# Emergency Plan of Action (EPoA)

## Vietnam: Floods

 International Federation  
of Red Cross and Red Crescent Societies

<b>DREF n° MDRVN018</b>	<b>Glide n° <a href="#">FL-2019-000092-VNM</a></b>
<b>For DREF; Date of issue:</b> 16 August 2019	<b>Expected timeframe:</b> 3 months <b>Expected end date:</b> 16 November 2019
<b>Category allocated to the of the disaster or crisis:</b> Yellow	
<b>DREF allocated:</b> CHF 299,608	
<b>Total number of people affected:</b> 127,280	<b>Number of people to be assisted:</b> 18,100
<b>Host National Society(ies) presence (n° of volunteers, staff, branches):</b> Viet Nam Red Cross Society (VNRC) is one of the leading humanitarian actors in Vietnam. It has over four million members and boasts a network of branches in all 63 provinces and major cities down to district and commune levels, with 425,776 Red Cross volunteers registered. It has at least 15,000 staff, of which around 220 are at the headquarters and the rest in the branches. There is one national disaster response team (NDRT) and 31 provincial disaster response teams (PDRT) located in disaster-prone provinces to enhance timely response in the event of emergencies.	
<b>Red Cross Red Crescent Movement partners actively involved in the operation:</b> At present, no other Movement partner has confirmed bi-lateral support to the National Society.	
<b>Other partner organizations actively involved in the operation:</b> The National Committee for Disaster Prevention and Control (NCDPC), People's Aid Coordinating Committee (PACCOM), UN agencies, NGOs and private sectors are also assessing the situation and start dispatching their in-kind support to affected provinces.	

## A. Situation analysis

### Description of the disaster

Several provinces in the center, central highlands and south of Vietnam have been impacted by floods following torrential rain over a number of days. The worst affected provinces are Kien Giang followed by Lam Dong, Dak Lak and Dac Nong. Other provinces affected include Gia Lai, Kon Tum, Dong Nai, Binh Thuan and Binh Phuoc. (Click [here](#) for the map of affected areas)

According to a recent report issued by the National Steering Committee for Natural Disaster Prevention and Control (NCDPC), there have been 11 deaths, one (1) missing, five (5) people injured and over 1,985 people evacuated. In total 12,307 houses have been flooded. In addition, households have lost livestock, gardens and other assets.

A man gathers his belongings in the middle of chest-deep water on Phu Quoc Island off the southern province of Kien Giang on 10 August 2019. (Photo: VNRC/ Tuoi Tre)

Flooding of the Cam Ly river in Lam Dong peaked on the evening of 8 August 2019 at 834.25m, exceeding all previous records by 0.28m. While the river level dropped slightly to 830.41m on the following day, it remains at dangerous levels. Flooding of the Dong Nai river at peaked on 9 August 2019 at 114.10m.

Due to the influence of the southwest monsoon, on 11 August 2019, in the central highlands and in the southern provinces, it has continued raining, in some places with heavy and scattered rain with thunderstorms (popular rainfall 10-30mm / 24h, with place on 50mm / 24h); particularly, Dak Nong, Lam Dong, Binh Phuoc and Dong Nai provinces have heavy rain (rainfall of 30-60mm / 24h). From 12 August 2019, rain in the central highlands and southern regions tends to decrease. Current figures numbering those affected and damage to property in nine provinces are as follows:

Description	Gia Lai	Dak Lak	Dac Nong	Lam Dong	Kon Tum	Dong Nai	Kien Giang	Binh Phuoc	Binh Thuan	Total

Source: National Steering Committee for Natural Disasters Prevention and Control and the Red Cross Chapters, 11 August 2019.

Initial needs assessments indicate that people have experienced damage to their houses and crops as well as household items and livelihood assets. Households urgently need assistance to meet their immediate needs which includes food, water, recovery shelter materials and the replacement of assets.

## Summary of the current response

### Overview of Host National Society

Close coordination between the VNRC and its government counterparts is assured through the National Society's presence in the National Steering Committee on Natural Disaster Prevention and Control.

