IFRC network multi-year focus

- Longer-term needs
  - Disaster risk reduction
  - Climate change adaptation and nature-based solutions
  - Health • Water, sanitation and hygiene
- Capacity development
  - Branch development
  - Financial sustainability
  - Communications and advocacy

Key country data

- Population: 17.3M
- INFORM severity rating: Medium
- INFORM Climate Risk Index: Medium
- Human Development Index rank: 170
- Population below poverty level: 46.7%

IFRC Country Cluster Delegation for Cape Verde, Gambia, Mauritania & Senegal, based in Dakar
Participating National Societies

- British Red Cross*
- Spanish Red Cross

*National Societies which have contributed only multilaterally through the IFRC in the first half of 2023.

Funding requirements

Total 5M CHF

- Through the IFRC: 750,000 CHF
- Through Participating National Societies: 679,000 CHF
- Through Host National Society: 3.6M CHF

IFRC Appeal codes

Longer-term needs: MAASN002

Hazards

- Floods
- Droughts
- Food insecurity

IFRC Breakdown

- **300,000 CHF**
  Climate and environment
- **200,000 CHF**
  Disasters and crises
- **100,000 CHF**
  Migration & displacement
- **150,000 CHF**
  Enabling local actors
The Senegalese Red Cross Society was established by law in 1963 and admitted to the International Federation of Red Cross and Red Crescent Societies (IFRC) in the same year. The mission of the Senegalese Red Cross Society is to prevent and alleviate suffering, in all impartiality, without any distinction of race, nationality, class, religion or political opinion.

The National Society is present in the 14 regions and 46 departments of Senegal, and remains one of the leading humanitarian institutions, neutral and independent, and auxiliary to the public authorities. It is active in several areas, including disaster preparedness and response, health, first aid training, searching for missing persons and restoring family links, promotion of humanitarian ideals and values, dissemination of international humanitarian law, and raising awareness of the need to respect the Red Cross emblem and the law protecting the emblem in Senegal.

Since its creation, the National Society has managed more than 20 large-scale emergency operations and assisted a total of more than six million people in Senegal. The National Society has been responding to epidemics, electoral violence, food crises, community health issues, shelter problems, migration and population displacement, accompanying people and helping them to recover from disasters.

The Senegalese Red Cross Society relies on 30,000 volunteers, over 100 national disaster response team members trained in the areas of shelter, water, sanitation and hygiene, health, food security, nutrition, livelihoods and cash transfers, and over 2,500 community disaster response team members. It also has 62 early warning system focal points, 59 focal points for restoring family links present in each departmental committee, 10 migration focal points, and 46 communications focal points.

The National Society’s experience in emergencies has also been demonstrated in the rapid deployment of emergency stocks to people affected by disasters.

In 2021, the Senegalese Red Cross Society reached 2010 people with long term services and development programmes and 2805 people with disaster response and early recovery programmes.

Senegal is bordered by Mauritania, Mali, Guinea, and Guinea-Bissau. It has a dry tropical climate, a total surface area of 196,722 sq. km and a population of 16.7 million, a quarter of which lives in the Dakar region (0.3 per cent of the territory). Senegal’s Human Development Index positions it at 169th out of 191 countries and territories. Growth has accelerated to 6.1 per cent in 2021, up from 1.3 per cent in 2020, driven by industrial production and a recovery in services with the easing of COVID-19 restrictions. However, the recovery was undermined by the conflict in Ukraine, as evidenced by the decline of the growth rate to 4 per cent in 2022.

Imports account for around 70 per cent of the total food supply in Senegal. Inflation reached a multi-decade high of 11.2 per cent in August 2022, driven by rising food prices (17.3 per cent), negatively impacting households. According to the International Monetary Fund, average inflation in 2022 was estimated at 7.5 per cent.

Senegal is exposed to climatic shocks (floods, droughts and associated health risks), which could reduce agricultural productivity and have a negative impact on the recovering tourism industry. Senegal suffers from major environmental problems, some of which are internal and many of which are linked to the degradation of the global environment. The impact of climate change is palpable, particularly in the Sahel region. Senegal has experienced erratic rainfall that has reduced agricultural production. In many cities, the intensity of the rains has caused flooding, including in parts of Dakar.
Senegal has a year-round tropical climate with well-defined dry and wet seasons that result from winter winds from the northeast and summer winds from the southwest. The dry season (December to April) is dominated by the hot, dry harmattan wind. Dakar's annual rainfall of about 600 mm occurs between June and October when maximum temperatures average 30° Celsius and minimum temperatures 24.2° Celsius. From December to February, maximum temperatures average 25.7° Celsius and minimum temperatures 18° Celsius. Inland temperatures are higher than along the coast, and precipitation increases considerably further south, exceeding 1,500 mm per year in some areas.

