Preliminary emergency appeal

Haiti: Hurricane Sandy

 International Federation
of Red Cross and Red Crescent Societies

Preliminary emergency appeal n° MDRHT010 GLIDE n° TC-2012-000180-HTI 2 November 2012

This Preliminary Emergency Appeal seeks **CHF 2,162,206** Swiss francs in cash, kind, or services to support the Haiti Red Cross Society (HRCS) to respond to the humanitarian consequences of Hurricane Sandy and assist **7,000** families (35,000 beneficiaries) for **nine months**, and will be completed by the end of July 2013. A Final Report will be made available by 31 October 2013 (three months after the end of the operation).

150,000 Swiss francs were allocated from the International Federation of Red Cross and Red Crescent Societies' (IFRC) Disaster Relief Emergency Fund (DREF) on 31 October 2012 to support this operation. Unearmarked funds to replenish the DREF are encouraged.

On 25 October houses and temporary shelters were flooded in Leogane: Source: HRCS

Once further information from assessments has been received, a full Emergency Appeal will be issued with more details concerning damage and needs, beneficiary selection and the response of the Haiti Red Cross Society.

[<click here to view the attached Emergency Appeal Budget; here to view the map of the affected area or here to view contact details>](#)

The situation

Similar to other countries in the Caribbean, Haiti has been adversely affected by torrential rainfall as a result of Hurricane Sandy. A day after the passing of the storm over Cuba and the Bahamas the tail of the storm was still over the island of Hispaniola and heavy rains continued to batter Haiti until 27 October. In three days, the Sud department, for example, received almost 300mm of rain. Thus the government of Haiti maintained a red alert for the whole country as the rains continued. The most affected departments include Ouest (Tabarre, Fond Verettes, Léogane, Anse-à-Galets, Gantier); Sud (Port-Salut, Les Cayes, Tiburon, Port à Piment, St Louis du Sud, Cavaillon and Les Anglais), Grande-Anse (Dame Marie, Anse d'Hainaut, Roseau, Iles Cayemithes, Pestel), Nippes (Baradères, Miragoane), Sud-est (Mapou); and Artibonite (Grande Saline, La Chapelle, Verettes). All rivers in the southern peninsula were swollen and most burst their banks and flooded low lying areas. Due to this there is significant flooding in metropolitan Port-au-Prince, southern departments and Artibonite.

Damage and needs assessments, information from the Haiti Red Cross Society teams, the Department of Civil Protection (DPC) and OCHA shows that up to 17,187 people were evacuated to 118 emergency shelters and in all some 18,907 families were affected (roughly 94,535 people). There were 51 confirmed deaths, 18 wounded and 15 persons are missing. In addition 4,169 houses have been flooded, 10,813 damaged and 3,925 destroyed. In addition, the General Hospital in Les Cayes, especially the emergency room and the internal medicine ward, were under 50cm of water. Accessibility of some areas has been affected by damage to roads and bridges in the south department with Ganthier for instance having been cut off from the rest of the country after the access bridge was swept away by flood waters.

Coordination and partnerships

At the national level the Haiti Red Cross Society is part of the National Emergency Operation Centre (COUN) and its equivalent at the departmental and commune level. The Haiti Red Cross Society works closely on the ground with the DPC to coordinate and respond to emergencies. In addition, collaboration is ensured with government and international humanitarian actors including the UN system in country through the various coordination mechanisms such as the International Community Support Group (GACI).

The Haiti Red Cross Society is being given support by 12 Red Cross Red Crescent partners which are in country. In addition, the International Federation of Red Cross and Red Crescent Societies (IFRC) is supporting and coordinating with the National Society to better support the response to this emergency ensuring identified needs are met. The IFRC maintains constant communication with the Haiti Red Cross Society through the Haiti country representation and through the Americas zone office in Panama.