VNRC has been closely monitoring the flood situation with local counterparts. At the branch level, the national society has been active in assisting with the dissemination of early warnings and evacuations. VNRC immediately released emergency aid, including cash assistance (CHF 11,000) and essential household items, including 400 household kits, 1,200 boxes of water purification sacks and 1,500 health risk and hygiene promotion leaflets, 20 water ceramic filters. These supports are given to the severely affected by flooding: provinces of Dak Lak, Dak Nong, Kien Giang, Lam Dong and Dong Nai. As of 13 August 2019, at least 800 affected households (3,200 people) have been assisted by staff and volunteers with emergency cash, household items and food items as well as water purification powder sachets.

National Disaster Response Teams (NDRTs) were deployed to the affected provinces of Dak Lak, Dak Nong, Lam Dong, Dong Nai and Kien Giang to assist the local chapters to immediately respond to the floods and conduct the needs assessment. Thousands of volunteers and staff from local chapters participated in the evacuation of people to safer places especially in Phu Quoc Island, Kien Giang province. The evacuation has been well coordinated with local authorities to prepare for emergency response. These teams have also been actively involved in needs assessments and relief distribution. In addition, local Red Cross chapters have mobilised staff and volunteers to join the local authorities and department of health to conduct disease prevention and hygiene promotion sessions and distributing leaflets.

The VNRC disaster preparedness capacity also has allowed the National Society to provide timely assistance in the form of household kits, in cash distributions to beneficiaries. Apart from the government, the VNRC has been among the very first to respond to this flood situation.

On the ground, the local Red Cross chapter have used their own funds to provide some free meals for people being evacuated (in Phu Quoc Island, Kien Giang province), cash as well as food items including instant noodles and rice (in other provinces).

VNRC continues to collect information on the damages, needs and gaps, and welcomes any support or contributions to help in the mitigation of and response to the current situation. Two assessment teams have been sent out to the field for the emergency relief operation and need assessment in Dak Lak, Dak Nong and Lam Dong provinces.

VNRC staff are assisting an affected household to dry books and documents in Dak Lak province. (Photo: VNRC)

VNRC VP-SG visited affected households in Dak Lak province. (Photo: VNRC)

Further to this, they have mobilized 400 household kits and water purification powder from their warehouse in Da Nang which will be distributed in four provinces. They are also in the process of mobilizing a further 2,500 household kits from their central warehouse in Ha Noi for pre-positioning in the Da Nang warehouse, the representative office in Ho Chi Minh City as well as the Lao Cai warehouse. The International Federation of Red Cross and Red Crescent Societies (IFRC) Country Cluster Support Team (CCST) in Bangkok is working closely with the National Society to monitor the situation and assess support requirements.

#### **Overview of Red Cross Red Crescent Movement in country**

The IFRC Community Safety and Resilience Manager from CCST Bangkok has been coordinating and working closely with VNRC, providing support to the National Society for updating the information and monitoring the situation remotely.

VNRC has been actively sharing information with three Partner National Societies in Vietnam, including American Red Cross, German Red Cross and Swiss Red Cross, but none of the PNS are providing assistance for this operation at time of reporting.

#### **Overview of non-RCRC actors in country**

The National Steering Committee for Disaster Prevention and Control has been closely monitoring and supporting the People's Committee of Dak Nong Province and the Ministry of Industry and Trade to implement necessary measures to ensure safety for the works and downstream hydropower plant namely Dak Kar in Dak Nong province. Similar measures have been in place in Phu Quoc Island of Kien Giang province to ensure safety for local people and tourists.

The National Center for Hydrometeorological Forecasting has been regularly providing forecasts and warnings for directing and responding; Vietnam Television, Radio Voice of Vietnam and the mass media agencies at the central and local levels continue to provide information and communication on natural disasters, the direction and overcoming of consequences.

VNRC is a member of the UN Humanitarian Country Team and sits on the Cash Working Group as well as convening the inter-agency Shelter Cluster. VNRC has been informally sharing information with these groups as requested. In addition to that, VNRC has close relationships with members of the local corporate sector including The Coca-Cola Company, Procter & Gamble and CP group, who have provided some in-kind assistance including fresh water-bottles and food items.

