

# Emergency Plan of Action (EPoA) Belarus: Floods

<b>DREF Operation n° MDRBY008</b>	<b>Glide n° FL-2018-00034_BLR</b>
<b>Date of issue:</b> 29 March 2018	<b>Expected timeframe:</b> 4 months <b>Expected end date:</b> 28 July 2018
<b>Category allocated to the of the disaster or crisis:</b> orange	
<b>DREF allocated:</b> CHF 199,379	
<b>Total number of people affected:</b> 50,000	<b>Number of people to be assisted:</b> 7,500
<b>Host National Society presence:</b> Belarus Red Cross (BRC) with 256 volunteers, 58 staff members, 6 regional branches	

## A. Situation analysis

### Description of the disaster

On 15 March 2018, a meeting of the Emergency Situations Commission of the Republic of Belarus was held to discuss the coming spring floods in Belarus.

The meeting was facilitated by the Deputy Prime Minister of the Republic of Belarus. The Belarus Red Cross participated in the meeting, where the leaders of the country asked the BRC to mobilise staff, volunteers and funds to support the affected population. The Emergency Situations Commission stated that the analysis of the hydrometeorological conditions has shown that in 43 districts the territory of 140 villages and towns and 36 gardeners' partnerships will suffer from flooding. Moreover, some elements of transport infrastructure (70 road segments and 15 bridges) and dwelling houses (including 6,608 garden cottages) can be affected.

On 19 March, floods were reported by the Belarusian authorities, local media and Belarus Red Cross (BRC) branches, with 316 houses reported to be flooded in three regions of the country. According to information provided by hydro-meteorological agencies, rapidly-increasing volumes of water are observed across the entire country. The rise of water levels amounts to 10–200 cm per day, depending on the district.

The Ministry of Emergencies predicts that 140 villages and towns and 36 gardeners' partnerships will be affected by floods in a total of 43 districts. In addition, 70 road segments and 15 bridges, and at least 6,600 garden cottages are estimated to be flooded in the next two weeks. The water level of rivers is rising, with ice still covering the rivers Western Dvina, Dniepr, Berezina, Sozh, as well as the Vileiskoe, Chigirinskoe, Zaslavskoe, Soligorskoe, Krasnaya Sloboda water storages, and the lakes Drivyaty, Naroch, Chervonoe. With the melting of ice, significant increases of water levels are expected. Snow is still on the ground in some districts, reaching up to 20 cm. As of 21 March, it was also snowing, which has further worsened the situation with thawing. The daily water-level fluctuation in the rivers is on average 12 cm. In many rivers, the level of water is already above bottom land. Rivers Pripyat, Sluch and Ubort will reach the crucial level of water within a few days. The most critical areas are the ones near village Chernichi, in Gomel region. 1,356 houses are fully or partially flooded.

Hydrological regime of rivers in Belarus, as of 16 March 2018

Because of precipitations and land overwatering since December 2017 there was a high water level in rivers. In January-February rapid diurnal water variations determined by ice jam were noted. The water level of river was higher than usual for the season: high marks in the Sozh and Pripyat basins were recorded, the water levels approached dangerous marks on the Neman and the Dnieper, some parts of Pripyat and its tributaries. The water broke and flooded on the fields on the Neman River near the village of Belitsa, the Dnieper River - Rechitsa and the town of Loev, the Svisloch River - near the village of Terebuty, the Pripyat River - near the village of Chernichi, Mozyr and Narovlya, its tributaries Styr, Sluch, Ubort, Ptich.

While breaking up of the ice of rivers, forming of small meshes and ice jam on narrow sections of river beds and in areas of bridge structures is still possible. It can cause the deterioration of the hydrological situation and lead to an increase of water level and flooding. Humanitarian support, transportation, psychosocial support are much needed.

Consequent to the floods and ice flow, a pontoon crossing which had been previously prepared to replace the broken bridge across Pripyat river, has broken down. The bridge was the main transport corridor connecting the central and southern part of Belarus through the highway P-88 Zhitkovichi - David Gorodok - the villages of Chernici in the Zhitkovichi District. The Ministry of Emergencies and the Ministry of Defense provide boats to organise transportation of citizens. It is currently not possible to re-install the pontoon because of slob ice and rising water levels.

