The logistic centre in Bruzgi, Belarus, where Belarus Red Cross provided assistance to migrants: food, hygiene products, masks, water, warm clothes and shoes, blankets and other necessary items. Photo: IFRC

SITUATION ANALYSIS

Description of the situation

The migration situation related to Belarus and neighbouring countries started in May 2021 with an increasing number of migrants irregularly entering Lithuania from Belarus. Later, in August 2021, there was an increase of migrants in Latvia and Poland. Since then, the situation has impacted an estimated 20,000 people spread across several countries, mainly Belarus, Poland, and Lithuania. Following regular and daily attempts by people to cross the borders into the EU during the autumn and an escalation on the border which led to clashes in early November, the situation de-escalated in December 2021 and early January 2022.

As a result of the [Ukraine and Impacted Countries Crisis](#) that started on 24 February 2022, the countries neighboring Ukraine were also affected by the crisis and the influx of immigrants. Countries neighboring Ukraine, especially Poland, have received the highest number of refugees and are now heavily involved in providing humanitarian assistance to them. As a result of this situation, the Belarus and Neighboring Countries Europe Region Population Movement Emergency Appeal (EA), combined with the de-escalation was overshadowed by the Ukraine-related humanitarian crisis.

Although the National Societies operating within the scope of this EA did not give their full priority to the Belarus and Neighboring Countries Europe Region Population Movement EA during the acute periods of the Ukraine crisis, the activities within the scope of this EA were continued. In the Belarus, distribution of humanitarian aid, health service services, coordination with local authorities and RFL services continued within this process. Distribution of health services and humanitarian aid materials also continued in Poland as well and RFL service in Lithuania continued without any interruption.

After the de-escalation, some migrants remained in the terrain by the border, but the majority on the **Belarus** side of the border were moved to and housed in a logistics centre at Bruzgi border crossing. The number of people accommodated in the logistics centre decreased from around 1,850 people in November to 800 in January and 450 in early March. In March 2022 all migrants have left the logistics centre, either as a result of the IOM voluntary return programme or in another attempt to cross the border to the EU. The exact number of migrants across Belarus (excluding the logistics centre) is unknown, however, estimated in the low hundreds by the Belarus Red Cross, UNHCR and IOM. People are accommodated in centres in both Lithuania and Poland. **In Lithuania**, 1,551 people are held in five centres, pending asylum application processes, with the number of cumulative arrivals amounting to 4,465 according to the [Lithuanian Ministry of Interior](#). Since August 2021, according to reports, 8,200 persons have been pushed-back from the Lithuanian borders. **In Poland**, people are held in detention centres¹ managed by the Polish Border Guard. Some of the migrants who have arrived from Belarus during the past year were also placed in open centres run by the Office for Foreigners. Reports indicate that attempts to cross the border between Belarus and Poland are [continuing](#), but at a significantly decreased rate. Humanitarian needs, human rights violations and operational constraints continue to be in the focus of concern. Following the increased number of attempts of border crossings and political tension at the EUs Eastern borders starting since the summer 2021 and in response to EU MS calls for stricter border control measures, the EC has published a number of legislative changes. These include: proposed emergency measures in the areas of asylum and return for Poland, Lithuania and Latvia, the revision of the EU Schengen Border Code as well as a proposed Regulation addressing the situation of instrumentalization in migration and asylum. All three proposals, together with the ones already included in the EU Pact on Migration and Asylum, risk further undermining migrants' fundamental rights at EU borders, notably the right to asylum and the principle of nonrefoulement. In practice, these proposals [might further exacerbate](#) the already serious humanitarian consequences on migrants and can lead to vulnerable groups at risk of not receiving critical assistance and protection measures..

In Belarus, the situation has eased, with no influx of significant number of migrants observed. The number of migrants staying in Belarus has also reduced significantly due to repatriation flights, through which 3,817 Iraqi migrants have been repatriated from Belarus and 112 from Lithuania, as well as the IOM Assisted Voluntary

¹ No up-to-date figure available, as the Polish Border guard stopped sharing the information publicly. January 2022 data: 1,675 migrants with 972 persons staying in detention centres for families and the rest in those for men.

Repatriation and Reintegration Programme, which assisted around 400 migrants to return from Belarus to their countries of origin in the last year. Although there are reported attempts to cross the border into the EU through Poland, Lithuania, and Latvia, they are limited in number and scale due to harsh winter conditions, and, in general, the strengthened border protection measures. There were occasional reports that the migrants attempted to cross the border in April – July, but there is no such scale as in the end of 2021. However, the situation is monitored as it might develop again.

In Lithuania, the reports by the State Border Guard Service shows a significant decrease of irregular border-crossings during the last six months. According to the official statistics of the Migration Department under the Ministry of the Interior of the Republic of Lithuania, 135 people, who irregularly entered Lithuania from Belarus, had their asylum application approved and 80 people received Temporary Residence Permit cards. On the other hand, 2,703 asylum claims were rejected, while 596 procedures were suspended. According to the Ministry of Social Security and Labour, 1,134 migrants have returned to their countries of origin from Lithuania, 1,048 of whom did so voluntarily. There are currently 1,551 foreigners living in five reception centres. By the end of 2021, the Lithuanian government introduced new legislation that allowed to detain migrants in irregular situation for up to 18 months, with a decision taken every six months. However, in May 2022, Lithuania's Ministry of Interior announced that the restriction would not be extended for another six months, and migrants would be asked to leave the country. In late May 2022, reception centres' administration began issuing permissions allowing migrants to temporarily leave reception centres. 4 out of 5 migrants who have received permission to temporarily leave reception centres were reported to have never returned to the facility with their whereabouts unknown. On 30 June 2022, the Lithuanian Government introduced changes to the Law on The Legal Status of Aliens. The amendment allows migrants, who arrived in Lithuania by crossing the Lithuanian border from Belarus, to seek for employment, under the condition that their arrival to Lithuania has been registered within the Migration department system for 12 months. Although many people arrived in Lithuania in the summer 2021, they were registered within the system later than their arrival. This means that several people will be forced to wait approximately until September to be able to access the labour market.

In Poland, the reports by the Polish Border Guard reported a significant decrease of the daily attempts (from 500 to 35) to cross the Polish border between mid-December 2021 and mid-January 2021 from the side of Belarus, due to harsh weather conditions, such as low temperature, strong winds, and high precipitation. Some people are pushed back to Belarus, while some who ask for asylum in Poland, especially families or ill persons, and are transferred to detention centres. As of the last officially communicated figure (in February 2022), there were 1,675² persons in the detention centres. At the moment, the Polish Red Cross (PRC) has access to one detention centre in Podlasie region, and is allowed only to deliver goods.