Red Cross and Red Crescent action

The Haiti Red Cross Society (HRCS) opened its Emergency Operation Centre 24 hours prior to the onset of the emergency, with personnel from the National Society and the IFRC manning it on a 24 hour basis. The National Society mobilized and put on pre-alert 2,887 Red Cross volunteers in all the 13 regional branches and sensitized all the branches on emergency and first aid intervention. The HRCS prepositioned 13 HRC ambulance vehicles in the country (7 in Port-au-Prince and 6 in other vulnerable regions). For easy communication with the Headquarters, the HRCS ensured that 26 radio bases were functional in all the 13 regional branches and VHF radios provided to team leaders. In preparation for the storm, the HRCS working in collaboration with the DPC and the International Organization for Migration (IOM) commenced preventive evacuations on the afternoon of Wednesday 24 October for the most vulnerable individuals living in 12 at risk camps. The evacuations were complemented with 38 HRCS volunteers providing psychosocial support when needed and preventive awareness about the Hurricane. In addition, preparedness messages were provided through Radyo Kwa Rouj (Radio Red Cross) and messages through cell-phones. Overall, 826 of the most vulnerable people were evacuated from the 12 most at risk camps in Port-au-Prince.

The Haiti Red Cross Society, in collaboration with the IFRC and Partner National Societies, activated the contingency plan and the emergency response teams (ERTs). On Saturday, 27 October the ERTs were deployed to conduct impact and needs assessments. With the support of the Dominican Red Cross, the HRCS and the IFRC conducted aerial assessments in the Sud department to assess levels of flooding and the impact of it on the communities. The aerial assessment also allowed for an assessment of security and accessibility of flooded areas for ERT assessments and possible relief distributions. The Red Cross Red Cross partners have also conducted an inventory assessment of relief stocks pre positioned in the provinces in preparation for emergency distributions. The stock available in country will be used for the response and be replenished from Panama. This is necessary since the hurricane season has not yet come to an end and it is essential to ensure an adequate quantity of relief stock to fulfil the needs of the population in the aftermath of possible future natural disasters.

The needs

The National Society intends to reach to 35,000 people who have been adversely affected by the hurricane in the departments in the south of the country and the Ouest department. These 35,000 people represent approximately 7,000 households. The current needs identified include:

- Relief items: Households lost their furniture and kitchen utensils thus losing the ability to provide a hot meal for family members. The Red Cross will partially satisfy this need by providing the households with kitchen sets.
- Emergency Health: Given the poor water and sanitation situation in the region, there is a potential risk of a major cholera outbreak. There have been 136 cases of cholera in the last week and therefore a renewed cholera outbreak along with other diarrheal diseases due to contamination of water sources by the flood waters are potential threats. As a result, there is a need for the procurement and distribution of hygiene kits, buckets, aquatabs, chlorine, and soap to prevent the spread of water borne disease, as well as oral rehydration solutions (ORS) for cholera treatment. Including the sensitization given by hygiene promotion volunteers on the use of aquatabs and ORS during distributions, and linking this with awareness-raising on disease prevention in the communities will increase the awareness of the population on how they can prevent cholera. Furthermore, in this context, malaria and other vector borne diseases could also pose problems in affected areas. Campaigns on disease prevention and awareness raising on prevention of epidemics and control will be conducted with the affected population using the available information, education and communications (IEC) material. This will be conducted at the same time as the distribution of mosquito nets. The integrated HIV and violence prevention activities will be implemented in the West region in IDP's camps and in other vulnerable, high-risk areas affected by the emergency that have not benefitted from any long term interventions.
- Water, sanitation and hygiene: The hygiene situation and the poor access to safe water are chronic in Haiti, in particular in the rural areas and in camps. This is exacerbated by poor utilization of latrines and inadequate waste management. Hygiene promotion sessions and activities linked with awareness raising on epidemic prevention will be conducted jointly by hygienic promotion (HP) volunteers and volunteers trained in epidemic control volunteers (ECV) in order to prevent any further epidemics.

- Shelter: Shelter tool kits and tarpaulins will allow families to build temporary shelters and protect themselves from the elements. The provision of construction materials to families whose homes were damaged will allow them to start the rebuilding process whilst being provided with technical support in safe building practices by trained HRCS staff and volunteers.
- Livelihoods: In order to allow for the replacement of lost assets and income caused by the storm as well as the negative impact on livelihoods, a cash transfer programme that will allow families to replace essential assets and meet other basic needs will take place.
- Disaster Risk Reduction: In order to mitigate the effects of future disasters and strengthen the capacity of the HRCS branches in the affected areas, disaster risk reduction activities will be conducted in the affected communities.
- Logistics: Technical support is needed to strengthen HRCS logistics capacity to mobilize pre-positioned stocks and manage stock replenishment.

Beneficiary selection: in coordination with local authorities and members of affected communities, the HRCS will select 7,000 affected families following the criteria below:

- Families whose agricultural production was affected or destroyed;
- Families whose homes were affected or destroyed;
- Families whose income was affected due to the flooding;
- Families with children or elderly members;
- Families led by women (head of household);
- Families who are not yet receiving humanitarian assistance.