### **Needs analysis, targeting, scenario planning and risk assessment**

#### **Needs analysis**

Over 12,000 houses have been destroyed and inundated. Thousands of hectares of rice and other crops have been damaged. Based on the initial data collected, the main impacts of the disaster have been to shelter, household items and livelihoods. In response, VNRC has been distributing emergency cash, household items (household kits), water purification tablets (WPTs) and mobilizing volunteers for evacuating people to higher ground and conducting disease prevention and hygiene promotion sessions as well as cleaning up the environment.

Damages to shelter and belongings are reported the most crucial. In response to the shelter needs, the local government has released funds and mobilized contributions from private sectors in the province to provide shelter materials for those lost or damaged. The support from the government varies depending on the level of damage. VNRC continues to coordinate with the partners on the ground to complement initial cover of the shelter needs, with a focus on the provision of basic household items and unconditional cash grants to enable affected families to cover for their basic needs.

According to the latest assessment reports from the field that there is no initial major threat to disease outbreaks in most of the affected areas. As the flood waters are already receding a large proportion of those affected have returned to their homes and are able to access household latrines. Those whose houses have been completely or partially damaged are either sheltering with family or in government shelters and schools with access to adequate sanitation facilities for the short-term. Their long-term sanitation needs, in terms of reconstruction of damaged latrines, will be supported by the Government grants for households who have lost their houses. Furthermore, the Ministry of Health (MoH) has mobilized health workers and staff from local health clinics and hospitals in the affected areas to clean up the environment and remove all potential mosquito breeding places. In the meantime, health and hygiene education and awareness sessions have and will continue to be carried out in the affected areas.

However, due to cumulative rainfall in the past few days, Cam Ly dumpsite in Da Lat, Lam Dong province which was sitting on top of a hill collapsed and was swept away down the stream, impacting water source and agriculture land. This incident will definitely pose a threat to vector-borne diseases and sanitation for those who live downstream and in nearby areas. Therefore, it is suggested that VNRC will need to escalate the involvement in vector-borne disease prevention and hygiene promotion sessions in Da Lat, Lam Dong province.

Cash-based interventions will be used as one of the modalities under this operation as according to initial observation that markets in these provinces are still functioning and people can purchase food and essential commodities. There have also been no risks identified or threats in the provinces, with local governments mobilized and providing support to affected communities. It is suggested that a rapid assessment for market (RAM) especially in Phu Quoc Island should be done before distributing cash grant.

For cash assistance, VNRC targets an initial 3,500 households which are directly affected by the floods and categorized as poor or near-poor as per national standards to be assisted through this plan of action. The amount of money will be allocated according to three different levels:

- Level 1 with VND 500,000 (CHF 21), for one-person household.
- Level 2 with VND 1 million (CHF 42), for two to three persons household.
- Level 3 with VND 1.5 million (CHF 64), for more than three persons household.

In terms of household items, VNRC will be targeting 900 households whose houses are damaged and their belongings are damaged or swept away.

### **Beneficiary selection**

Based on the impact of the disaster, the identified urgent needs, and the capacity of its branches in the affected areas, VNRC will target the most vulnerable poor households that have been severely affected by the floods. While lost livelihood and/or houses severely damaged will be considered the most important criteria for beneficiary selection, the following criteria will be taken into account during the process of prioritization. Three provinces are Dak Lak, Lam Dong and Kien Giang.

### **Primary criteria**

Households must meet at least one of the following criteria:

- Loss of food source (main food source of households was lost or heavily damaged due to the floods).
- Loss of household assets and/or assets used for livelihood, such as rice fields, fish/shrimp and other aquacultures.
- Loss or partially destroyed houses/shelters or inundated.
- Households who have lost family members in the floods.
- People injured by the floods or sick people who are unable to work for a living.