## **Summary of the current response**

### **Overview of Host National Society**

At present, disaster response teams are deployed to assess the needs of the population. In March–April 2018, a total of 7,500 people (2,000 households, 3,75 persons per household in average) will receive relief assistance and psychosocial support (PSS). Emergency response teams of BRC are also involved in supporting to the population at the Pripyat river crossing (since the beginning of February already). Support in the damaged bridge area is provided to 3,468 people (heating tents). Belarus RC has distributed food parcels<sup>1</sup> (one parcel per person per two days), drinking water, bed linen, blankets, candles and hygiene kits. 1,728 people in total received assistance (some of them received only water, some – only candles, etc. – depending on their needs). 56 volunteers were deployed so far.

### **Overview of Red Cross Red Crescent Movement in country**

Since December 2017, Belarus RC with the support of Danish RC has been implementing a set of measures to assist the population, which was affected by unfavourable winter weather. EUR 40,000 allocated by Danish RC has been partly used to help those affected by the floods. The funds of the Danish RC are fully used by as of 15 March. The funds were used to purchase food parcels and distribute hot meals, to provide PSS to the people affected by unfavourable winter weather, to pay for fuel so that the disaster response teams could go to the field and assist people in need.

The IFRC Office in Belarus is cooperating closely with the National Society's leadership and disaster management team at headquarters level in assessing the needs and the response to the evolving floods situation.

### **Overview of non-RCRC actors in country**

The overall coordination of the response to and preparedness for floods rests with the Ministry of Emergencies. The Ministry's emergency units are currently pumping water out from flooded roads. The Ministry also seeks assistance from Belarus Red Cross for organising search and rescue and monitoring activities in the flooded area, and for organising delivery of humanitarian aid to the flooded areas (with boats up to 1,000 kg capacity), which are currently missing in Belarus Red Cross.

The Ministry of Emergencies supports the involvement of specially trained volunteers in water search and rescue activities of the missing people. Red Cross regional branches have been informed accordingly. Belarus Red Cross is participating in the regional steering committees on preparedness and response to floods, which enables the National Society to monitor closely the situation at local level and respond when required. The Ministry of Emergencies and its departments provide the National Society with hands-on information on the evolving situation and the needs of the people.

---

<sup>1</sup> The food parcel consists of canned meat - 2 pcs, canned porridge with meat - 1 pcs, biscuits - 5 pcs, canned porridge - 1 pcs, energy bar - 3 pcs, canned vegetables - 2 pcs. The hygiene kit consists of disinfectant - 1 pcs, tablets for cleaning technical water - 5 pcs, soft soap - 1 pcs, toilet paper - 10 packs, sanitary pads - 1 pcs). Drinking water is provided at a rate of 20 litres per person per day.

## Needs analysis, targeting, scenario planning and risk assessment

Currently, around 3,000 people are already affected and around 50,000 people are at-risk for being affected by the forthcoming spring floods as a result of the snow thaw. Out of these, 7,500 people are estimated as the most vulnerable, whose access to appropriate hygiene and food is of concern. The estimation is based on the previous experience of the Red Cross branches and on the estimated number of older people living alone, disabled and other most vulnerable people residing in the flood-risk areas. People who are the most at risk will have an urgent need for warm blankets, food and hygiene support and psycho-social support.

For people in the affected areas, winter floods became an unexpected and unpleasant emergency. In some areas the village houses are still damaged, but now new floods are coming. Thus, staff and volunteers of Belarus RC developed an action to ensure psychosocial support to those affected. People do not want to leave their flooded households for fear of looting, but at the same time they fear that the level of water will still rise. Therefore, psychosocial support is a basic need of the affected population PSS will help to soften the psychosocial effect on the population with the flooded houses.

Assessment of needs of those affected by winter floods earlier in the end of January and in February was conducted by Belarus Red Cross on 5 February 2018. The key findings revealed that the population of the southern regions of Belarus was not ready for the floods and rise of water level in the rivers. Families (especially those with older people) have a low level of income in the rural area and these people are not provided with essential items. Being distressed, people cannot properly assess the situation and be ready for the rise of water level in the rivers. Another concern is that people are not ready to leave their houses but are rather risking their health or even life. Despite this, the Ministry of Emergencies and Belarus Red Cross are ready for the evacuation of people.

