NATIONAL SOCIETY PROFILE

As per 2024 Plan. To be updated in full 2025 Plan, as per need

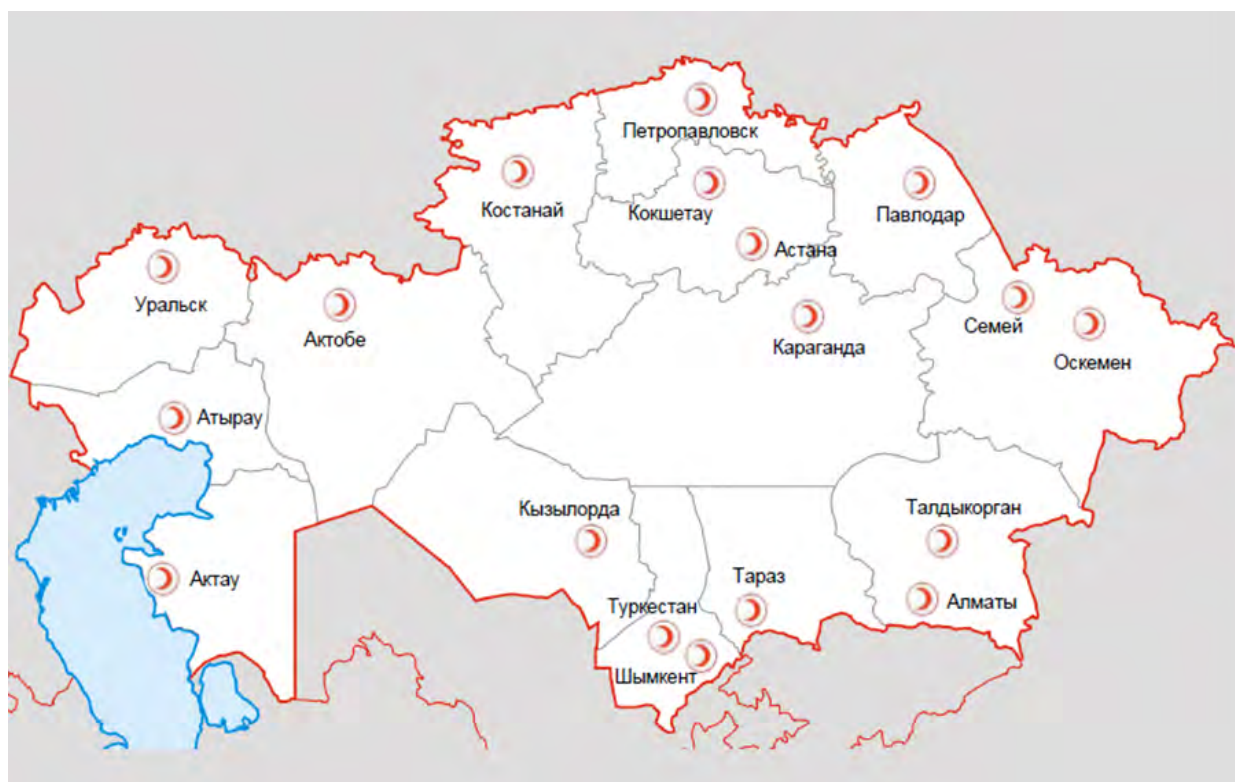

The **Kazakh Red Crescent** was established in 1937 and was admitted to the International Federation of Red Cross and Red Crescent (IFRC) in its current form in 2003.

The mission of the Kazakh Red Crescent is to prevent and alleviate human suffering while upholding human dignity and avoiding discrimination based on various factors. Recognized as the country's largest humanitarian, non-profit, volunteer organization, the Kazakh Red Crescent operates with 17 branches, 111 staff and 7,795 volunteers. The National Society prioritizes first aid training, non-remunerated blood donation promotion, social care and disaster preparedness and response. It works closely with the government, addressing diverse humanitarian challenges such as armed conflicts, migration, human trafficking and health crises. Its focus includes enhancing partnerships, adapting to changing crises and responding effectively.

Acting both before and after disasters and crises, the National Society aims to meet the needs and enhance the quality of life for vulnerable populations. The National Society's Strategic Plan for 2021–2025 aligns with the Government's 'Kazakhstan 2050 Development Strategy' and sets out three strategic targets:

- Readiness and response to crises and assistance in rapid recovery
- Promotion of safe, healthy lifestyles, opportunities for community development and respect for human dignity
- Social mobilization of inclusive local communities

In 2023, the Kazakh Red Crescent reached approximately 795,000 people with long term services and development programmes and 3,146 with disaster response and early recovery programmes.

Map of the branches of the Kazakh Red Crescent

The map does not imply the expression of any opinion on the part of the IFRC or the National Society concerning the legal status of a territory or its authorities

The International Federation of Red Cross and Red Crescent Societies (IFRC) is the world's largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 16 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

About the plan

This extract will be replaced by the full plan soon.

The plan reflects the priorities of the host National Society, the IFRC and National Societies providing international support, for 2025 and subsequent years. It is aligned with IFRC [Strategy 2030](#), representing the collective ambitions of the IFRC membership, and is the result of a joint planning process and will serve for joint monitoring and reporting. It will be revised on an annual basis to adjust priorities and funding requirements to the needs in-country.

Explanatory note on funding requirements

- The total funding requirements show what the IFRC network seeks to raise for the given year through different channels: funding through the IFRC, through participating National Societies as bilateral support, and through the host National Society from non-IFRC network sources. All figures should include the administrative and operational costs of the different entities
- Host National Society funding requirements not coming from IFRC network sources can comprise a variety of sources, as demonstrated when reporting on income in the [IFRC Federation-wide Databank and Reporting System](#)
- Participating National Society funding requirements for bilateral support are those validated by respective headquarters, and often represent mainly secured funding
- IFRC funding requirements comprise both what is sourced from the IFRC core budget and what is sought through emergency and thematic funding. This includes participating National Societies' multilateral support through IFRC, and all other IFRC sources of funding
- Figures for the years beyond 2025 most often represent partial requirements that are known at time of publication. Many National Societies have annual internal approval processes for funding requirements, and lower figures do not mean a decrease in funding requirements in future years
- Missing data and breakdowns: data may not be available from all IFRC network members for funding requirements. This may lead to inconsistencies across different reporting tools as well as potential under-estimation of the efforts led by all
- Reporting bias: the data informing this Federation-wide overview is self-reported by each National Society (or its designated support entity) which is the owner and gatekeeper, and responsible for accuracy and updating. IFRC tries to triangulate the data provided by the National Societies with previous data and other data in the public domain