Summary of response

Overview of the National Societies and ongoing response

Belarus

Belarus Red Cross (BRC) was established in 1921 and is the largest humanitarian organization in Belarus, present in all 158 districts of the country. BRC works in humanitarian aid (including COVID-19 response), home-based care and active ageing, community mobilization, health promotion and disease prevention, and the integration of refugees. Two regional branches, the HQ, 30 staff and 180 volunteers are involved in the response. A [DREF Operation](#) was launched on 16 November 2021.

To be able to continuously provide necessary assistance to migrants, BRC launched a fundraising campaign. Various organisations and public associations from all over the country, as well as the population have joined this campaign. Local donations included 200 tons of humanitarian relief items and around BYN 30,000 which were

² As of February 2022

later used for support activities. All offices of the Belarus Red Cross were mobilized; volunteers were involved in the work of receiving, sorting, forming kits and shipping aid.

The BRC works closely with government agencies and international organisations to coordinate efforts and further operational assistance. The BRC had access to people at the border and acted as a leading organisation in providing humanitarian assistance to the migrants in Belarus. The BRC was in contact with the State Border Committee since August 2021, providing first occasional assistance to migrants with relief items (food parcels, hygiene items, clothing, blankets, Personal Protective Equipment (PPE) and referral to health services (in the border area and logistics centre). Since the escalation at the border, the BRC assisted over 2,000 migrants with relief items and restoring family links (RFL), medical aid and post-natal care for new-borns and their mothers. With most migrants in the border region concentrated at the logistics centre, the BRC was focusing on the delivery of assistance (food, non-food items (NFI) and RFL) at the location.

Daily food distributions were taking place that also included a hot meal for lunch. The need for household items (warm clothing, blankets, etc.) was largely covered. Remaining gaps were covered on a case-by-case basis. Hygiene items and COVID-19 protection materials were provided on a regular basis. The BRC was also distributing additional assistance provided by other organisations through their set-up and emergency team. The Grodno branch of BRC activated a crisis room for post-natal care for new-borns and their mothers. The BRC continued to work on the provision of a mobile phone charging facility to assist RFL, overcoming hardware and permission constraints. The number of people staying in urban centres in Belarus could not be verified, as they rarely presented themselves and asked for assistance. When possible, they were assisted with food parcels, hygiene kits, personal protection equipment, warm clothes and footwear, COVID-19-related information, psycho-social support and restoring family links assistance.

Partner National Society support

The BRC received bilateral support from the **Danish Red Cross** (approx. EUR 30,000 through the emergency request mechanism for the replenishment of 500 sleeping bags, 1,000 rugs and 1,000 blankets, and fuel used by the BRC to deliver assistance to migrants), as well as the **Turkish Red Crescent Society** (in-kind donations). The **ICRC** was supporting RFL activities and deployed a RFL delegate.

Lithuania

The Lithuanian Red Cross (LRC) was established in 1919 and is present country-wide with 15 branches. 26 staff members and 324 volunteers are involved in the migration response. The LRC is mainly active in providing nursing and psychosocial care to older people, advocacy, first aid trainings, assistance to refugees, asylum seekers and migrants, providing humanitarian aid, and responding to the COVID-19 pandemic. Since 2004, LRCS has been a reliable implementing partner of UNHCR in Lithuania, ensuring the provision of professional legal assistance to refugees. Since 2010, thanks to an agreement with the State Border Guard Services and UNHCR, the LRCS has monitored reception conditions and appropriate implementation of asylum procedures. In addition, it has organised trainings for guard officers on how to interact with migrants at the border during the first 72 hours and contributed to the courses organised by UNHCR on international protection standards and the rights of asylum seekers directed at judges and lawyers, especially those participating in the Government's legal aid scheme. In June 2020, the LRC signed an agreement with the State Border Guard Service to expand its activities and deliver protection aid and monitoring assistance to all migrants in detention, including at border crossing points.

Since the early summer of 2021, the LRC has been providing humanitarian assistance in reception centres, border control and border crossing points to an increasing number of arriving migrants. Over 4,500 people have been assisted to date with clothing, hygiene, and food parcels, psychological first aid, community engagement, legal advice, translation, RFL assistance and provision of medication and medical care. The LRC has also received financial (approx. CHF 42,560) and in-kind (worth approx. CHF 410,440) donations from businesses and the general public, including in-kind assistance of clothes, food, hygiene items, toys, household items and provides in-cash assistance for specific migrants' needs.

As more people are allowed to temporarily leave reception centres, the Lithuanian Red Cross organises information sessions on preventing sexual abuse and exploitation, human trafficking, and general safety.

Additionally, LRC organises individual and group mental support sessions, distributes food parcels provided by partner NGO Food Bank Lithuania, organises collective activities and sports events in reception centres.

Since 24 February 2022, however, the main focus of the domestic response to the population movement has shifted to the developing humanitarian crisis in Ukraine. Between 25 February and 21 July 2022, the Migration Department recorded 59,595 arrivals from Ukraine, including 22,704 children. LRC is helping the Government with running registration centres for refugees from Ukraine, searching for accommodation, providing legal assistance, psychosocial support, First Aid, information provision, RFL activities, food, emergency voucher and WASH assistance, covering emergency medication expenses, running Hotline and Helpdesk in 15 branches.

Partner National Society support

The LRC has received financial support from:

- **Iraqi Red Crescent** (USD 10,000) to provide Iraqi families with humanitarian support.
- **German Red Cross** (EUR 100,360) for purchasing 1,800 units of hygiene kits, psychosocial support kits and medical equipment (electrocardiograph, urinalysis analyser, haematological analyser, and CRP analyser) to be distributed in 5 main reception centres, vehicle for the LRC staff and volunteers working in the reception centres daily.
- **Italian Red Cross** (EUR 25,000) for purchasing laptops for the LRC staff involved in the operation as well as salary contribution of staff responsible for advocating for migrants' rights.

Poland

The Polish Red Cross (PRC) was established in 1919 and is present country wide. The PRC works in the areas of dissemination of international humanitarian law, restoring family links and tracing assistance, voluntary blood donation, social care and assistance to vulnerable groups, health and environmental sustainability promotion, first aid training, education programs, and providing humanitarian assistance in crises and disasters domestically and abroad. The PRC utilises in the operation the psychosocial support capacities it has recently developed through the [EU-funded BaltPrep project](#).

The PRC has been actively responding to the situation and has expanded its activities since the beginning of October 2021 by providing clothes, food and hygiene items, first aid provision and referral to health services, restoring family links assistance as well as public communication. With the donations received domestically and from Movement partners, the PRC has been able to prepare aid packages for migrants consisting of warm clothes, shoes, a sleeping bag, a blanket, water, high-energy food, hygiene products, and cleaning products. The PRC is also providing support to different NGOs and activist groups via local distribution points. 14 stations and one detention centre have received leisure equipment which consists of board games and books to prepare a play area for children. In 17 stations and one detention centre, 187 school kits (consisting of art supplies and stationeries) and 400 sleeping kits (consisting of a blanket, a sleeping bag, and a sleeping mat) were provided.