Climate change is predicted to lead to an increase in average temperatures in West Africa of 1.5 to 4°C by mid-century, compared to the period 1986-2005. Rainfall projections indicate an overall decrease in rainfall and an increase in intense mega-storms in the Sahel. Sea level is projected to rise faster in West Africa than the global average. In Senegal, it is expected to increase by one metre by the end of the century.

Senegal has been experiencing severe flooding in recent years, leading to the implementation of the National Plan for Organization of Relief (ORSEC) in 2019, 2020, 2021 and 2022.

Multi-year high level objectives of the National Society

The Senegalese Red Cross Society seeks to reduce risks related to climate change, and to help preserve and restore terrestrial ecosystems in order to sustainably improve the living conditions of vulnerable populations. The Senegalese Red Cross Society is part of State of Senegal’s vision, through its policy on combating desertification and is involved in the Great Green Wall project. This project will include reforestation activities, resilience building of communities living along the Great Green Wall by setting up income-generating activities, capacity building activities and promotion of social cohesion. This is in line with the IFRC Pan-African initiative on Tree Planting and Care. The National Society also aims to develop a national action plan and contribute to the regional action plan of the food security and livelihoods regional initiative.

Planned activities in 2024

- Integrate climate risk management into all programmes and operations including nature-based solutions and development of early warning mechanisms
- Participate in technical working groups related to climate change and anticipatory action, to promote coordination, partnership and cooperation with the Red Cross Red Crescent Movement in the Sahel region and with external partners
- Establish community-based monitoring mechanisms to strengthen early warning capacities of the communities
- Organize and participate in training for capacity development and strengthening on climate-smart livelihoods
- Produce 10 community climate change risk maps
- Conduct climate change surveys in five priority regions
- Organize 50 awareness campaigns on pollution and emerging diseases related to climate change
- Implement environmental protection and preservation activities through cash for work
- Develop a flood model for the Dakar region

With support from the IFRC, the Senegalese Red Cross began the distribution of food vouchers to nearly 10,000 people in the departments of Goudiry and Bambey, as early response to inadequate rainfall, January 2010 (Photo: IFRC)
Longer-term support from the IFRC network

The IFRC will support the Senegalese Red Cross Society to scale up research and action on climate change adaptation strategies. It will assist the National Society to implement capitalization programmes and disseminate local knowledge. The IFRC will also support the National Society to train communities and stakeholders on specific climate change actions, with the aim of establishing awareness and practices that ensure sustainability.

Disasters and crises

For real-time information on emergencies, see IFRC GO page Senegal.

Senegal contends with an array of natural and humanitarian challenges, ranging from seasonal floods and droughts to locust invasions, all compounded by the overarching effects of climate change. These adversities amplify the country’s vulnerability, particularly in regions such as Dakar, where a quarter of the population resides within a mere 0.3 per cent of the territory.

Among the most pressing concerns are food insecurity and malnutrition, exacerbated by a lack of dietary diversity, food safety, and adequate water, sanitation, and hygiene (WASH) facilities. The World Food Programme estimates that 7.2 per cent of Senegal’s population faces food insecurity, with disparities accentuated by regional resource imbalances, notably in Dakar.

In 2022, the cities of Dakar, Thiès and Matam recorded heavy rainfall totaling almost 500 mm. Assessment reports showed this caused extensive damage, resulting in the destruction of 170 houses and the displacement of 1,396 families. Due to the heavy rains streets were waterlogged, entire neighbourhoods were flooded and cars washed away. Dakar recorded three deaths and the greatest damage among the affected areas. Due to the violent flow of water, the Emergence Bridge and the Keur Massar Bridge collapsed, and the tunnel on the Corniche Ouest was flooded with water.

In addressing these multifaceted challenges, Senegal prioritizes early warning systems, proactive measures, and community engagement to mitigate risks and enhance resilience. The Ministry of Health and Social Action and Civil Protection spearheads disaster management initiatives, including national disaster planning, public awareness campaigns, and coordination of relief efforts.