The proposed operation

The Haiti Red Cross Society aims to assist families which are severely affected by the passage of Hurricane Sandy. The operation will provide non-food relief items to 4,000 of the most affected families who were evacuated from their dwellings as a result of the hurricane. Furthermore, access to safe water will be improved and hygiene promotion initiatives carried out. In addition, 1,000 families will be assisted with repair to damaged homes and 2,000 families will benefit from livelihoods support. Activities will also be carried out in the areas of emergency health with a focus on epidemic prevention and control and in disaster preparedness and risk reduction, strengthening vulnerable communities.

Relief distributions (food and basic non-food items)

| Outcome: Affected families in the southern departments and Quest department benefit from the distribution of non-food items to help them recover from the effects of the hurricane. | |
|--|--|
| Outputs | Activities planned |
| 4,000 families (20,000 people) are reached with kitchen sets. | <ul style="list-style-type: none"> • Conduct rapid impact and needs assessment. • Target and register the most vulnerable families in the most affected areas of Haiti. • Distribute kitchen sets with volunteers and local authorities. • Monitor the relief activities and provide timely and accurate reporting on the relief distributions. • Training of Haiti Red Cross Society in Mega V (beneficiary electronic data base and distribution system). • Implementation of Mega V for beneficiary registrations and distributions. • Manage the beneficiary targeting strategy and registration. |

With the support of the IFRC's Global Logistics Services in Panama, the Haiti Red Cross Society is planning to distribute a kitchen set to 4,000 families.

The kitchen sets will contain the following items:

- 1 x COOKING POT, 7l (frying pan lid fits)
- 1 x FRYING PAN, 2.5l, used as lid for the 7L cooking pot)
- 1 x COOKING POT, 5l, with lid

- 5 x BOWL, 1l, metallic
- 5 x PLATE, 0.75l, metallic
- 5 x CUP, 0.3l, metallic
- 5 x SPOON, table, 15ml, stainless steel
- 5 x FORK table, 20cm, stainless steel
- 5 x KNIFE, table, 17cm, stainless steel
- 1 x KNIFE, kitchen, 15cm stainless steel blade
- 1 x SPOON, wooden, stirring 30cm
- 1 x SCOURING PAD

The HRCS will utilize the MEGA V beneficiary registration and distribution system to ensure accurate and efficient distribution of relief items and 200 HRCS volunteers will receive training in this.

| Shelter | |
|---|--|
| Outcome: 1,000 families in the southern departments and the Quest department are supported with the repair and reconstruction of their damaged homes | |
| Outputs | Activities planned |
| Shelter kits, hurricane straps and lighter construction materials are distributed to 1,000 affected families. | <ul style="list-style-type: none"> • Identification of communities and specific beneficiaries in coordination with local government authorities. • Identification of targeted families based on needs assessments and registration. • Hiring of technical experts and support staff. • Distribution of shelter tool kits and tarpaulins to affected families. • Procurement and distribution of material for the repair or reconstruction of damaged homes. • Provision of technical assistance and guidance to family members. • Supervision of the repair and reconstruction of 1,000 damaged houses. |

With the support of the IFRC's Global Logistics Unit in Panama, the Haiti Red Cross Society is planning to distribute the following relief items to 1,000 families:

- 1,000 shelter tool kits and hurricane straps, zinc sheets /beams/girders/joists/fasteners/timber for renovation.

| Livelihoods | |
|--|---|
| Outcome: Contribute to the early recovery of 2,000 families whose livelihoods have been severely affected as a result of the hurricane. | |
| Outputs | Activities planned |
| 2,000 farmers receive monetary assistance to meet basic needs, replace essential assets and ensure food security. | <ul style="list-style-type: none"> • Complete detailed needs and market assessment. • Analyze the security situation. • Identify cash transfer delivery mechanism. • Determine value of assistance. • Selection of 2,000 targeted beneficiaries (see criteria below), • Distribution of items. • Monitoring of delivery and use of funds by beneficiaries. |

In order to allow for replacement of lost or damaged assets and ensure that basic needs are met for families who lost their subsistence crops and suffered a severe impact to their livelihoods, HRCS will develop a cash transfer programme. The modality for this programme will be determined after a more detailed needs and market assessment is conducted by HRCS, along with an analysis of the security situation. The amount of the cash transfer (CHF 165) was calculated based on the average needed to purchase seeds and farming tools as well as an additional amount to cover basic immediate needs such as the purchase of food, clothing and medical care. After the 2010 earthquake in Haiti, the interagency Cash Transfer Coordination group

established an amount of USD 125 as an appropriate amount to transfer to affected families to cover their basic needs and replace essential assets.