According to the analysis of the hydrometeorological situation, it is expected that 7,500 people will need support from Belarus Red Cross.

**Table 1.** Targeted beneficiaries by region, based on the results of the needs assessment

Region	Belarus RC branch	Needs in drinking water	Needs in food parcels	Needs in hygiene kits	Needs in bags for sand	Needs in bed linen	Needs in blankets	Number of beneficiaries
Brest	Brest regional branch of BRC	8,000 l	2,000	2,000	5,000	200	200	2,000 people
Gomel	Gomel regional branch of BRC	8,000 l	2,000	2,000	8,000	200	200	2,000 people
Grodno	Grodno regional branch of BRC	2,000 l	500	500	1,000	50	50	500 people
Minsk	Minsk regional branch of BRC	4,000 l	1,000	1,000	2,000	200	200	1,000 people
Mogilev	Mogilev regional branch of BRC	4,000 l	1000	1000	2000	200	200	1,000 people
Vitebsk	Vitebsk regional branch of BRC	4,000 l	1000	1000	2000	150	150	1,000 people
	Total	30,000 l	7 500	7 500	20 000	1000	1000	7,500

Following the needs assessment, the role of Belarus Red Cross has been defined as:

- provision of goods of primary necessity to the affected population;
- provision of psychosocial support to the affected population;
- monitoring of the situation in the flooded area together with the Ministry of Emergency, especially in the districts where people refuse to leave their houses;
- delivery of food and drinking water to the flooded areas in case the road system is damaged.

The following most vulnerable categories of beneficiaries will be supported: older people, disabled people, families with many children.

To provide effective response at all levels, BRC water search and rescue teams have need of the following items:

- two inflatable motor boats with compressor for evacuation, search & rescue and distribution of relief items;
- bags for sand and waterproof bags to assist the local population in resisting water and saving personal belongings;
- rubber boots / waders and lifejackets for Belarus Red Cross emergency teams.<sup>2</sup>

The needs of the 7,500 most vulnerable people, affected by floods, are identified by Belarus Red Cross as:

- 7,500 complementary food parcels (canned meat and fish, cereals, crisp bread, bottled drinking water, chocolate, etc.);
- 7,500 complementary hygiene kits (soap, disinfectants, napkins, etc.);
- 1,000 blankets;
- 300 blankets for replenishment;
- 1,000 sets of bed linen.

## B. Operational strategy

### Overall operational objective

**The operation aims to provide immediate assistance to cover needs of 7,500 people most at risk and affected by floods by ensuring life-saving assistance and psychosocial support over four months of 2018. This operation is expected to be implemented over four months and will therefore be completed by July 2018.**

The operation will be coordinated by Belarus Red Cross HQ disaster response department and branch chairpersons in their areas of responsibility. Red Cross volunteers will implement the delivery of the emergency assistance.

RDRT deployment will be necessary within two weeks after DREF approval to support Belarus RC in operation logistics. Key staff of Belarus RC will be providing assistance to the affected population, thus technical support is needed to develop terms of reference for purchases within the operation, and technical support during the tendering procedure is required, as well. RDRT specialists will also be needed to develop the most efficient ways of delivery of humanitarian aid to the affected districts.

Volunteers during PSS sessions can also explain that staying in the flooded houses can be dangerous and that it is better to be evacuated. They will explain about possible danger without causing additional panic among the affected population. In any case, the level of stress after PSS provided will be lower, there will be no complications to the psychological state of people and there will be less cases of the acute state. However, current capacity of Belarus RC in PSS is not enough. People who assist those affected by the floods, should have certain skills of supportive communication, so to not provoke a panic or anxiety disorder or other violations. In case volunteers and staff are not prepared to deliver assistance to the affected population, they might face burnout themselves, as well as make the state of the affected persons even worse. National PSS team of Belarus RC is planning to conduct ten training sessions for 145 people from all six regions of the country within two weeks. The trainings will cover both staff and volunteers. The trainings will help to prepare PSS volunteers to work in all the flooded areas (43 districts).