These packages are made available at Local Distribution Points that are located at the border of the closed zone. Such local distribution points are also available to other NGOs that assist migrants. The aid items are also delivered to refugee centres (open and closed). So far, the PRC has provided in-kind assistance donated to them domestically worth PLN 610,440 (approx. CHF 138,000) and fundraised PLN 148,113 (approx. CHF 34,000) from domestic sources. The PRC had over 100 volunteers, 20 staff members, 2 branches and the HQ involved in the operation. A [DREF Operation](#) was launched on 16 November 2021 and made part of the Emergency Appeal a week later. The PRC signed a Memorandum of Understanding with the Border Police late last year to allow for the Search and Rescue volunteer groups to provide life-saving assistance and humanitarian aid to migrants being stranded in the area of seven Border Guard Posts. In the reporting period, a new agreement has been signed with Polish Border Guard that allows PRC to provide livelihoods support to migrants in 17 PLBG stations and 1 detention centre.

Partner National Society support

The PRC has started a programme in cooperation with the **German Red Cross** aiming to support people affected with food and clothes packages. Since its start, migrants in detention centers in Wędrzyn and Kętrzyn received clothes, sleeping utensils, power banks, and hygiene kits (up to 1000 people received assistance.)

For a summary on other state and non-state actors' response, please refer to the [Operational Strategy](#).

Needs analysis - update

Needs analysis

The total number of people affected by the situation has decreased and is now estimated to be up to 10,000 people. The Emergency Appeal aims to assist an initial 12,000 people. This target number will likely be reduced in future revisions of the Operational Strategy, but also include a buffer for new arrivals and increased caseloads, informed by ongoing scenario work. The Emergency Appeal has a special focus on vulnerable and at-risk individuals, including unaccompanied minors and single women with children. Needs are informed by monitoring activities in the centres where migrants are being held. For people at the borders and on the move, the general immediate life-saving needs are clear, while longer-term needs will depend on how the context evolves. Across the countries, the migrants' access to medical care and health services is insufficient (such as immunisation, sexual and reproductive health, maternal and child health, management of noncommunicable diseases, disabilities, and communicable diseases).

Belarus

In Belarus, there was a need to continue responding to the immediate and basic needs of migrants in the logistics centre. Albeit their number reduced, and the migrants have dispersed from the logistics centre, the overall scenario and needs have not changed significantly. While still operating, the facility was considered as not suitable for longer-term stay, due to the sanitary situation, lack of privacy and lack of access to communication were the main areas of concern. The local authorities in Grodno were exploring possibilities to accommodate the migrants at a tourist facility, however, were not able to cover the involved costs.

A migrant needs assessment questionnaire was developed in 5 languages (English, French, Kurdish, Arabic, and Russian) with the support of the ICRC, IFRC, and UN agencies. From 22 to 27 November, 340 migrants, of whom 160 were women, were interviewed by the Belarus Red Cross staff at the logistics centre. The needs for food and water, hygiene products and clothing, security and medical care as well as restoring family links services were identified during the assessment. As a result, a priority food parcel, hygiene items and necessary clothing were formed, as well as the need for health care and restoring family links services were identified.

Between 20 and 24 January, with the technical support of the International Federation of Red Cross and Red Crescent Societies and the International Committee of the Red Cross, migrant registration was carried out at the TLC Bruzgi. The registration form was prepared and translated into 4 languages (Kurdish, Arabic, Russian, English) and considered main issues related to demography as well as issues of Belarus Red Cross partners. After registration, cards with QR codes (family codes and individual) were generated and were used to dispense humanitarian aid. A total of 784 people were registered, composed of 342 men, 157 women, and 285 children.

Lithuania

Migrants who have not had their asylum applications approved or their applications have been rejected but are now allowed to leave reception centres, need assistance in finding accommodation and access to basic needs, such as food, hygiene supplies, and medicine. Additionally, migrants will need support in accessing the labour market and find employment. Those who are not allowed to seek for employment due to restrictions set out in the Law on The Legal Status of Aliens, will need long-term support, including voucher assistance.

Poland

Based on interviews with migrants and border guard officers in control of detention centres, new needs have been identified, apart from those mentioned in the Operational Strategy: children in detention centres have access to teachers but do not have school supplies. The PRC responded by providing 187 school kits (art supplies and stationery) in 17 stations and 1 detention centre.

Operation Risks Assessment

For a detailed analysis, please refer to the [Operational Strategy](#).

OPERATIONAL STRATEGY

Update on the strategy

Regional Summary

In the remaining period of the Emergency Appeal, the Operational Strategy outlined in the EA will remain. The National Societies continue to provide support to migrants where needed and the asylum applications of migrants, especially those in detention centers, are continuing to be processed and the needs of these people will be met as per the National Societies operational strategies. All National Societies under this Appeal are since February 2022 also responding to the refugee situation triggered by the Ukraine crisis, with needs that vastly outnumber the previous context in and around Belarus. Poland Lithuania and Belarus are currently hosting more than 2 million refugees from Ukraine in total. This has resulted in some shifts in focus and synergies around work with migrants and displaced and is outlined in this Operational Update.

Belarus

The main strategic directions of the Belarus Red Cross efforts in providing support to migrants were

1. Provide humanitarian aid distribution services to vulnerable migrants through:

Providing humanitarian aid to migrants according to their necessities, such as food, water, and hygiene products.

Twice a day, staff and volunteers of the Belarus Red Cross delivered food to the logistics center. Two hot meals a day were provided for migrants: breakfast - tea, biscuits, eggs (yoghurt, tea, biscuits, fruit – for children), lunch - hot porridge with stew or sausages. For supper - a dry pack (food parcel): drinking water, bakery products, biscuits, instant porridge/vermicelli/mashed potatoes; for children - baby food, tinned food, waffles, juice.

Over the entire period of the operation, humanitarian aid was provided as follows:

Between 9 November 2021 and 21 March 2022, a total of about 268.59 tons of aid was distributed to migrants at the Belarusian-Polish border: 213.44 tons of food, including milk and food parcels, 18.92 tons of water, as well as warm clothes and footwear (over 14,900 units), plaids, blankets, sleeping bags, mats, pillows, towels (about 6,000 units), mattresses (800 units), masks (60,000 units), hygiene products (11,679 kg), toys and stationery (about 1,860 units), 350 sweet gifts.

2. Provide health services to vulnerable migrants through:

First aid and psychosocial support.

