions, IFRC has put deliberate focus on supporting improvement of the National systems and processes that will contribute to enabling it respond better to future disasters and to deliver in longer-term programming. In this view, IFRC has in place a disaster risk management (DRM) delegate who is embedded to the Disaster Management Services (DMS) department of PRC. The DRM delegate is working within PRC and supporting efforts aimed at enhancing the disaster preparedness, disaster response and DRR programming capacity of PRC with the view of contributing to strengthening community resilience. Among others, the DRM delegate has supported PRC in developing minimum standards for community resilience, in partnership with Finnish Red Cross, German Red Cross, Netherlands Red Cross and Spanish Red Cross.

IFRC has also supported – and continues to support – PRC in strengthening its information management (IM) capacity, including improving its operations centre. In this regard, PRC has been provided with hardware such as

laptops and mobile phones/tablets as well as software to operationalize usage of the open data kit (ODK). Furthermore, a series of sessions on geographical information systems (GIS) and IM have been carried out to facilitate skills and knowledge transfer to PRC, including by an IM delegate. Such support also includes steps towards digitalization of the vulnerability and capacity assessment (VCA). Following the end of mission of the IM delegate, support to PRC in rolling out use of the ODK tool in undertaking post-assistance and impact surveys is being provided by the in-country IFRC PMER team.

Under this operation, IFRC has also supported enhancement of the National Society’s financial systems, including through the purchase of licenses for the Microsoft Dynamics NAV enterprise resource planning (ERP) software. This system will enable PRC to record and process accounting transactions and produce prompt, accurate customized financial statements when reporting to donors thus contributing to transparency and accountability. IFRC is also supporting PRC in updating financial procedures, guidelines, manuals and policy documents.

For logistics systems and processes, the IFRC logistics team has supported PRC in developing and operationalizing warehouse management standard operating procedures (SOPs). IFRC has also supported the enhancement of PRC’s logistics management capacity through a series of five (5) logistics management trainings in year 2015 and roll-out of logistics inventory and control (LOGIC²) for stock management. LOGIC training was conducted in September 2015 for staff of four main PRC warehouses and six PRC national headquarters staff. Following the training, staff of the four main warehouses is using the system for data management and transactions. Moreover, procurement training was organized in late November 2016 for relevant staff of PRC national headquarters and chapters in Luzon.

IFRC is also supporting PRC in strengthening its community engagement and accountability (CEA) capacity. This support is provided through the IFRC Asia Pacific Regional Office (APRO) and focuses on improving CEA processes in communities that PRC is implementing recovery programmes. Building on the well-established practice of working with barangay recovery committees (BARECOM), a more systematic and coordinated approach has been adopted to institutionalize CEA processes and practices throughout PRC’s programmes, operations and services at all levels of the organization.

Output 7.4:

The support provided under Outputs 7.1, 7.2 and 7.3 has not been limited to the national headquarters level but also extended to PRC chapters, especially in areas that were affected by Typhoon Haiyan. PRC chapters have been – and are being – supported to improve skillsets among their personnel, material capacity and systems or and processes so as to enhance their service delivery capacities. All chapters within IFRC operational areas have been provided with essential office supplies and equipment. Furthermore, the Aklan and Capiz chapters have been supported to refurbish their office buildings.

As mentioned under Output 7.2, IFRC is supporting the RCAT 143 programme, which includes equipping of teams at the chapter level. Equipment has been provided to the 12 chapters in Visayas (Aklan, Antique and Capiz) and Luzon (Aurora, Nueva Ecija, Bulacan, Cagayan, Isabela, Bataan, Nueva Vizcaya, La Union and Ilocos Norte).

The equipment for RCAT 143 includes vests, t-shirts, raincoats, flood boots, leather gloves, portable radios, collapsible tables, benches, canopy tents, stretchers, long spine boards, rescue cans, cardiopulmonary resuscitation mannequins, rescue vests, plastic storage boxes, first-aid jump kits, helmets, cot beds, foldable chairs, emergency lights, solar chargers, and megaphones. With all the hardware and national level-training now complete, training at chapter level will be rolled out in 2017. Since this Emergency Appeal operation is closing soon, the remaining activities of the RCAT 143 programme will continue under the IFRC Operational Plan for 2017.

 Community preparedness and risk reduction	
Outcome	Output
Outcome 8: Community resilience to disasters is enhanced	Output 8.1: Risk reduction measures are incorporated in disaster recovery programmes
	Output 8.2: People from target barangays across five chapters are trained as first responders
	Output 8.3: Community-based multi-hazard contingency plans are developed and pre-tested
	Output 8.4: Legal frameworks for disaster risk reduction, preparedness and response are strengthened.

² A software solution to manage goods from the moment they are identified in the logistics pipeline until they are received at distribution point.

Output 8.1:

Risk reduction is incorporated across different sector interventions, including shelter, water and sanitation, health and livelihoods. Construction of shelter, health and water and sanitation facilities is designed to be disaster resilient, and situated in areas that are not prone to disasters. DRR measures are also incorporated in the community-managed livelihood projects. For example, mangrove regeneration will not only bolster economic activity through an increased catch of fish, shrimp, molluscs and other marine life, but prevent coastal erosion and flooding as well. The mangrove will also help to protect coastal shorelines by acting as a buffer against waves and storms as well as prevent erosion, while providing shelter and safe breeding grounds for marine life as well.