Planned activities in 2024

- Develop forecast-based action and Early Action Protocols for major flood and drought hazards, in coordination with Movement partners and external stakeholders
- Strengthen community capacity to protect livelihoods from hazards (including cash, health, food security and livelihoods and shelter)
- Ensure access to food through cash transfers for vulnerable households
- Establish 15 processing units for the benefit of groups and associations, as income generating activities
- Distribute food by cash transfer to 5,000 vulnerable households in line with the Government’s national response plan
- Promote the inclusion of the cost of protection and livelihood continuity in the amount of cash and voucher assistance (CVA) to be disbursed
- Distribution of food by cash transfer to 5,000 vulnerable households in line with the government’s national response plan

Multi-year high level objectives of the National Society

The Senegalese Red Cross Society is amongst the first responders to the multiple disasters and crises affecting the country. To maintain and guarantee an expertise in the preparedness, response to and management of emergencies, the National Society has equipped itself with various intervention mechanisms, the most prominent of which are the disaster response teams, at community and national levels. The National Society works in close collaboration with the government’s technical departments including the Ministry of Health and Social Action, and Civil Protection (Ministry of Interior), which is mandated to manage disasters and emergencies.

In the coming years, the focus of the National Society will be on preparedness for effective crisis response, building the resilience of communities to risks. It includes early warning, early action and anticipation to mitigate the risks of multi-hazards negatively affecting the lives, livelihoods, homes and living conditions of vulnerable and hard-to-reach communities. This is in line with the IFRC Pan-African Red Ready initiative.
Longer-term support from the IFRC network

IFRC mechanisms such as the Disaster Response Emergency Fund (IFRC-DREF) and Emergency Appeals will continue to be drawn on as needed for the Senegalese Red Cross Society to respond to disasters and crises.

The IFRC will also support the National Society to strengthen its capacity to better prepare for flood response and in training the rapid response teams in regions most prone to crises and disasters.

The Belgian Red Cross supports the National Societies in the Sahel in disaster preparedness and response, including forecast-based financing and contingency planning.

The British Red Cross supports the Senegalese Red Cross Society in risk reduction and provides financial support for the food security and livelihoods technical group of the Sahel+ Resilience Platform.

Health and wellbeing

Senegal experiences two aspects of malnutrition, with a high prevalence of both undernutrition and overweight/obesity. 21per cent of women of reproductive age are overweight or obese, which can lead to increases in nutrition-associated chronic diseases such as diabetes, hypertension, and cardiovascular conditions.

It is predicted that cumulative impacts of COVID-19 and food insecurity may increase the number of people suffering from malnutrition. Micronutrient deficiencies are alarmingly high, with 71 per cent of children of 6–59 months being anaemic. Among children of 6–23 months, only 10 per cent have been fed the minimum acceptable diet and 14 per cent of children under five years of age are underweight. 41 per cent of children of 0–5 months are exclusively breastfed, and poor maternal nutrition, which is highly prevalent in Senegal, especially among adolescent girls, is associated with an intergenerational cycle of malnutrition and poverty.

Non communicable diseases are a significant health problem in Senegal. The age-standardised mortality rate across cardiovascular disease, chronic respiratory disease, cancer and diabetes was 570 per 100,000 in males and 521 in females in 2021. Malaria is endemic throughout Senegal, posing a universal risk to the entire population. In 2021, approximately 995,763 cases of malaria were reported in Senegal, equating to an incidence rate of 57.6 cases per 1000 people. The mortality rate stood at 59 cases per 100,000 population.

In recent years, Senegal has achieved promising results after implementing the ‘Health Quality Improvement Programme’, which aims to address the shortage of health care providers and medical resources. However, the country still faces significant challenges in human resources, with a shortage of health personnel, particularly in rural and hard-to-reach areas. The Emerging Senegal Plan (PSE), National Health and Social Development Plan and the Health Quality Improvement Programme, all aim to address the deficit of health care providers and medical resources in Senegal.

The Senegalese government has established the Health Emergency Operation Centre, which is tasked with preventing, detecting and responding to health emergencies. As a result, in 2021, civil society organizations, in collaboration with the government, were able to scale-up investment and interventions in epidemic preparedness, as illustrated by the “Projet d’Appui à la Prise en Charge des Crises et Urgences Sanitaires au Sénégal” (PAPCUSS), a feasibility study which made the case for investing US $10.5 million in health emergency and crisis management over five years.