### **Secondary criteria**

If the number of households who meet all primary criteria is higher than the capacity to support, then secondary criteria will be used for further selection. Households will need to meet any one of the secondary criteria, the ranking will be from the top list down, as follows:

- Households who are on the latest list of poor households (2 scores).
- Households who are on the latest list of near poor households (1 score).
- Households who self-report not receiving any support or received very little support from other individuals or organizations (1 score).
- Households of which none of the members has the capacity to work (1 score).

- Households caring for disabled or chronically ill people (1 score).
- Female-headed households (1 score).
- Households with pregnant or lactating women (1 score).
- Households with elderly over 65 years old (1 score).
- Households with children under 5 years old (1 score).

Based on importance, each of the above-mentioned criteria will be given 1-2 points and support will be provided to those having the highest scores. Beneficiary selection will be coordinated with local authorities and other stakeholders to avoid overlapping.

### Scenario planning

Although the amount of rainfall on 11 August 2019 in the central highlands was getting a bit less, it still reached 93mm in Bao Loc district (Lam Dong province) and 130mm in Dak Mot district (Kon Tum province). The crops were damaged which is likely to cause a shortage of food and livelihood challenges.

According to the NCDPC, the threat and likelihood of dam breakage in Dak Nong is high and the government is doing all it can to save the dam at this stage. If these efforts fail, then there is fear of further inundation in many parts of the central highland provinces such as Lam Dong and Dak Lak. In the meantime, high rainfall is forecasted in the central and south-central provinces<sup>1</sup> in coming days.

### Operation Risk Assessment

Over ten of thousands of families have been affected by the disaster and it is challenging to categorize the level of damages to shelter, household items and livelihoods, which may lead to difficulties in selecting beneficiaries. VNRC headquarters will closely monitor and provide technical support to the provincial chapters and at the same time work closely with local government in the beneficiary selection process to ensure the process is accountable and transparent for the affected communities. Depending on

The mechanism for a cash transfer programme through a financial intermediary (i.e. banks, post offices) was piloted in Quang Tri province in June 2019 and if it is agreed, this operation may take into consideration of using financial service providers (FSPs) such as Viet Nam Post Office and/or VietTel to disburse the funds to beneficiaries. An MoU was signed with both FSPs which can be used to facilitate the engagement process with this operation. To ensure accountability, the requirement for personal identity documents (household registration book, ID card, signature/fingerprint) will be strictly followed. VNRC has sound experience in ensuring the money goes to the right beneficiaries. VNRC will also obtain insurance for the cash, covering when it is being withdrawn from the bank and being distributed to beneficiaries

## B. Operational strategy

### Overall Operational objective

The operation aims to meet the immediate needs of 4,400 of the most vulnerable affected households (17,600 people) through the provision of household kits, water purification tablets (WPTs) and unconditional multi-purpose cash grants.

### Proposed strategy

The assistance provided to those affected by the floods differs according to initial impact and immediate needs, in coordination with other actors on the ground. While the overall operation aims to provide assistance to 18,100 people or 4,525 households. 3,500 households will be targeted with Multi-purpose cash-grants across 3 provinces. It is also foreseen that 900 of these households will receive assistance through the provision of household kits. Further, WASH assistance will be provided to 3 provinces, targeting 4,800 people in the form of water purification sachets and orientation on safe water storage and handling. In addition, an additional 5,000 people will be targeted for health and hygiene promotion in 1 of the 3 provinces where a dumpsite has collapsed.

VNRC has already used its own funding to purchase dry food packages, including rice and noodles to distribute to households. The packages will be distributed with unrestricted multi-purpose cash grants to 3,500 households in the three affected provinces of Dak Lak; Lam Dong; and Kien Giang. The households being targeted are those who have been affected and that are categorized as poor or near poor as defined by national criteria. In addition, a number of secondary criteria will be factored in to ensure that the assistance reaches the most vulnerable households. The beneficiary selection process will be undertaken in close consultation with the local authorities, firstly to identify the poor and near poor households and secondly the community to identify those that meet the secondary criteria. The selection

<sup>1</sup> The National Center for Hydro-Meteorological Forecasting

process will be guided by experienced staff from VNRC's headquarters to support Chapter staff. The amount of money will be allocated at three different levels:

- Level 1 with VND 500,000 (CHF 21), for one-person household.
- Level 2 with VND 1 million (CHF 42), for two to three persons household.
- Level 3 with VND 1.5 million (CHF 64), for more than three persons household.