The Belarus Red Cross staff and volunteers were in constant contact with migrants. First aid and psychosocial support were available when needed, including engaging English- and Russian-speaking migrants to improve communication. During the response, the number of registered first aid cases was 35. However, the main cases were related to treating and bandaging abrasions and minor wounds and helping with fainting. Despite the language barrier, the provision of psychosocial support to migrants by the Belarus Red Cross staff was encountered on a daily basis with more than 1,700 people receiving this type of assistance. Most of the psychosocial support activities focused on women and children.

3. Provide basic services and coordinating with state authorities in terms of assistance to vulnerable migrants through:

Interaction with state authorities on assistance to migrants

The functions between the Belarus Red Cross and the state authorities were outlined. Representatives of the Belarus Red Cross participated in the meetings of the Commission on Emergency under the Grodno Regional Executive Committee, providing information on the scope of assistance provided.

- Interaction with organizations, public associations, international partners to support the activities of the Belarus Red Cross in providing humanitarian assistance to migrants.
- Launch of a charity campaign to collect cash and in-kind donations from individuals (200 tons of relief items and around BYN 30,000).
- Ensuring sustainable work of volunteer response teams of the Belarus Red Cross to assist migrants (conducting targeted training for staff and volunteers on response and assistance to migrants, prevention of psychological and emotional burnout; providing volunteers and staff with equipment, personal protective equipment and means of response (3 air tents, 2 gasoline generators, 2 heat guns, 22 mobile air conditioners, 2 air recirculatory, cot, inflatable mattresses - 10 pcs., 4 thermos pots, 4 sets of folding furniture (table, chairs, bench), spotlights, compressor, disposable dish wear, plastic bags); provision of fuel, maintenance and repair of vehicles involved in humanitarian aid response; creation of humanitarian aid stockpile in case of scaling up of the situation).

4. Provide RFL services to vulnerable migrants through:

- Informing migrants about the activities of the Belarus Red Cross on restoring family links (RFL) activities, identifying existing RFL needs and organizing activities for the provision of RFL services.
- Phone charging equipment was purchased: 5 chargers, 7 smartphone charging trolleys, and volunteers and Belarus Red Cross staff were on duty to provide charging stations for migrants.
- At the same time, there were 9 cases of RFL needs. The majority of migrants, however, needed to charge their phones and flash drives in order to keep in touch with their loved ones and keep up to date with the news. A total of 315 households were provided with the service of charging a mobile device or a flash bank at least once. The number of people who received this type of assistance was 569.

Lithuania

In Lithuania, the operation targeted up to 4,000 migrants at the Lithuanian border who are staying in the terrain along the Lithuanian-Belarusian border, pending regular access by the authorities (this number is an estimation over the period of the operation). Another targeted group are around 4,000 migrants in five reception centres in Lithuania (Kybartai, Rukla, Naujininkai, Pabradė, Medininkai), including a smaller number still held at border control points, pending moves to the main centres. A third group include migrants in Lithuania who are not accessing asylum processes and/or are on the move.

1. Provide RFL services to vulnerable migrants through:

In Lithuania, 1,551 people are held in five centres, pending asylum application processes, with the number of cumulative arrivals being equal to 4,465. Since August 2021, 8,200 persons have been pushed back from the Lithuanian borders, according to reports.

Poland

In Poland, the operation aims to assist up to 300 people in need in open terrain outside the closed border zone reached through search and rescue activities following their request for assistance or as found during search and rescue missions. Moreover, 4,000 people are being assisted in migration centres for foreigners near the emergency zone waiting for asylum decision or after positive migration status approval as well as migrants in detention centres awaiting asylum decision (depending on the access being granted to these facilities).

1. Provide health services to vulnerable migrants through:

- PRC has trained 75 involved volunteers in psychosocial support (PSS). PSS services were provided during humanitarian aid distribution, SAR activities and during RFL visits in migration centers, 300 persons received PSS support. Books, leaflets, and other materials were prepared to provide same level of care everywhere, based on IFRC psychosocial support materials and guidelines.

2. Provide humanitarian aid distribution services to vulnerable migrants through:

Leisure equipment, toys and school supplies were procured and distributed in July 2022: PRC provided 187 school kits (arts and stationery) in 17 stations and 1 detention center. The kits consist of books, board games, sport equipment, and backpacks filled with school supplies. Because of the different age groups in the facilities, every item was chosen with particular emphasis on different stages of a child's development and safety regulations.

Specialized food rations (MRE) were procured and prepared in case the population flow reaches the same peak as in September-October 2021. Rations were prepared in line with cultural and religious restrictions and specially adapted to nutritional needs of minors. Due to the massive population movement from Ukraine in the end of February 2022, those rations were urgently sent to Ukraine, with the consent of IFRC. People in detention/migration centres are regularly provided with food, at least 3 times a day. The only requests from people in detention centres regarding food support that PRC received, were focusing on dried nuts, dried fruits and sweets which may suggest that food supply in those centres is on a good level.

DETAILED OPERATIONAL REPORT

 Shelter, Housing and Settlements		Number of people targeted:		Belarus	Lithuania	Poland
				5,000	4,000	N/A
Objective:	<i>The safety and well-being of people affected are strengthened through shelter solutions</i>					
Key indicators	Belarus		Lithuania		Poland	
	Actual	Target	Actual	Target	Actual	Target
	# of people receiving emergency shelter and household items / humanitarian kits					
	2,280	2,000	4,532	4,000	955	TBD
Belarus:						
<p>The BRC has been in contact with the State Border Committee since August 2021, providing at first occasional assistance to migrants with relief items (food parcels, hygiene items, clothing, blankets, PPE). After the escalation at the border, the BRC has assisted over 2,000 migrants with relief items, including clothing and blankets. The BRC has continued to provide essential items (mattresses, sleeping bags, blankets, towels, warm shoes and clothing, etc.) to the entire population of the logistics centre, where people have been moved to. The distributions have been targeted and tailored to the needs. In total, four accommodation facilities were used in the operation (tents, TLC "Bruzgi", base "Svitanok", and Red Cross Crisis Centre in Grodno), taking into account gender and inclusion. 2,000 migrants received accommodation, including 6 migrant women with 12 children who were accommodated in the crisis room of Grodno branch.</p> <p>In March – June, shelter services (accommodation and meals) were also provided to 920 people who left Ukraine.</p>						
Lithuania:						
<p>Over 4,500 people have been assisted to date with clothing items, including with items procured with the support of the DREF during 2021. During winter, needs for clothing in the centre have been partially covered through donations collected by the LRC, complemented by shoes procured on the market.</p>						

LRC, together with partner NGOs, have already assisted up to 25,000 people arriving from Ukraine with clothing and household items through in-kind donations.