Multi-year high level objectives of the National Society

The Senegalese Red Cross Society’s work in the area of health will focus on risk communications, community engagement and promotion of community-based health services. Community engagement and empowerment will be a key strategy for delivering health information for the prevention of communicable diseases within communities. Senegalese Red Cross Society branches and volunteers will be trained at every stage to improve early detection, contact tracing, social mobilization, advocacy and awareness raising. Additionally, the National aims to continue strengthening its capacity in first aid.

Planned activities in 2024

- Develop emergency psychosocial first aid action
- Develop awareness-raising actions for disease prevention
- Support the establishment of mutual health insurance
- Establish community-based mechanisms to raise awareness and change habits in the fight against malnutrition
- Conduct a feasibility assessment on community-based surveillance
• Provide vulnerable communities with water treatment and conservation items
• Provide vulnerable households with improved latrines and wastewater management facilities

Longer-term support from the IFRC network

The IFRC will support the Senegalese Red Cross Society to train volunteers on enterprise resource planning and psychological first aid.

The Belgian Red Cross, French Red Cross and Monaco Red Cross support the National Society by investing in capacity building and formulation of first aid policy.

Migration and displacement

Senegal serves as a country of origin, transit, and destination for migrants, primarily driven by labor demand in Europe and economic challenges at home. About 4 to 5 per cent of the population lives abroad, with half of them in Europe, particularly France, Italy, and Spain. Irregular migration often takes the perilous Mediterranean route. Intra-regional migration accounts for 46 per cent, mainly to neighbouring countries like the Gambia, Mauritania, and Ivory Coast. In August 2021, Senegal hosted around 14,512 refugees and 2,052 asylum seekers, mainly from Mauritania and the Central African Republic.

Internal migration within Senegal is significant, with nearly 14.6 per cent of the population relocating within the country. Urbanization drives much of this movement, with 70 per cent heading to urban areas, notably Dakar. Violence also contributes to internal displacement, with conflicts displacing 8,400 people in 2020, while natural disasters led to 3,300 new displacements according to IDMC.

Multi-year high level objectives of the National Society

The Senegalese Red Cross Society is part of the IFRC three-year Global Route Based Migration Programme, which aims to improve the safety and dignity of people on the move along deadly and dangerous land and sea-based migration routes across Africa, the Americas, Europe, and the Middle East and North Africa. The programme aims to support 4.7 million people on the move and people in host communities annually through three operational pillars: (1) improving access to assistance and protection, including through humanitarian service points; (2) strengthening National Society capacities; and (3) local to global humanitarian diplomacy.

In recent years, the Senegalese Red Cross Society has also responded to the needs of migrants moving on the Atlantic route, through a holistic response including health services, the provision of non-food items and restoring family links.

Planned activities in 2024

• Raise awareness and conduct advocacy and humanitarian diplomacy for the respect of the rights and dignity of migrants
• Assist and protect migrants regardless of their status through functional humanitarian service points
• Promote professional integration of migrants, piloting and scaling up of programmes aimed at socio-economic integration such as vocational training, employment and income generating activities, for displaced persons, host communities and returnees
• Collect and analyze data to feed into statistics that can help to better understand and map the contours of migration
• Support and accompany families of missing migrants
• Facilitate coordination with internal and external partners on land and sea routes

Longer-term support from the IFRC network

The IFRC will support the National Society with the implementation of its migration programmes, including the Global Route-Based Programme for the Sahel Region. It will support the Senegalese Red Cross Society to provide migrants and returnees with the skills, resources and opportunities to create sustainable livelihoods in their host and home communities and promote community-based initiatives that strengthen local economies, infrastructure and social cohesion. Additionally, the IFRC will assist the National Society to facilitate integration of migrants into host communities and establish migrant listening points and temporary transit centres for returnees.
The Gambian Red Cross supports the National Society to respond to the needs of migrants moving along the Atlantic route through health services, non-food items and restoring family links. The Mauritanian Red Crescent also supports this initiative.

The Italian Red Cross provides financial support to the Senegalese Red Cross Society for the implementation of a contingency plan on migration complementing the Global Route Based Migration Programme.