These amounts have been determined based on previous operations and market assessments and in consultation with the cash working group in Vietnam who are currently working on the standardisation of VCA assistance and a common inter-agency Minimum Expenditure Basket.

VNRC are prioritising 900 households who have experienced damage to their houses to receive household kits. These kits will support the most affected households to recover necessary household items. The kit consists of cooking and kitchen utensils, two (2) mosquito net, two (2) blankets, a 10-litre water bucket and water container. In addition, VNRC are distributing water purification sachets from their own stock and delivering orientation and IEC materials on the correct use of the sachets and safe water storage and handling.

In terms of disease prevention and control, it is proposed that VNRC will be scaling awareness campaigns on disease prevention and control and hygiene promotion in Da Lat, Lam Dong where Cam Ly dumpsite was collapsed posing threats to water contamination and vector borne disease outbreak.

Based on the experience from previous operations that two main items (blanket and mosquito net) are requested to be procured regionally and shipped in Viet Nam and VNRC will use its own fund to procure the remaining items.

## **Support Services**

### **Human resources**

The National Society will appoint one Operation Manager to oversee the implementation and monitoring of all outputs under the operation. One Finance officer will also be assigned to the operation and will be responsible for overseeing the reconciliation of expenditure and producing timely financial reports. At Chapter level one focal point will be assigned in each province to oversee the implementation of activities within the affected communes. A total of 200 volunteers will be mobilized for this response and will be provided with emergency health insurance as well as appropriate personal protective equipment.

The IFRC CCST will support VNRC in this operation with technical support from the IFRC Asia Pacific Regional Office (APRO) in Kuala Lumpur, as needed.

### **Communication**

The VNRC communications team is ensuring that Red Cross response efforts are effectively communicated to the public in a timely manner. VNRC staff and volunteers across the country are actively contributing to institutional communications through their own social media networks. VNRC staff conducting assessments in the field regularly provide.

The IFRC communication officer in Bangkok will support the VNRC in sharing voices from the community and publicity through the production of audio-visual materials, including photos and/or videos. This will ensure that the wider Red Cross membership and public have access to information on damage and needs, and Red Cross response, in a timely and reliable manner. Efforts have been made to encourage a more community and volunteer-centered approach to communication, where communities and volunteers are portrayed with dignity and solution providers. Communication has been taking place on social media platforms, websites as well as engagement with local and international media.

### **Information technology and telecommunications**

The DREF operation will cover costs of mobile phone credits and internet cards for the chapters involved. VNRC will ensure that staff and volunteers involved in the operation are accessible via mobile phones. The chapters have sufficient computer software and hardware capacity, and support for the operational requirements.

### **Security**

The IFRC security framework is applicable for this operation. With regards to VNRC staff and volunteers, the National Society's security framework will apply. In terms of security during distributions, the national society works very closely with local government in the identification of appropriate distribution points considering aspects such as access and security. Local government will assist in deploying appropriate district and commune level staff to secure distribution points and ensure that distributions run smoothly.

### **Community engagement and accountability (CEA)**

VNRC have a proactive approach to Community Engagement and Accountability. Affected communities will be engaged in the beneficiary selection process and will have access to information on the criteria being used for the selection process. Communities are also engaged in verifying information regarding beneficiary households to ensure that the most vulnerable are reached. In addition, the national society has a standard approach to establishing beneficiary feedback mechanisms that will be activated during the selection and distribution processes at the commune level. Phone hotlines of VNRC Operation Manager and local Chapter Officer in Charge of the operation will be established and focal points not directly involved in the operation, will be designated at both the headquarter and chapter level as well as within local authorities to receive beneficiary feedback. In addition, beneficiary feedback boxes will be made available at beneficiary selection processes and distribution sites to allow anonymous feedback. Following the distribution processes post distribution monitoring will be undertaken to assess the level of satisfaction from beneficiaries regarding the nature of the response as well as different aspects of the distribution processes such as the timeliness of the support and suitability of the distribution processes.