Poland:

Polish Red Cross has been providing clothes and footwear to migrants in Polish Border Guard stations, 955 received such support. To improve living conditions in detention centres and migration centres, PRC provided 3,000 sets consisting of a sleeping bag and a blanket to migrants in migration/detention centres. Recently, priorities have shifted to providing clothes and hygiene kits.

	Livelihoods		Number of people targeted:	Belarus	Lithuania	Poland
				5,000	-	300
Objective:	<i>The basic needs of affected people are covered through food security assistance</i>					
Key indicators	Belarus		Lithuania		Poland	
	Actual	Target	Actual	Target	Actual	Target
	# of people assisted to meet their basic food needs					
	2,280	5,000	6,138	-	300	300

Belarus:

The BRC was distributing food parcels and hot meals in the border area as well as in the logistics centre on a daily basis, after people have been relocated. The nutritional needs for the people at the logistics centre were fully covered with a pre-packaged breakfast/dinner, and a hot meal for lunch. The composition of the meals continued to be adjusted, guided by nutritional value, preferences of the recipients and availability in the local market.

Every day twice a day, staff and volunteers of the Belarus Red Cross delivered food to the logistics centre. Two hot meals a day were provided for migrants: breakfast - tea, biscuits, eggs (yoghurt, tea, biscuits, fruit – for children), lunch - hot porridge with stew or sausages. For supper - a dry pack (food parcel): drinking water, bakery products, biscuits, instant porridge/vermicelli/mashed potatoes; for children - baby food, tinned food, waffles, juice. Over the entire period of the operation, humanitarian aid was provided: Between 9 November 2021 and 21 March 2022, a total of about 268.59 tonnes of aid was distributed to migrants at the Belarusian-Polish border: 213.44 tonnes of food, including milk and food parcels, 18.92 tonnes of water, as well as warm clothes and footwear (over 14,900 units), plaids, blankets, sleeping bags, mats, pillows, towels (about 6,000 units), mattresses (800 units), masks (60,000 units), hygiene products (11,679 kg), toys and stationery (about 1,860 units), 350 sweet gifts. In parallel to this operation, in April – June food items were started to be distributed to people who left Ukraine.

Lithuania:

The Lithuanian Red Cross has been distributing food parcels in the five reception centres since the summer of 2021, reaching 6,138 people as of the end of January, including those who had their asylum granted but are/were facing short-term difficulties. However, on the long term, the focus of the operation has shifted towards specialized needs and assistance. Basic food needs by now are generally covered in these centres by other actors, thus it is not part of the longer-term strategy to distribute food in these locations. Instead, the LRC has started to focus on assisting people in the centres with specialized food needs, e.g., allergies, utilising the funding received from the Irish Red Cross. Food parcels (4,000 kits + 120 kits for children aged 0-3) were also handed over to the Border Guard for distribution in the border zone. At a later stage, in case direct access is granted to the National Society, direct food distribution in the border area may be scaled up again.

Poland:

As mentioned in Shelter, Housing and Settlement, up to 300 migrants in detention centres have received relief packages, which included food parcels, from the PRC. The PRC food parcels are also distributed by other NGOs and the Polish Border Guards.

 Multi-purpose Cash		Number of people targeted:		Belarus	Lithuania	Poland
				150	100	-
Objective:	<i>Basic needs assistance for livelihoods security is provided to the most affected communities</i>					
Key indicators	Belarus		Lithuania		Poland	
	Actual	Target	Actual	Target	Actual	Target
	# of people assisted with cash and voucher assistance					
	0	150	60	100	-	-
Belarus:						
Cash and voucher support related activities were not used in Belarus, however if the need continues, BRC is ready to provide vouchers for food and household items and to cover urgent medical needs for migrants who stay in urban areas.						
Lithuania:						
For people who are granted residence permit based on humanitarian grounds, basic needs arise related to transportation, food, and medical supplies, as well as ensuring their integration. Through the Emergency Appeal, it is planned that 100 people will be assisted with cash and vouchers for covering transportation, food, accommodation, and other needs. To date, 60 people have already been assisted through a fundraising campaign with vouchers for food and accommodation and public transport passes. LRC has also started to work on employability, meeting with potential employers to discuss possibilities for migrants seeking employment.						
Poland:						
Activities consisting of cash support will not be organized due to ineffectiveness in the conditions in which migrants live. Most of them do not have freedom of movement, also detention/migration centers are mostly placed in sparsely populated areas with no access to grocery shops or other facilities.						

 Health & Care		Number of people targeted:		Belarus	Lithuania	Poland
				5,000	3,000	300

Belarus:

The BRC has been in contact with the State Border Committee since August 2021, providing at first occasional assistance to migrants with referral to health services (in the border area and logistics centre). The BRC has been providing first aid to treat injuries and PPE materials.

The Belarus Red Cross staff and volunteers were in constant contact with migrants. First aid and psychosocial support were available when needed, including engaging English- and Russian-speaking migrants to improve communication.

During the response, the number of registered first aid cases was 35. However, the main cases were related to treating and bandaging abrasions and minor wounds and helping with fainting. Despite the language barrier, the provision of psychosocial support to migrants by the Belarus Red Cross staff was encountered on a daily basis with more than 1,700 people receiving this type of assistance. However, most of the psychosocial support activities focused on women and children.

In March – June 2022, assistance on mental health and psychosocial support (MHPSS), first aid and health-related issues support was provided to 140 people who left Ukraine.

Lithuania:

Lithuania RC has assisted 537 people in reception centres since August, covering the costs of medicine for those who need it, to make sure people have access to the medication they need for chronic as well as acute health issues. MHPSS activities have started in October and are maintained continuously. The National Society has also procured and distributed 200 First Aid kits to officers in camps, who utilised them according to the needs. First aid kit stocks have been replenished for repeated distributions as needs arise.

Medical testing equipment has been procured with the support of German Red Cross, to be used in the 5 main centres. The equipment includes: electrocardiograph, urinalysis analyser, haematological (blood) analyser and, c-reactive protein (CRP) analyser.

Poland:

Since early October 2021, until March 2022, the PRC has provided first aid to 86 persons in the field and detention centres, as well as provided migrants with referrals to health services, while 300 persons received MHPSS support.

PRC has trained 75 staff members and volunteers in psychosocial support. During humanitarian aid distribution, RFL visits and Search and Rescue groups shifts 300 persons received PSS. Books, leaflets and other materials were prepared to provide the same level of care everywhere, based on IFRC psychosocial support materials and guidelines.

2 basic PSS trainings were carried out through which 75 members of staff and volunteers have been trained.

PSS was provided to 50 migrants by PRC SAR groups.

Medical assistance/first aid was provided to 64 migrants by SAR groups.