The Spanish Red Cross supports the National Society to operationalize its programme of assistance and protection of the most vulnerable migrants in West Africa.

As part of wider Movement support, the International Committee of the Red Cross (ICRC) funds the Senegalese Red Cross Society to implement a contingency plan on migration as well as a project for families of missing migrants.

Values, power and inclusion

Violence against children, in particular sexual violence, continues to be a major challenge in Senegal, with an estimated number of 15,000 girls aged 15–17 being victims of sexual violence. In Senegal, 39 per cent of the population lives in poverty, exposing women and children to human trafficking. Senegal was ranked Tier 2 in the Trafficking in Persons Report 2023. The same report also indicated that forced begging is the most prevalent form of trafficking in Senegal as it is seen as an alternative source of income, where street children fall victims of racketeering. According to the United Nations Office on Drugs and Crime, children’s forced begging in Senegal generates 5 billion CFA (USD$8 million) annually. Many children who beg in Senegal are victims of human trafficking. Child sex tourism is prevalent in the cities of Dakar, Saint-Louis, Cap Skirring and La Petit Côte, which are traditionally tourist areas.

According to the 2018 UN Women Global Database on Violence Against Women, 12.4 per cent of Senegalese women had experienced some form of physical and/or sexual violence from an intimate sexual partner in the previous 12 months. According to the latest data, 30.5 per cent of women aged 20-24 years old were married or in a union before age 18. Women in Senegal. According to UNICEF Global Databases, in Senegal, 25 per cent of women and girls aged 15-49 have undergone some form of female genital mutilation. The latest available data (2021) indicates that 16.1 per cent of girls under 15 have been circumcised.

Multi-year high level objectives of the National Society

The Senegalese Red Cross Society aims to pay particular attention to the protection and inclusion of vulnerable groups, and to gender and diversity analysis, through interventions focused on protection, gender and inclusion. It will ensure that all programmes take into account gender, diversity and inclusion in assessments, design, implementation, monitoring and evaluation, and cuts across all activities, including staff and volunteer recruitment. As part of needs assessments, it conducts a gender and diversity analysis in all sectoral responses to understand how different groups have been affected, which then informs the activities. All sectors will strive to meet the IFRC’s minimum standards for protection, gender and inclusion in emergencies.

The National Society also aims to incorporate the minimum actions of community engagement and accountability in each activity in emergency situations.

The Senegalese Red Cross Society also developed and validated its protection against sexual exploitation and abuse policy in the course of 2023, with the aim to:

• Enact a zero-tolerance policy on protection from sexual exploitation and abuse for all its employees and associated personnel, and ensure that the roles, responsibilities and expected standards of conduct in relation to sexual abuse and exploitation are well known within the organization
• Take measures to create and maintain a safe environment, free of sexual abuse and exploitation, in communities where it operates

Planned activities in 2024

• Adapt access to Senegalese Red Cross structures and infrastructure for people with disabilities
• Promote the socio-economic integration and reintegration of vulnerable people, including migrants
• Develop protection and assistance programmes for vulnerable people
• Develop and share key messages in local languages through trusted and accessible channels targeting different audiences within communities
• Set up a mechanism for monitoring the actions taken and adapt the responses according to the reactions of the communities
Longer-term support from the IFRC network

The IFRC will support the Senegalese Red Cross Society to train volunteers on Community Engagement and Accountability (CEA) and Protection, Gender and Inclusion (PGI), as well as to establish complaints management committees in the regions most exposed to tensions and crises and disasters.

ENABLING LOCAL ACTORS

The Senegalese Red Cross is committed to pursuing its institutional strengthening and has carried out the self-assessment part of the Organizational Capacity Assessment and Certification (OCAC) process twice, in 2011 and 2017. The self-assessment is intended to capture the strengths and weaknesses of National Societies as a whole in relation to a wide range of organizational capacities.

Strategic and operational coordination

Multi-year high level objectives of the National Society

- Increase partnerships and coordination with other organizations to reach more vulnerable people
- Establish a resource mobilization unit and develop an accompanying strategy to mobilize resources for core and programme costs
- Strengthen its role as auxiliary to public authorities

Longer-term support from the IFRC network

The IFRC will support the Senegalese Red Cross Society to mobilize funds and other resources, and in the establishment of its resource mobilization unit. It will also support the National Society to strengthen its role as auxiliary to public authorities through alignment of its strategic plans with the various plans of relevant ministries. The IFRC will also assist the Senegalese Red Cross Society to co-create joint programmes with state dependencies.