#### **Planning, Monitoring, Evaluation and Reporting (PMER)**

Reporting on the operation will be carried out in accordance with the IFRC reporting standards. Regular updates will be issued during the operation's timeframe with a final report issued within three months after the end of the operation. The operation will receive support through IFRC CCST PMER team. The operation monitoring teams will make field visits as needed. This will help identify and, where possible and necessary, resolve any issues. Necessary tools and templates for regular data collection and reporting will be adopted from existing PMER resources.

#### **Administration and Finance**

IFRC CCST Finance and Admin units will provide the necessary operational support for review, validation of budgets, bank transfers, and technical assistance to VNRC on procedures for justification of expenditures, including the review and validation of invoices. VNRC has implemented DREF's previously and has complied with the necessary financial procedures to the required standards.

#### **Logistics and Supply Chain**

Logistics activities aim to effectively manage the supply chain, including procurement, customs clearance, fleet, storage and transport to distribution sites in accordance with the operation's requirements and aligned to IFRC's logistics standards, processes and procedures. VNRC has a logistics focal point in Da Nang and Warehouse managers who will extend logistics support to the operation and coordinate the deployment of household kits to the affected areas such as transportation of goods by trucks, reception points at arrival destinations.

The household kits to be distributed under this operation are available in NS pre-positioned stocks and have been released to meet immediate operational needs. Replenishment of two items included in the household kits, blankets and mosquito nets will be supported internationally by the APRO OLPSCM Unit. The remainder of the items are being procured locally with VNRC funds using VNRC's procurement processes. VNRC is bound to follow the procurement laws of the government and have an established procurement committee structure which includes both the national and provincial level and appoints focal points to oversee the process and to ensure that the it meets requirements. Several VNRC staff have been trained in the government's procurement regulations.

## Protection, Gender and Inclusion<sup>2</sup>

People targeted: TBC

Male: -

Female: -

Requirements (CHF): No budget

**Needs analysis:** Some households have lost their houses while others have experienced damage to houses and many have lost household items. In addition, households have temporarily lost livelihoods which may take some time to restore.

**Population to be assisted:** The target population is 4,525 households whose houses have been destroyed or damaged in the floods and affected by the collapsed dumpsite in Lam Dong province. Households for MPCGs will be prioritized based on several criteria. While the primary criteria are focused on household losses the secondary criteria, identified under beneficiary targeting, provide a strong emphasis on those who are more likely to be vulnerable to the impacts of disaster

**Programme standards/benchmarks:** IFRC Minimum standard commitments to protection, gender and inclusion in emergency.

P&B Output Code	Inclusion and Protection Outcome 1: Communities identify the needs of the most vulnerable and particularly disadvantaged and marginalised groups, as a result of inequality, discrimination and other non-respect of their human rights and address their distinct needs.	Does the operation demonstrate evidence of addressing the specific needs to ensure equitable access to disaster response services? (Target: Yes)															
	Inclusion and Protection Output 1.1: NS programmes improve equitable access to basic services, considering different needs based on gender and other diversity factors.	RDRT (PGI) delivers orientation to Red Cross Chapters. (Target: Yes)															
	Activities planned Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
AP031	Support assessment teams to ensure collection and analysis of sex-age and disability-disaggregated data	x															
AP031	Provide chapter level orientation for staff and key volunteers on protection, gender and inclusion with specific focus on Minimum Standard Commitments.	x															
AP031	Ensure identification and proactive inclusion of different target groups including gender, diversity and disability in beneficiary selection process	x	x	x													
AP031	Provide support to beneficiary selection process at Chapter level to ensure that points system accounting for secondary criteria is applied transparently	x	x														
P&B Output Code	Inclusion and Protection Output 1.2: Emergency response operations prevent and respond to sexual- and gender-based violence and all forms of violence against children.	75 of staff/volunteers attending sessions on PGI (including SGBV)															
	Activities planned Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

<sup>2</sup> This area of focus is a merge of what previously was Social Inclusion and Culture of Non-violence and peace. It is under development, so for now it represents the physical merge of three existing relevant outputs.