---

<sup>2</sup> Based on the framework agreement between the Ministry and BRC are cooperating in disaster management and tracing, search and rescue activities. The Ministry has requested the BRC to help the search and rescue, flood monitoring and evacuation of the affected people and the delivery of humanitarian supplies by boats.

## C. Detailed Operational Plan

### Shelter

People targeted: 1,300

Male: 40%

Female: 60%

Requirements (19,300 CHF)

**Needs analysis:** Currently, around 3,000 people are already affected and around 50,000 people are at risk for being affected by the forthcoming spring floods as a result of the snow thaw. Families (especially those with older people) have a low level of income in the rural area and these people are not provided with essential items. Being distressed, people cannot properly assess the situation and be ready for the rise of water level in the rivers. Another concern is that people are not ready to leave their houses, placing their health or even life at risk. At the same time, the state rescue system is rather efficient and capable of saving people in life-threatening situations.

**Population to be assisted:** 1,000 people are estimated to be the most vulnerable, whose access to appropriate shelter needs is of a concern (some are evacuated, and others' property is severely damaged.) Belarus Red Cross will distribute 1,000 blankets 1,000 sets of bed linen amongst them. 300 blankets distributed from the BRC stocks will be replenished, these items were distributed as an initial response from the BRCS stocks. Therefore, the total number of people receiving shelter assistance is 1,300 people.

P&B Output Code	Shelter Outcome 1: Communities in disaster and crisis affected areas restore and strengthen their safety, well-being and longer-term recovery through shelter and settlement solutions																	
	Shelter Output 1.1: Short, medium and long-term shelter and settlement assistance is provided to affected households												# of people reached with blankets and bed linen (1,000)					
	Activities planned Week	1	2	3	4	5	6	7	8	9	10	11	12					
AP005	Local procurement of emergency items and prepositioning at Belarus Red Cross central and regional warehouses			x	x	x	x											
AP005	Prepositioning of procured materials close to the affected areas			x	x	x	x											
AP005	Coordination with local emergency departments and local authorities			x	x	x	x	x	x	x								
AP005	Replenishment of the 300 blankets distributed from BRC stock			x	x	x												
AP005	Blanket and bed linen distributions			x	x	x	x	x	x	x								
AP005	Monitoring of procurement and supply chain, reporting			x	x	x	x	x	x	x	x							

## Livelihoods and basic needs

People targeted: 7,500

Male: 40%

Female: 60%

Requirements (75,800 CHF)

**Needs analysis:** Currently around 3,000 people are already affected and around 50,000 people are at risk for being affected by the forthcoming spring floods as a result of the snow thaw. Families (especially those with older people) have a low level of income in the rural area and these people are not provided with essential items. Being distressed, people cannot properly assess the situation and be ready for the rise of water level in the rivers. Another concern is that people are not ready to leave their houses, placing their health or even life at risk. At the same time, the state rescue system is rather efficient and capable of saving people in life-threatening situations.

**Population to be assisted:** 7,500 people are estimated to be the most vulnerable, whose access to basic food items is of a concern. Belarus Red Cross will distribute 7,500 complementary food parcels (canned meat and fish, cereals, crisp bread, bottled drinking water, chocolate).

P&B Output Code	Livelihoods and basic needs Outcome 1: Communities, especially in disaster and crisis affected areas, restore and strengthen their livelihoods																	
	Livelihoods and basic needs Output 1.1: Basic needs assistance for livelihoods security including food is provided to the most affected communities												# of people reached with food parcels (7,500)					
	Activities planned Week	1	2	3	4	5	6	7	8	9	10	11	12					
AP008	Local procurement of food items and prepositioning at Belarus Red Cross central and regional warehouses			x	x	x	x											
AP008	Prepositioning of procured materials close to the affected areas			x	x	x	x											
AP008	Coordination with local emergency departments and local authorities			x	x	x	x	x	x	x								
AP008	Food parcel distribution			x	x	x	x	x	x	x								
AP008	Monitoring of procurement and supply chain, reporting			x	x	x	x	x	x	x	x							

## Water, sanitation and hygiene

People targeted: 7,500

Male: 40%

Female: 60%

Requirements (41,700 CHF)

**Needs analysis:** Currently around 3,000 people are already affected and around 50,000 people are at risk for being affected by the forthcoming spring floods as a result of the snow thaw. Families (especially those with older people) have a low level of income in the rural area and these people are not provided with essential items. Being distressed, people cannot properly assess the situation and be ready for the rise of water level in the rivers. Another concern is that people are not ready to leave their houses, placing their health or even life at risk. At the same time, the state rescue system is rather efficient and capable of saving people in life-threatening situations.