National Society development

Multi-year high level objectives of the National Society

- Update its volunteer database
- Promote volunteerism in the country, and provide training to volunteers to ensure they have focused capacities in various areas
- Establish partnerships with vocational training and financing structures to support young people, while contributing towards the financial sustainability of the National Society

Longer-term support from the IFRC network

The IFRC will continue to support the National Society with applications to the IFRC Capacity Building Fund. It will support the National Society to strengthen financial management within its branches to increase organizational efficiency. It will also provide the Senegalese Red Cross Society with technical support for other aspects of organizational development, including capacity building. The British Red Cross, Italian Red Cross and Turkish Red Crescent also support the National Society in organizational development.
Multi-year high level objectives of the National Society

- Increase its visibility through communications and public advocacy
- Develop internal and external communications mechanisms
- Develop a harmonized visual identity, focusing on the Senegalese Red Cross logo and emblem
- Optimize the Senegalese Red Cross Society website

Longer-term support from the IFRC network

The IFRC will support the Senegalese Red Cross Society in its humanitarian diplomacy and public communication efforts. It will also leverage its international organization status to relay advocacy messages at regional and global levels.

---

Multi-year high level objectives of the National Society

- Develop a strategy to mitigate the risks of fraud and corruption, sexual harassment, exploitation and abuse
- Strengthen its financial management
- Focus on digitalization, providing local and regional structures with computer equipment and high-speed connections

Longer-term support from the IFRC network

The IFRC will provide financial support to the Senegalese Red Cross Society to strengthen its Integrity Framework. It will provide technical support and expertise to reinforce the National Society’s existing control and prevention mechanisms and systems, to increase accountability. The IFRC will also assist the National Society in developing a robust mechanism for monitoring.

Country plan • Senegal

THE IFRC NETWORK

The IFRC

The IFRC has a country cluster delegation in Dakar, which has legal status with the government. The IFRC’s support to the Senegalese Red Cross centres on strategic and operational coordination, National Society development, and humanitarian diplomacy. It also supports accountability as a cross-cutting theme. The IFRC supports the National Society in strengthening its auxiliary role by meeting key stakeholders at government level on a regular basis. In recent years, the IFRC has supported the Senegalese Red Cross through a number of Disaster Response Emergency Fund (DREF) operations in relation to floods, food insecurity and population movement.

IFRC membership coordination

IFRC membership coordination involves working with member National Societies to assess the humanitarian context, humanitarian situations and needs; agreeing on common priorities; jointly developing common strategies to address issues such as obtaining greater humanitarian access, acceptance and space; mobilizing funding and other resources; clarifying consistent public messaging; and monitoring progress. This also means ensuring that strategies and programmes in support of people in need, incorporate clarity of humanitarian action, links with development assistance, and efforts to reinforce National Societies in their respective countries, including through their auxiliary role.

The Senegalese Red Cross is part of the Sahel+ Resilience Platform and holds the position of Permanent Secretariat of the platform. This platform, created in 2018, includes a steering committee and three technical groups - on food security and livelihoods, migration and housing - which bring together designated focal points and technical staff from Movement components that are part of the overall resilience platform. Their ambition is to create a common understanding and vision among members, increase communications, information generation and capacity, and shape a collective voice through common advocacy tools and messages.

The regional food security and livelihoods initiative, under the umbrella of the Sahel+ Resilience Platform+, is supported by the following partners: IFRC, ICRC, British Red Cross, the Red Cross Red Crescent Climate Centre, and the IFRC Livelihoods Centre, hosted by the Spanish Red Cross.

A number of participating National Societies have established long-term partnerships with the Senegalese Red Cross, and also provide support in emergency operations:

The Belgian Red Cross supports the National Societies in the Sahel in community monitoring, health, disaster preparedness and response, including forecast-based financing, contingency planning and deployment of additional capacities in four National Societies. In addition, the Belgian Red Cross plans to work on strengthening the capacity of the Senegalese Red Cross in first aid.

The British Red Cross supports projects in risk reduction, food security, migration and organizational development. It also financially supports the food security and livelihoods technical group of the Sahel+ Resilience Platform.