## How we work

All IFRC assistance seeks to adhere to the **Code of Conduct** for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGO's) in Disaster Relief and the **Humanitarian Charter and Minimum Standards in Humanitarian Response (Sphere)** in delivering assistance to the most vulnerable. The IFRC's vision is to inspire, **encourage, facilitate and promote at all times all forms of humanitarian activities** by National Societies, with a view to **preventing and alleviating human suffering**, and thereby contributing to the maintenance and promotion of human dignity and peace in the world.

The IFRC's work is guided by Strategy 2020 which puts forward three strategic aims:

**Save lives,**  
protect livelihoods,  
and strengthen recovery  
from disaster and crises.

Enable **healthy**  
and **safe** living.

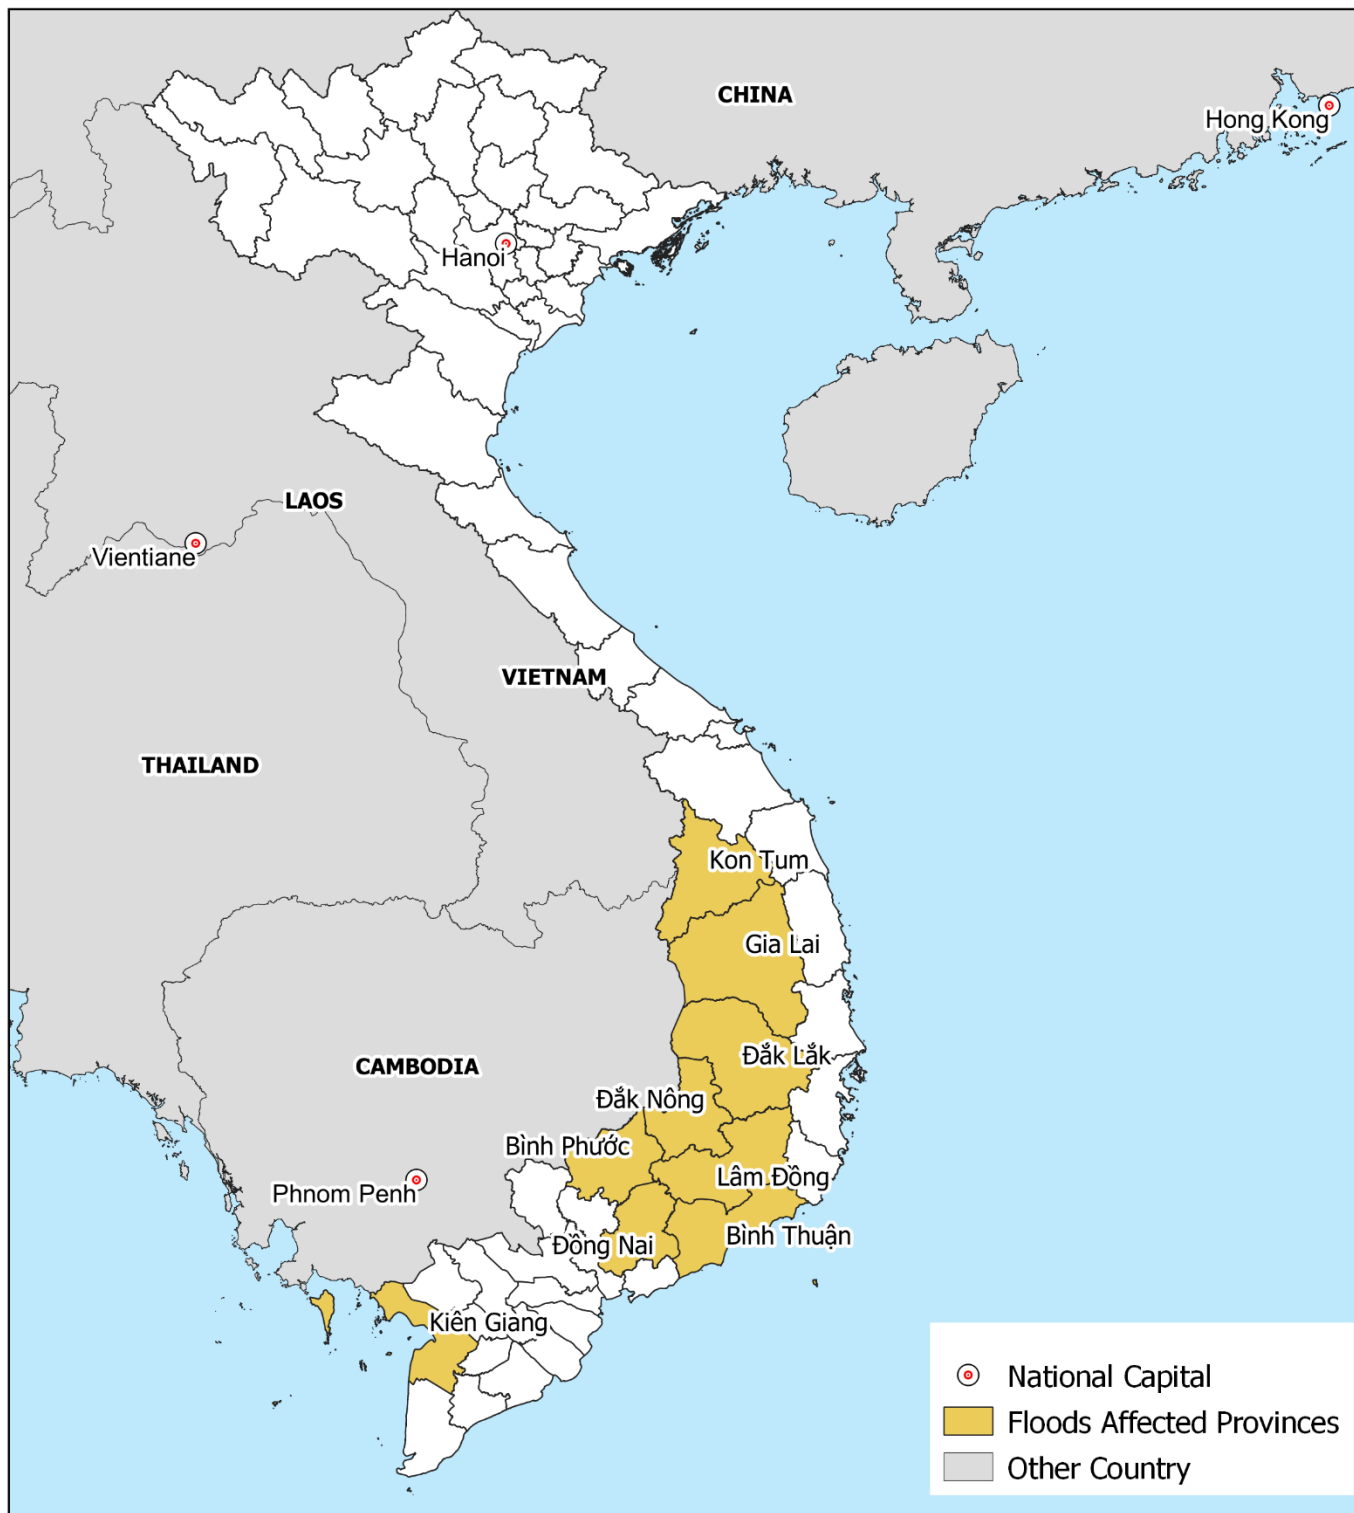

Promote **social inclusion**  
and a culture of  
**non-violence** and **peace**.

International Federation  
of Red Cross and Red Crescent Societies

## Vietnam, Flash Floods: Disaster Relief Emergency Fund

11 August 2019

The maps used do not imply the expression of any opinion on the part of the International Federation of the Red Cross and Red Crescent Societies or National Societies concerning the legal status of territory or its authorities. Map data sources: OCHA, OSM Contributors, GDACS, ICRC, IFRC