**Population to be assisted:** 7,500 people are estimated to be the most vulnerable, whose hygiene situation is of a concern. Belarus Red Cross will distribute 7,500 complementary hygiene kits (soap, disinfectants, napkins).

P&B Output Code	WASH Outcome1: Immediate reduction in risk of waterborne and water related diseases in targeted communities																
	WASH Output 1.1: Continuous assessment of water, sanitation, and hygiene situation is carried out in targeted communities												# of people provided with hygiene monitoring measures (7,500)				
	Activities planned Week	1	2	3	4	5	6	7	8	9	10	11	12				
AP026	Continuously monitor the water, sanitation and hygiene situation in targeted communities			x	x	x	x	x	x	x							
P&B Output Code	WASH Output 1.2: Daily access to safe water which meets Sphere and WHO standards in terms of quantity and quality is provided to target population												# of people provided with safe water (according to WHO standards) (7,500)				
		Activities planned Week	1	2	3	4	5	6	7	8	9	10	11	12			
AP026	Provide safe water to 7,500 people in targeted communities through distribution of bottled water.			x	x	x	x	x	x	x							
P&B Output Code	WASH Output 1.5: Hygiene-related goods (NFIs) which meet Sphere standards and training on how to use those goods is provided to the target population												# of households provided with a set of essential hygiene items (7,500)				
		Activities planned Week	1	2	3	4	5	6	7	8	9	10	11	12			
AP030	Determine the needs for hygiene NFIs, including soap, water storage, and menstrual hygiene for each community based on health risks and user preference in targeted communities in coordination with the WASH group or cluster			x	x	x											
AP030	Distribute hygiene kits, sufficient for 1 month			x	x	x	x	x	x	x							

AP030	Monitor use of hygiene kits and water treatment products and beneficiary satisfaction through household surveys and household water quality tests.			x	x	x	x	x	x	x	x

## Health

**People targeted:**

Male:

Female:

**Requirements (10,200 CHF)**

**Needs analysis:** Currently around 3,000 people are already affected and around 50,000 people are at risk for being affected by the forthcoming spring floods as a result of the snow thaw. Families (especially those with older people) have a low level of income in the rural area and these people are not provided with essential items. Being distressed, people cannot properly assess the situation and be ready for the rise of water level in the rivers. Another concern is that people are not ready to leave their houses, placing their health or even life at risk. At the same time, the state rescue system is rather efficient and capable of saving people in life-threatening situations. At the same time, given that these people have low income, and the floods are causing damages to their properties, this is resulting in increased level of stress and anxiety.

**Population to be assisted:** 7,500 people are estimated to be the most vulnerable, and they will receive PSS support. For this staff of the BRC branches and volunteers will receive PSS training.

P&B Output Code	Health Outcome 1: The immediate risks to the health of affected populations are reduced																
	Health Output 1.5: Psychosocial support provided to the target population															# of volunteers will be provided with PSS (42); # of staff in branched will be provided with PSS (105)	
	Activities planned Week	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

## How we work

All IFRC assistance seeks to adhere to the [Code of Conduct](#) for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGOs) in Disaster Relief and the [Humanitarian Charter and Minimum Standards in Humanitarian Response \(Sphere\)](#) in delivering assistance to the most vulnerable. The IFRC's vision is to inspire, **encourage, facilitate and promote at all times all forms of humanitarian activities** by National Societies, with a view to **preventing and alleviating human suffering**, and thereby contributing to the maintenance and promotion of human dignity and peace in the world.

The IFRC's work is guided by Strategy 2020 which puts forward three strategic aims:

**Save lives.**  
protect livelihoods,  
and strengthen recovery  
from disaster and crises.

Enable **healthy**  
and **safe** living.

Promote **social inclusion**  
and a culture of  
**non-violence** and **peace**.