Beneficiary selection criteria are: families who have incurred severe damage to houses and livelihoods and who have a large number of children; disabled people; elderly or single, female-headed households who have no possibility of support from family or relatives or access to insurance. The National Society will select the 2,000 families in coordination with organizations involved in response and early recovery activities in order to ensure that efforts are not duplicated.

| Water, sanitation, and hygiene promotion | |
|--|--|
| Outcome: The risk of waterborne and water related diseases is reduced through the provision of safe water as well as hygiene promotion within the population affected by Hurricane Sandy. | |
| Outputs (expected results) | Activities planned |
| Access to safe water, hygiene kits and hygiene promotion are provided to 4,000 families. | <ul style="list-style-type: none"> • Carry out continuous assessments of water, sanitation, and hygiene situation and conduct surveillance for water borne disease incidence and prevalence. • Distribute hygiene kits, water buckets, aquatabs, chlorine and soap to 4,000 families • Conduct hygiene promotion campaign activities and provide information on the safe use of water treatment products in the affected departments. |

To reduce the risk of waterborne and water related diseases it is essential that families drink safe water and store water appropriately to avoid the reproduction of vectors such as mosquitoes. To achieve this, the Haiti Red Cross Society has established a strategy whereby families will receive water purification tablets and water containers for the treatment of water at the household level.

With the support of the IFRC's Global Logistics Services in Panama, the Haiti Red Cross Society is planning to distribute the following relief items to 4,000 families:

- hygiene kits for 1 month, water buckets, aquatabs, chlorine and soap.

| | |
|--|----------|
| HYGIENIC PARCEL for 5 persons/1 month | Quantity |
| WASHING POWDER, 1 kg, for washing machine, for cloth | 3 |
| TOILET, paper, hygienic, roll | 12 |
| SOAP, body soap, 100g, piece | 12 |
| TOOTH PASTE, tube 75 ml | 5 |
| TOOTH BRUSH, medium | 5 |
| SHAMPOO, 250 ml | 2 |
| RAZOR, disposable | 5 |
| HYGIENIC PADS, normal | 8 |

To maximize impact, an integrated approach will be used which will ensure that the families reached through relief items are also targeted for health, water and sanitation activities. Thus all 4,000 families will receive hygiene kits and information and educational messages on hygiene and water purification.

Emergency Health

Outcome: The health risks of the emergency on the affected population are reduced by preventive measures and awareness-raising in the communities.

| Outputs(expected results) | Activities planned |
|--|--|
| <p>Cholera, and other water and vector borne diseases are prevented and reduced.</p> <p>Community resilience is strengthened through improved health awareness, knowledge and behaviour.</p> <p>Activities to prevent interpersonal violence and excess hiv transmission are implemented in targeted communities</p> | <ul style="list-style-type: none"> • Epidemic Control trainings for 600 volunteers • Activation of epidemic response teams in affected areas -3 regional teams: Grand Anse, Sud, Ouest for for cholera surveillance and health promotion in communities. • Awareness-raising campaigns in water and vector borne diseases (cholera, malaria) • Dissemination of messages on cholera by community radio. • Distribution of mosquito nets to 4,000 target families • Reinforcement of cholera stock and logistic capacities in the 3 regional branches for cholera. • Provision of information to target groups on available Voluntary counselling and testing services. • Provision of information to target group on available Prevention of moter to child transmission services. • Promotion of skills for personal protection • Production of awareness-raising materials (flyers, posters) • Volunteer training in violence prevention • Promotion of key messages with volunteer peer educators • Production of reference and awareness-raising materials. • Dissemination of key messages through the media. • Violence prevention campaigns implemented in targeted groups through HRCS volunteers |

Post-disaster risks related to HIV transmission are increased as evidence points to an increase in sexual behaviour as witnessed by unwanted pregnancies (mostly in youth) in the camp settings plus evidence of an increase in gender-based violence and transactional and transgenerational sex. A component in the HIV programme will address gender-based violence, especially for those living in camps for displaced persons and it is frequently under-reported.