Another disaster mitigation measure supported by this operation is establishment of a marine sanctuary in Antique to spur coral growth. Corals will not only provide habitat to marine life but also serve as a natural barrier to protect the coastal areas from the impact of big waves during storms or typhoons.

Concrete blocks were submerged within the marine sanctuary in Antique. This blocks would serve as temporary shelter for marine life while corals are still recovering to grow. **Photo: Maryjoy Evalarosa/IFRC**

Output 8.2 and Output 8.3:

In support of improving community resilience, a school and community-based disaster risk management (CBDRM) project is being implemented in rural areas of Aklan and Antique provinces and one urban area of Metro Manila. The project is on its 15th month of implementation and is a pilot for PRC's DRM framework which aims to cover 15 communities (three in Metro Manila and 12 in rural Visayas) over two years. Under the project, PRC is focusing on supporting community capacity to mitigate and prevent risks or to increase the capacity of most vulnerable communities to cope with, respond to, and recover from the impacts of disaster.

One of the main goals of PRC, through the project, is to boost the recruitment and training of Red Cross 143 volunteers as agents for resilience in their communities. During 2016, PRC established project teams at the chapter level, who reached target communities with activities in risk knowledge, VCA, early warning system (EWS), disaster preparedness for response, mitigating identified risk.

Since this Emergency Appeal operation is closing soon, implementation of CBDRM activities will continue under the IFRC Operational Plan for 2017.

Output 8.4:

The disaster law project of PRC was launched in early 2016. The main objectives of the project are: to build the capacity of PRC staff and volunteers on international disaster law, and; to enhance the unique role of PRC within the NDRRMC structure, from barangay level to national government level. Some of the main activities covered under this project since its kick-off are: training and capacity building for PRC staff across all services on disaster law; peer-to-peer exchanges with other National Societies in the region, and; development of IEC materials to support the disaster law training. PRC's disaster risk management programmes are anchored to the government's disaster risk reduction and management programmes, such as DRR (mitigation and prevention), disaster preparedness, disaster response, and disaster rehabilitation and recovery.

In mid-August 2016, IFRC organized a disaster law training workshop in Mandaluyong City. Heads of several PRC departments and chapter administrators participated. The training aimed to equip PRC staff with skills to support disaster law advocacy and outreach efforts, and to ensure the positioning of PRC on disaster law issues.

More information about the disaster law programme, including tools such as the '[guidelines for the domestic facilitation and regulation of international disaster relief and initial recovery assistance](#)' (also known as the IDRL guidelines) and the '[model act on international disaster assistance](#)' is available at: www.ifrc.org/dl.

Looking ahead

Programmatic implementation under this operation has, by large, been completed. However, there is a substantial amount of pending bills and outstanding National Society working advance still to be settled. It is for this reason that the operation timeframe has been extended for three months, for it to be closed on 31 March 2017. During the extension period, no new commitments will be made but instead implementation will wind up. The only pending major activity is final evaluation of the operation, which will be undertaken in the course of March.

From the start of this operation, IFRC committed that this operation would aim to leave a legacy of safer communities and a stronger National Society. Moving ahead, IFRC and PRC have undertaken exit, transition and sustainability planning guided by, but not limited to, the following principles:

- Honour commitments to communities and other stakeholders (local government, donors, etc.)
- Ensure that all relevant stakeholders are well informed about the IFRC country office plans
- Leave no liabilities to the partners
- Ensure that organizational learning is captured, shared and integrated into policies and future operations.
- Where necessary, continue to advocate on issues which cause or increase vulnerability within the communities being assisted.

Building on its current strategic plan as well as the achievements, best practices and lessons of the Typhoon Haiyan operation, PRC has developed its new strategic framework – Strategic Plan 2017-2021 – which will guide the work of the National Society over the next five years. IFRC has supported PRC in developing the Strategy and will continue longer-term support to the National Society under the Operational Plan 2017 for Philippines. Continuation of such activities under the Operational Plan 2017 will enable the linking of relief, recovery and development and conformity with the IFRC Governing Board recommendation that at least 10 percent of funds mobilized through an Emergency Appeal be dedicated for disaster risk reduction and preparedness measures.

Specific details, including the actual balance for transfer to the Operational Plan 2017, will be provided in the final report, which will be issued by 30 June 2017. In the meantime, donors who have any immediate queries or clarification about the projected reallocation may contact the [IFRC Asia Pacific Regional Office](#).

How we work

All IFRC assistance seeks to adhere to the **Code of Conduct** for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGO's) in Disaster Relief and the **Humanitarian Charter and Minimum Standards in Humanitarian Response (Sphere)** in delivering assistance to the most vulnerable. The IFRC's vision is to inspire, **encourage, facilitate and promote at all times all forms of humanitarian activities** by National Societies, with a view to **preventing and alleviating human suffering**, and thereby contributing to the maintenance and promotion of human dignity and peace in the world.

The IFRC's work is guided by Strategy 2020 which puts forward three strategic aims:

Save lives.
protect livelihoods,
and strengthen recovery
from disaster and crises.

Enable **healthy**
and **safe** living.

Promote **social inclusion**
and a culture of
non-violence and peace.