The French Red Cross participates in the emergency migration plan of the Senegalese Red Cross and provides support through decentralized international action, by sending many students to the Senegalese Red Cross Society’s training centre in Thiès. It also plans to support the capacity building of the National Society in first aid.

The Italian Red Cross supports the National Society in organizational development and migration.

The Monaco Red Cross plans to support the capacity strengthening of the National Society in first aid.

The Spanish Red Cross works with the National Society mainly on migration (part of a regional programme), livelihoods and food security, women’s rights and health. It has a presence in the Casamance region. It also contributes to capacity building in preparedness and disaster risk reduction, as well as food security and climate-smart livelihoods through the Livelihoods Centre.

The Turkish Red Crescent supports organizational development projects, and social and solidarity actions.

### Movement coordination

The Senegalese Red Cross Society ensures regular exchanges with the IFRC, the International Committee of the Red Cross (ICRC) and participating National Societies, for the alignment of support and action between Movement partners. In times of emergencies, closer coordination is organized. This is carried out in line with the Strengthening Movement Coordination and Cooperation (SMCC) principles, and the newly-adopted Seville Agreement 2.0.

The ICRC, through its regional Delegation in Dakar, assists victims of violence in Casamance and visits detainees. It promotes international humanitarian law and encourages its implementation. It also makes the voices of people affected by armed conflict heard through advocacy with political decision-makers and civil society.

### Coordination with other actors

In line with its auxiliary role, the Senegalese Red Cross Society works closely with the public authorities. The Senegalese Red Cross Society is well recognized for its community base and its ability to mobilize rapid response and relief teams. Its status as auxiliary to the public authorities is one of the characteristics that facilitates and necessitates its presence alongside state and non-state partners in the coordination platforms.

In Senegal, the management of natural disasters is entrusted to the Directorate of Civil Protection, hosted in the Ministry of the Interior. The Senegalese Red Cross Society, as a partner of this structure, is called upon to deploy response teams. In the aftermath of the 2022 heavy rains, the President of the Republic activated the National Plan for Organization of Relief (ORSEC) which includes the Senegalese Red Cross Society in the relief and rescue component, alongside the fire brigade and the hygiene services. This enabled the coordination of assistance actions with the various government services, local authorities and actors working in the response to the floods.

The ORSEC plan is launched by the government when the scale of a disaster is at red level and the response capacities of local authorities are overwhelmed. At management level, the president of the Senegalese Red Cross and the operations coordinator participate actively in all meetings with the Minister of the Interior to define the intervention strategy and monitor its implementation. For coordination, the presidents of the local, departmental and regional National Society committees participate with the administrative authorities in meetings to monitor the situation, and in regional and departmental committees with governors and prefects for the coordination of actions, the harmonization of interventions and the mapping of actors.

The Senegalese Red Cross Society is also partnering with the Ministry of Health in the provision of personnel, capacity building, logistics support (rolling stocks), and project and programme funding. With the Civil Protection, the partnership includes support to the National Society in disaster preparedness and response activities, and capacity building.

The National Society is increasingly engaged in coordination and planning platforms in Senegal, such as the Humanitarian
Country Team, and the various sectoral coordination groups and thematic groups. The Senegalese Red Cross Society is integrated in the humanitarian and health coordination platforms, such as community surveillance, the Executive Secretariat of the National Food Security Council, the harmonized framework, and the household economy analysis working group.

Other partnerships include various United Nations agencies for project and programme funding; USAID for emergency health projects, funding for disaster preparedness and response projects, and flood management; Practical Action for strengthening of the operational capacities of the intervention teams, and funding for disaster preparedness and response projects (floods).

IFRC’s partnerships with the private sector, including the Coca Cola Foundation and Nestlé, have enabled the Senegalese Red Cross Society to expand its work in emergency health and water, sanitation and hygiene interventions, as part of the COVID-19 response.
The International Federation of Red Cross and Red Crescent Societies (IFRC) is the world’s largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 15 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

This plan reflects the priorities of the Senegalese Red Cross Society, the IFRC and National Societies providing international support, for 2024 and subsequent years. It is aligned with IFRC Strategy 2030, representing the collective ambitions of IFRC membership, and is the result of a joint planning process and will serve for joint monitoring and reporting. It will be revised on an annual basis to adjust priorities and funding requirements to the needs in-country.