 Water, Sanitation and Hygiene	Number of people targeted:	Belarus	Lithuania	Poland		
		5,000	4,000	4,000		
Objective:	<i>Immediate reduction in risk of waterborne diseases, and diseases related to hygiene conditions</i>					
Key indicators	Belarus		Lithuania		Poland	
	Actual	Target	Actual	Target	Actual	Target
	# of people provided with hygiene items/ hygiene kits					
	2,280	5,000	3,831	4,000	955	4,000

Belarus:

Among other items, Belarus Red Cross has distributed hygiene items in the border area, as well as the logistics centre, and plans to implement hygiene promotion as well as COVID-19 awareness raising activities jointly with the vaccination activities of the authorities to reduce the risk of infection. The distributed hygiene items were covering the full needs of the people for the distribution cycle. The beneficiaries were provided with the necessary range of hygiene products. Drinking water and water for technical needs were supplied daily and bathing days were organized in the field bathhouse. Contracts (to be replenished through the EA funds) were also concluded with public utilities for cleaning of the territory, installation, and maintenance of more than 20 bio-toilets.

1,300 hygiene kits were purchased and distributed, including for women (504 pcs.); 5,800 baby and adult nappies, 100 diapers, 1,850 wet wipes were purchased.

Lithuania:

Over 3,800 people have been assisted to date with hygiene items in the reception centres, and relief items handed over to border guards include essential hygiene items as well. In partnership with WHO, LRC staff and volunteers organise info sessions on COVID-19 prevention and immunisation in the main 5 reception centres regularly. 1,380 diversified hygiene parcels were also handed over to the Border Guard for distribution in the border zone.

LRC has distributed over 25,000 hygiene kits for people arriving from Ukraine procured using fundraised money.

Poland:

PRC has been distributing hygiene kits and cleaning in migration/detention centres, 955 people in detention centres and border guard stations received such support. PRC provided 4,200 hygiene kits, adapted to different genders and age groups, with particular emphasis on marginalized groups and cultural/religious background.

 Protection, Gender and Inclusion	Number of people targeted:	Belarus	Lithuania	Poland

Objective:	<i>Vulnerable and marginalised individuals and groups are assisted and empowered</i>					
Key indicators	Belarus		Lithuania		Poland	
	Actual	Target	Actual	Target	Actual	Target
	# of child-friendly spaces established					
	1	1	10	10	-	3
# of children provided with assistance (used child-friendly spaces / received toys)						
300	TBD	500 children under 10 yrs have access	TBD	239	TBD	
Belarus:						

While providing assistance in the logistics centre, BRC was assessing the situation and needs of people with disabilities. One person received new prostheses (legs). 1,807 items of stationery and toys were purchased and distributed to provide PSS to children. With the support of UNICEF, child-friendly spaces and community-based child protection activities were established.

The BRC has activated a Crisis Room in Grodno for post-natal care for new-borns and their mothers. 6 mothers and 12 children were assisted in total between November 2021 – April 2022.

Lithuania:

As of the end of November 2021, the Lithuanian Red Cross has established two child-friendly spaces in all 5 main reception centres and is providing opportunities for children to attend continuously. Since September, all children have been attending schools within the territory of reception centres, children attend language courses every day, and can attend child-friendly spaces during non-school hours. Activities include drawing, playing, singing and other activities. 'Social clubs' for children and families have been created and events and workshops are organised (e.g., for skill development, as well as social events).

Poland:

School supplies, mascots, and leisure equipment were provided to detention and migration centres. These supplies met safety criteria (in detention centres similar rules apply as in prison). Leisure equipment consist of physical activities equipment but also books and board games. All of those are adapted to culture background and age.

 Migration	Number of people targeted:		Belarus	Lithuania	Poland	
			1,000	2,000	600	
Objective:	<ul style="list-style-type: none"> • Programmes and operations ensure safe and equitable provision of assistance • Specialised interventions for the protection of rights of migrants, asylum-seekers and refugees • National Societies are supported to provide life-saving and tracing/RFL assistance to migrants 					
Key indicators	Belarus		Lithuania		Poland	
	Actual	Target	Actual	Target	Actual	Target
	# of humanitarian service points established					
	8	1	Pending direct access to border area	1	6	6 distr. points
	# of migrants assisted with search and rescue					
-	-	-	-	N/A	300	
# of migrants reached by RFL assistance						
50	1,000	500	2,000	300	800	

Belarus:

The BRC has assisted at least 2,280 people through 8 service points. These were setup at the logistics centre, at the border and wherever people aggregated. Support to BRCS RFL service was provided through the long-standing RFL programming assistance from ICRC. An Arabic/Kurdish speaking specialist (made available by the ICRC) has been integrated into the BRC team to support with specific language skills and cultural insights into the RFL work of the BRC.

BRC also organized "Informing migrants about the activities of the Belarus Red Cross on restoring family links (RFL)" activities, identifying existing RFL needs and organising activities for the provision of RFL services.

Phone charging equipment was purchased: 5 chargers, 7 smartphone charging trolleys, and volunteers and Belarus Red Cross staff were on duty to provide charging stations for migrants.

At the same time, there were 9 cases of RFL needs. The majority of migrants, however, needed to charge their phones in order to keep in touch with their loved ones and keep up to date with the news.

A total of 315 households were provided with the service of charging a mobile device or a flash bank at least once. The number of people who received this type of assistance was 569.

Lithuania:

To facilitate access to charging stations and to help people charge phones, connect with family and friends and access information, three Wi-Fi modems have been installed in Medininkai Board Guards' School reception centre and one Wi-Fi modem in the Naujininkai reception centre. Through these modems, 229 people have been provided access to the internet.

LRC teams continuously monitor the conditions in reception and detention centres and regularly assesses migrants' needs. The LRC has employed four interpreters, to provide interpretation services and make sure that the needs of migrants can be assessed.

Poland:

RFL services have been provided to 300 migrants in detention/migration centres. All involved volunteers and staff had been informed about RFL services rules and capabilities. SAR groups and RFL staff of PRC were spreading awareness about RFL services through people in population movement but also through detention centre staff and border guards. Around 10,000 information leaflets will be produced and distributed, some have been already distributed.

Regional activities:

IFRC has provided support to the National Societies on good practices and Movement principles related to assisting and protecting migrants and displaced people.

On 11 December, IFRC Regional Office jointly with the ICRC organised a 1-day online training for the Polish RC on preparedness for migration response (including response planning and mobile team concept and implementation). The Search and Rescue volunteers, tracing volunteers and staff of the PRC (20 participants) learned about the contingency planning process and received guidance for minimum of protection actions, RFL and dialogue with the authorities. The Red Cross Society of Bosnia and Herzegovina and the Red Cross of the Republic of North Macedonia shared their lessons learned and recommendations on mobile team concept based on their experiences in the migration context. The Red Cross of North Macedonia has also shared their experiences with the Lithuanian Red Cross in an exchange organised by the ICRC on 18 January 2022.