The HIV and violence prevention campaigns will be part of the response to the disaster and the capacity of the HNRCS to implement these type of campaigns at the national and local level will be further strengthened and allow for the continuity of these type of programs to be implemented in the future.

Disaster Preparedness and Risk Reduction

| Outcome: Regional and local Red Cross committees in carry out preparations for future disasters. | |
|--|---|
| Expected results | Activities planned |
| Communities in affected departments with extreme vulnerability to natural hazard have established better preparedness for the annual threat of hurricanes and tropical storms. | <ul style="list-style-type: none"> • Undertake climate change adaptation campaigns in communities. • Conduct awareness-raising campaigns on disaster risk management • Set up community early warning systems and safe areas. • Carry out SPHERE training for volunteers • Carry out Stay Safe trainings for volunteers. • Carry out volunteer training in PSP. |

Based on the findings of the assessments from the affected communities, the HRCS will conduct awareness-raising campaigns on disaster risk management that will include the establishment of community early warning systems and safe areas. HRCS volunteers will be further trained on the SPHERE guidelines for humanitarian response as well as in the IFRC Stay Safe procedures in order to work well in areas with security issues.

Logistics

| Outcome: The local logistics capacity of the Haiti Red Cross Society to respond with relief items is strengthened with the support of standardized items prepositioned in the IFRC's zone Logistics Unit in Panama as well as enhanced with technical support | |
|--|---|
| Outputs | Activities planned |
| Enhanced logistics capacity and technical support to facilitate the distribution of relief items to 4,000 families and other related activities. | <ul style="list-style-type: none"> • Preparation of the logistics mobilization table. • Management of the logistics mobilization of the appeal and maintenance of relations with donors. • Procurement of transport services through the ZLU transport network. • International procurement. • Pipeline management of in-kind goods. |

The IFRC's logistics team based in Haiti in coordination with the IFRC's zone Logistics Unit will support the emergency operation not only with the dispatch of relief items through the emergency appeal, but also with the pipeline management of goods imported to Haiti.

Communications – Advocacy and Public information

Maintaining a steady flow of timely and accurate information between the field and other major stakeholders is vital for fundraising, advocacy and maintaining the profile of emergency operations. During an operation communications between affected populations and the Red Cross and Red Crescent, as well as with the media and donors, is an essential mechanism for effective disaster response and for the promotion of quality, accountability, and transparency.

Support will be provided to the Haiti Red Cross Society to increase the visibility of their humanitarian actions during this operation, and the IFRC's communications team in the Americas zone and the secretariat headquarters will work with the National Society to identify the most appropriate communication channels.

Capacity of the National Society

The Haiti Red Cross Society has extensive disaster response experience in relation to hurricanes as Haiti is frequently in the path of hurricanes. As a result, their disaster preparedness and response initiatives are well established and known by all volunteers and staff.

At the moment, the National Society has over 2,000 volunteers activated since the formation of the hurricane who have supported preventive evacuations, first response actions and assessments.

Capacity of the IFRC

The International Federation through the Disaster & Crisis Response and Early Recovery Department in coordination with the country representation for Haiti is providing support to the Haiti Red Cross Society in organizing the provision of initial relief items, development of a plan of action, logistics and human resources as needed. An operations manager will be hired to coordinate the operation.

In addition to the disaster response capacities in the Americas zone office, there are experienced resources available in the region, in particular through the Regional Intervention Team (RIT) system, which ensures the deployment of specialized personnel to assist a sister National Society. A RIT will be hired to support this operation.

Budget summary

See attached budget (Annex 1) for details.

How we work

All IFRC assistance seeks to adhere to the Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGO's) in Disaster Relief and the Humanitarian Charter and Minimum Standards in Disaster Response (Sphere) in delivering assistance to the most vulnerable.

The IFRC's vision is to inspire, encourage, facilitate and promote at all times all forms of humanitarian activities by National Societies, with a view to preventing and alleviating human suffering, and thereby contributing to the maintenance and promotion of human dignity and peace in the world.

www.ifrc.org

Saving lives, changing minds.

The IFRC's work is guided by Strategy 2020 which puts forward three strategic aims:

1. Save lives, protect livelihoods, and strengthen recovery from disaster and crises.
 2. Enable healthy and safe living.
 3. Promote social inclusion and a culture of non-violence and peace.