Enabling approaches

National Society Strengthening

Objective:	<i>National Societies have strengthened capacities, systems and procedures, that enable to prepare for and respond to the crisis</i>						
Key indicators	Belarus		Lithuania		Poland		
	Actual	Target	Actual	Target	Actual	Target	
	# of volunteers involved in the operation	180	200	324	1,000	100	200
	# of volunteers who are insured	100% of 180	200	100% of 324	1,000	100% of 100	200
	# of staff and volunteers provided with MHPSS	N/A	250	79	TBD	-	TBD

Belarus:

Around 180 volunteers from two regional branches are involved in the response. Weekly rotations of disaster response teams allowed the pre-trained volunteers to gain valuable operational exposure and experience.

Follow-up lesson learned workshops are planned once the situation allows. Additional logistics capacity, made available by the IFRC Country Cluster Office in Moscow, helped to strengthen systems and procedures at HQ level.

Volunteers and Belarus Red Cross staff from all Belarus Red Cross branches in Grodno were on duty to assist migrants. Volunteers and workers were equipped and visible, provided with accommodation, food, and protective equipment. Representatives of the Belarus Red Cross participated in the meeting of the commission under the Grodno Regional Executive Committee, which functioned in this situation. Responsibilities were allocated to each actor in assisting migrants at the border. At the level of the BRC Secretariat, a group coordinating the activities of the BRC regional branches and other international, non-governmental and state partners was established. This group coordinated procurement, warehousing, and delivery of goods to the Grodno PA. Employees and volunteers carrying out activities at the border were given daily briefings and debriefings for the participants in the operation. A duty schedule was established for staff and volunteers not only from the Grodno branch of the BRC, but also from other regions.

To ensure sustainable work of volunteer response teams of the Belarus Red Cross to assist migrants, trainings were conducted for staff and volunteers on response and assistance to migrants, prevention of psychological and emotional burnout. 180 volunteers and 419 BRC staff were recruited to assist migrants; all of them were trained and received induction and orientation training. Staff and volunteers were provided with equipment, PPE and means of response (3 tents, 2 gasoline generators, 2 heat guns, 22 mobile air conditioners, 2 air recirculators, cot, inflatable mattresses - 10 pcs., 4 thermo pots, 4 sets of folding furniture (table, chairs, bench), spotlights, compressor, disposable dishware, plastic bags. The trained staff and volunteers continued responding to needs of people who left Ukraine, and all the equipment was used accordingly.

Lithuania:

To ensure that all volunteers have access to psychosocial support to deal with the stress and potential psychological burden of providing humanitarian aid to people for a prolonged period of time, 5 PSS group sessions have been organized for volunteers since the beginning of the operation. The total number of volunteers who have been involved in the operation at peak is 324, with currently 150 being active. An insurance framework agreement ensures that all volunteers in the field are covered at all times.

Poland:

Currently 100 active PRC volunteers are involved in the response to the crisis, 20 of whom took part in training with National Society, IFRC and ICRC experts (see Migration section above).

For IFRC efforts in strengthening National Societies, please see the Secretariat services section below.

Community Engagement and Accountability

Objective:

Targeted communities are consulted and are able to share their views about assistance received or planned, and programmes and operations are planned and adapted accordingly.

Belarus:

In Belarus, around the logistics centre, the host communities are not interacting with the migrants. as the migrants are not permitted to exit the area. In other parts of the country, the migrants are few and scattered. The question of community engagement has not arisen yet.

Lithuania:

The LRC's work with host communities consist of positive reporting on migrants in local newspapers, including the reasons people were forced to leave their homeland, their professional skills, daily life in reception centres, ways to integrate them into the society, and the ways local communities can best assist this integration. LRC

aims to attract potential employers' attention so that people who receive asylum are able to find jobs easier, to be able to support themselves, as well as to become a part of the local community. As mentioned above, LRC teams continuously monitor the centres where migrants are located, repeatedly gathering information on the situation and needs of migrants. A regular cycle of post-distribution monitoring has been maintained since the beginning of the operation, and feedback and findings are being used to inform and adjust the LRC's own response. However, feedback is also relayed towards authorities, in case follow-up action and adjustments are requested from the centre management's side.

The LRC organises community engagement, leisure, and other similar activities in Medininkai, Kybartai, and Naujininkai reception centres. Other NGOs are also active in organising activities for migrants across five main centres. Moreover, as State guaranteed legal aid is provided only during the following stages of the application process: preparation of an appeal to the court and representation at the court hearing, migrants have limited access to information regarding their legal status as well as legal consultations, which are mostly covered by local NGOs (mainly the LRC) or private lawyers. Also, Migration Department and courts provide copies of documents containing crucial information on asylum procedures, including decisions, in Lithuanian language. As a result, people are not introduced to the motives of the decisions in the language they understand. European Asylum Support Office (EASO) interpreters are currently assisting the centres in informing migrants regarding their asylum application status.

Poland:

The PRC closely monitors the situation. Needs assessment, conducted with authorities, shows that the aid provided so far to migrants (relief items, RFL and medical assistance) was positively received and assessed by the beneficiaries, who expressed their expectations for more assistance, especially in the area of RFL.

Regional activities:

The IFRC provides support to the National Societies with feedback collection – needs assessments, post-distribution monitoring and satisfaction surveys. A training for National Societies on Community Engagement and Accountability is budgeted for in the funding requirements. A lessons learned workshop was organised with the support of IFRC PMER, led by the Lithuanian Red Cross, scheduled for the end of January 2022, focusing on learnings from the response so far, to be utilised in maintaining good practices, and implementing changes and improvements if and as needed.

Coordination and Partnerships

Objective:

To better articulate the auxiliary role of National Societies and their convening power among a plurality of stakeholders, and accordingly strengthen the IFRC network footprint in the response to the population movement crisis.

The operation so far has clearly shown the unique position of National Societies as auxiliary to the public authorities. Access remains a challenge, but where access has been granted to humanitarian actors, it has been granted specifically for the Red Cross, in some cases exclusively.

Belarus:

In the case of Belarus, the Belarus Red Cross (BRC) remains the only organisation with regular access to migrants on the border and with capacity to reach migrants elsewhere in Belarus through its network of branches. BRC has been requested to be the main coordinator of humanitarian assistance in the country and assistance by several UN agencies in Belarus is largely being provided through and delivered by the BRC, creating expectations for a strong coordination role. Discussions are taking place to formalise the coordination role in an agreement with the Ministry of Foreign Affairs and the State Border Committee. IFRC Belarus Office and the IFRC Country

Cluster Delegation for the Russian Federation and Belarus have supported the BRC in strengthening its auxiliary role. Practically, assistance by several UN agencies in Belarus is largely being provided through and delivered by the BRC, also creating expectations on a strong coordination role.

Lithuania:

LRC, together with other NGOs involved in the operation, had reached an agreement with the Lithuanian State that allowed NGOs to assist people caught at the border between Lithuania and Belarus. At the current stage, this solution enables the Red Cross to hand over hygiene, clothing, and food kits to border guards who then distribute the items to people staying in the terrain along the Lithuania – Belarus border.

Poland:

In Poland, the Polish Red Cross has established a fruitful cooperation with the Polish Border Guards and was granted access to five detention centres and seven border guard stations near the border to better understand the needs and potential interventions that could require more regular access. This was later reviewed to 17 PLBG stations and one detention centre with in-kind donations. The Polish Red Cross has already been one of the key actors providing assistance to migrants in centres and engaging the authorities in ongoing dialogue about conditions and solutions in the centres. In all contexts, there are good examples of cooperating with civil society at large, from coordinating efforts and in-kind donations from the public to seeking humanitarian outcomes together through ‘indirect distributions’ in border areas where access has not been granted.

Regional activities:

IFRC Regional Office for Europe (Regional Office) and IFRC Belarus Office have continued to meet with a wide variety of UN and other humanitarian agencies to discuss the humanitarian situation in the affected countries/in Belarus and potential collaborations. IFRC has also participated in all (seven) coordination meetings organised by DG ECHO for the key international organisations.

Internally, within the Movement, the Regional Office has convened Movement components into joint meetings, to make the most of available resources, find synergies and exchange on both operational and policy/advocacy related matters of common interest.

The Regional Office is engaged in partners’ coordination and resource mobilization activities, including technical support to National Societies in domestic voluntary income generation and capacity building. The Regional Office organised a Belarus and Neighbouring Countries Emergency Appeal Partners’ Call on 25 November 2021 gathering 17 National Societies to get an update of the situation, priority actions and presentation of the Emergency Appeal. Second Partners’ Call took place on 20 January 2022. A Permanent Geneva Mission briefing call took place on 2 December 2021 with the aim to galvanise additional support for the Emergency Appeal. Notably, the Permanent Mission briefing, focusing on traditional IFRC donors, attracted representatives from 22 Nation States, indicating a pronounced interest in the developing context. Financial support has been materialized from 8 countries, including National Societies and governments.

The Regional Office has been profiling the work of National Societies in Belarus, Poland, and Lithuania since the start of the migration crisis. A press release and a joint statement with the ICRC has been published in November, and 13 interviews were organised for the IFRC spokesperson with media, including Euronews and TRT World. Key messages and photos have been nearly weekly in the Newswire, as well as several posts on IFRC Europe social media channels.

Secretariat Services

Objective

To provide a range of quality support services to in-country IFRC member societies with the aim of saving costs and improving efficiency

The Belarus Red Cross is supported through the IFRC Office in Belarus and Russia while for Poland and Lithuania, the Regional Office in Budapest functions as the Country Office. This changed in spring 2022 with the transition of the IFRC Office in Kyiv into a Country Cluster Delegation with a coverage that includes Poland and the Baltic states.

IFRC Regional Office deployed an Operations Manager and a CEA Delegate to Lithuania in August - September 2021. In October, an IFRC Delegate was deployed to Poland to support communications and humanitarian diplomacy for one month. Rapid response surge deployments include Regional Operations Manager (from late November onwards), Operations Manager for Belarus, Regional Information Management Coordinator and Humanitarian Information Analysis Officer for scenario planning (from early December onwards).

A Regional Operations Manager was recruited for the overall Emergency Appeal in January 2022. In addition to surge capacities, existing technical expertise in the Regional Office, the wider region and member National Societies were utilised as needed, until the establishment of the Country Cluster Delegation in Warsaw.

A regional humanitarian diplomacy and advocacy strategy has been drafted as a living document for the Belarus and neighbouring countries population movement. The strategy determines the scope of IFRC support to National Societies in countries directly affected by the situation in their ongoing dialogue with the authorities. The strategy also guides IFRC and National Societies in their positioning and advocacy efforts towards governments and other actors, such as EU institutions and facilitates the use of common messaging for improved humanitarian outcomes. The Regional Office will work with the National Societies to refine the key messages according to the specific issues and conditions faced in the respective country contexts.

A surge Information Management Coordinator for the operation was in place since mid-December and has been working closely with the Belarus Red Cross supporting them in data collection, analysis, visualisation, producing basic maps, conducting needs assessments, process design, etc., as required. The first visit to Belarus took place in late December 2021 to gather information about the context and information needs, and the second one – in mid-January 2022 to develop a registration system (to address the basic information need regarding the number of migrants staying at the logistics centre, their potential vulnerabilities, and needs). The system was tested and rolled out in the third week of January 2022; it was also the basis for the distribution monitoring. The IM Coordinator is in continuous contact with both the National Society and Surge Information Management Support (SIMS) network, assessing the sustainability of the system and potential alternatives/upgrades to be implemented in the following months.

A Humanitarian Information Analysis Officer for scenario planning has started in mid-December 2021 with a focus on the creation of future scenarios regarding the migrant situation in Belarus and neighbouring countries. The initial scenarios were developed in December 2021, based on interviews with Belarus Red Cross, Polish Red Cross, Lithuanian Red Cross, IFRC, ICRC, UNHCR, IOM and UNICEF. The first draft of the scenarios was shared with the concerned National Societies in early January 2022 for comments. They will inform the adjustments to the operational strategy and facilitate preparedness for these scenarios.

The National Societies have received technical support from the IFRC Regional Office in several areas, such as disaster and crisis management, partnerships and resource development, communications, planning, monitoring, evaluation and reporting, including the organisation of a lessons learned workshop, migration, humanitarian diplomacy, cash and voucher assistance and logistics and procurement. The IFRC Regional Office has also supported National Societies in providing insurance for the volunteers.

Impact indicator:	% of assisted people who report that the assistance received was relevant for their needs (composite indicator, based on PDM surveys in multiple sectors in the 3 countries, target: 70%)		
	Belarus	Lithuania	Poland
	<i>PDM data to be presented in final report</i>	<i>Average of 52% satisfaction responses across all sectors</i>	<i>PDM data not available</i>

How we work

All IFRC assistance seeks to adhere to the **Code of Conduct** for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGO's) in Disaster Relief and the **Humanitarian Charter and Minimum Standards in Humanitarian Response (Sphere)** in delivering assistance to the most vulnerable. The IFRC's vision is to inspire, **encourage, facilitate and promote at all times all forms of humanitarian activities** by National Societies, with a view to **preventing and alleviating human suffering**, and thereby contributing to the maintenance and promotion of human dignity and peace in the world
